

# Shenzhen Hesibond IOT Technology Corp., Ltd.

## Tune up procedure

May 14, 2019

FCC ID: 2AKP2-2920A

RF average power range:

1) LTE BAND7:

Maximum tune-up Power: 23dBm/199.526mW

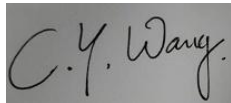

2) 2.4GHz:

Maximum tune-up Power: 3dBm/1.995mW

Then these appropriate gain settings are stored in each device individually. The user has no possibility to change these settings later on, and during manufacturing each device will be individual calibrated. The measurement is done in fully calibrated setup, which is based on the base station simulator. Furthermore, the highest power level is verified afterwards measurement on three channels (low, middle and high)

Sincerely,
