FLAGSHIP ANC

USER GUIDE

SAANC-FS

You made an excellent choice.

Your Flagship ANC headphones:

- Cancel a staggering amount of ambient noise
- Operate wirelessly with virtually every modern device (phone, laptop, tablet, desktop, TV, etc)
- Operate in wired mode (with the included 3.5mm cable)
- Have touch controls on the right ear-cup to control playback
- Include an airline adaptor (to use on - you guessed it - an airplane)

Charge

Your headphones arrive with a bit of juice. We highly recommend you give them a full charge prior to use. This will take about 1.5 hours.

You'll see a green LED light when the headphones are fully charged.

Please use the USB-C cable we provided.

Why? Not all USB-C cables will work with the Flagship ANC Headphones. There are different charging standards that are outside of our control.

For example: your laptop's USB-C charger will NOT charge the headphones.

If you need to use a third party charger, it should originate in a USB-A connection.

Operate

Hold the Small Button for Power On/Off

Hold this button to Power on and off the headphones. Real simple, right?

Tap the Big Button to cycle through listening modes:

- Active Noise Cancelling
- Ambient Sound Mode (hear your surroundings)
- Normal listening mode (no ANC or Ambient Sound)

Don't worry; you'll hear voice prompts so you know which mode you are in!

Bluetooth Pairing

The Flagship ANC headphones work with any Bluetooth-enabled device. Virtually all modern phones, tablets, laptops, desktops, and TVs will connect wirelessly with the Flagship ANC headphones.

Step 1:

Power on the Flagship ANC headphones (by holding the small button). You'll see an LED light flashing an alternating red and blue - this means that the headphones are ready to connect to your device.

Step 2:

Go to the Bluetooth menu in your device, and select "Flagship ANC Headphones". It may take a few moments to appear.

Keep in mind:

The headphones need to be in pairing mode to connect- you'll know this by a flashing red/blue light.

If you don't see this, power off the headphones. Then power them on again, but this time hold the small button for a full 5 seconds.

Touch Controls (Volume)

The Flagship ANC headphones have robust touch controls built into the right ("R") ear-cup.

Swipe up and down on the right ("R") earcup to control volume:

A quick swipe up or down will adjust the volume one increment.

For larger volume adjustments, swipe and then hold your finger in place.

The volume will adjust as long as your finger is still in contact with the ear-cup.

Touch Controls (Playback)

For track controls, swipe left and right.

A swipe right (which will feel like an "outward", front swipe) will skip the track forwards

A swipe left (which will feel like a "backwards" swipe) will rewind the current track, and then go back to your previous track.

To play/pause music, double-tap the center of the right earcup.

Touch Controls (More)

Hold your finger against the center of the right earcup to trigger your voice assistant (Siri, Google Voice, Cortana).

During a phone call, this same command will hang-up the phonecall.

Place your entire hand over the right ear-cup, and the headphones will immediately go into transparency mode. This comes in handy when you need to hear your surroundings right away.

Operating in Cabled Mode

Your Flagship ANC headphones come with a 3.5mm Aux cable.

This means you can use the headphones when the battery is dead, or when a wireless connection isn't available.

Speaking of airplanes - we also include an airline adaptor. You know, for those weird two-prong plugs.

Safety Information

Warning!

Continued exposure to loud noise (more than 85 decibels)(85 dBA) may cause gradual but permanent damage to hearing.

Always turn the level of your source down to a low level before placing the headphones on your ears. Gradually turn up volume until you achieve a comfortable level. Never listen at high volumes for long periods.

Do not tamper or disassemble the headphones, as doing so will void the warranty. Besides removable ear-pads, there are no user-serviceable parts inside.

Be aware of your surroundings. Do not use headphones when it is unsafe to do so, for example when operating a vehicle, crossing the street, or any activity requiring you to pay attention to your surroundings.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
