

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the white plastic housing of the EUT (Electronic Unit Tester) and the internal circuit board. The housing is open, revealing the black PCB. A black ruler with white markings is placed vertically to the left of the components for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has a black battery labeled 'AAA' and a small component labeled '23041R'.
Solder Board-Component View 1	 A photograph showing the solder board-component. The component is a small, rectangular black PCB with gold-colored solder joints. A black ruler with white markings is placed vertically to the left of the component for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has a black battery labeled 'AAA' and a small component labeled '23041R'.

Solder Board-Component View 2	 A photograph of a small electronic component, likely a module, placed on a blue textured surface. The component is positioned horizontally. A black ruler with white markings is placed vertically to the left of the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component itself is dark with various electronic components visible, including a small antenna structure on the left side.
Antenna View	 A photograph of the same electronic component, similar to the one in the first image, placed on a blue textured surface. A black ruler with white markings is placed vertically to the left of the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component is dark with various electronic components visible. A red rectangular box highlights the antenna structure on the left side of the component. A red line points from this box to a label "Antenna." located in a red-bordered box at the bottom right of the image.
