

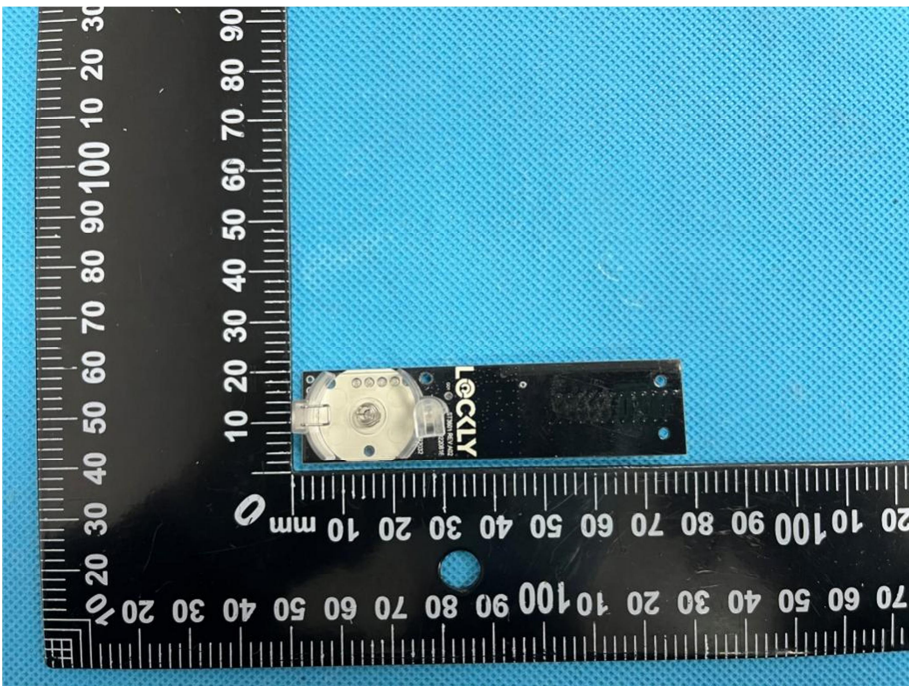

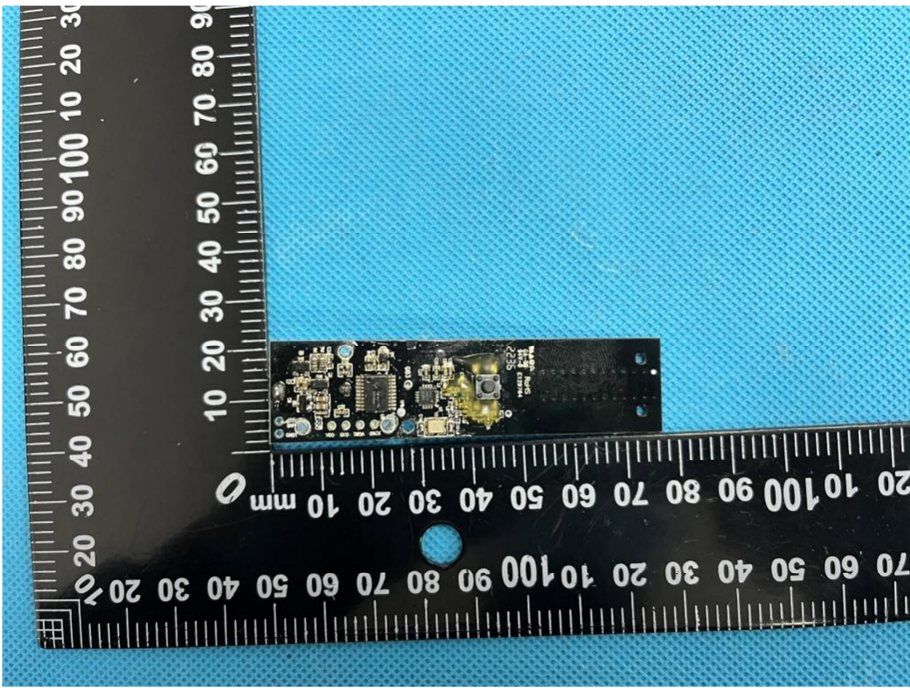

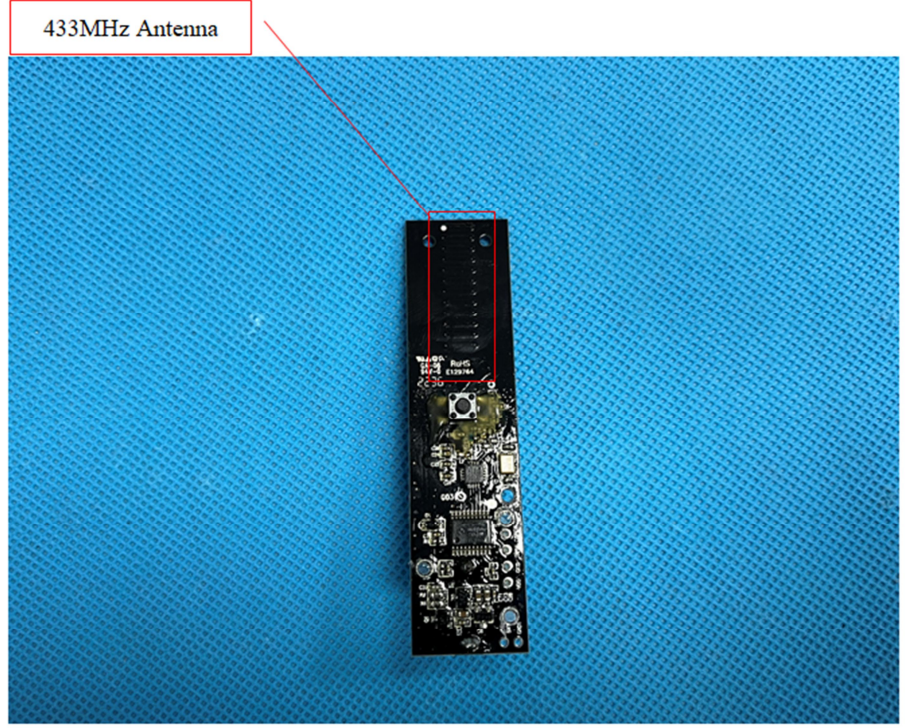

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	 <p>A photograph showing the external white plastic housing and the internal printed circuit board (PCB) assembly. The housing is open, revealing the PCB which has a yellow component and a black component with the brand name 'LOCKLY' printed on it. A blue marking '220124R' is visible on the top part of the housing. A black ruler with white markings is placed vertically to the left of the assembly for scale, showing measurements in millimeters.</p>
<p><b>Solder Board-Component View 1</b></p>	 <p>A close-up photograph of the PCB component from the previous view, showing the soldered connections of the yellow component. The 'LOCKLY' brand name is clearly visible on the black PCB. A black ruler with white markings is placed vertically to the left of the component for scale, showing measurements in millimeters.</p>

<p style="text-align: center;"><b>Solder Board-Component View</b> 2</p>	 <p>A photograph showing a small, rectangular printed circuit board (PCB) component. The board is populated with various electronic components, including a central microcontroller, several capacitors, and other surface-mount devices. The board is placed on a blue, textured background. A black ruler with white markings is positioned horizontally below the board, showing measurements in millimeters. The ruler is oriented vertically in the image, with the 0 mm mark at the top and the 100 mm mark at the bottom. The board is approximately 100 mm long and 20 mm wide.</p>
<p style="text-align: center;"><b>Antenna View</b></p>	 <p>A photograph showing the same PCB component from a different perspective. The board is oriented vertically. A red box highlights a specific component on the board, which is labeled "433MHz Antenna". A red line points from the label to the antenna component. The board is placed on a blue, textured background.</p>
