

<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph showing a black PCB component with a multi-colored ribbon cable attached. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm. The PCB has several circular cutouts and a small connector on the right side. The text 'LOCKLY' is visible on the board.
<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph showing the same black PCB component from a different angle. The multi-colored ribbon cable is clearly visible, connected to a connector on the board. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm. The PCB has various components, including a large circular cutout and a connector on the right side. The text 'LOCKLY' is visible on the board.

<p style="text-align: center;">Solder Board-Component View 4</p>	 A photograph of a black printed circuit board (PCB) component, likely a camera module, placed on a blue textured surface. A black ruler is positioned vertically to the left of the component, showing measurements from 0 to 100 mm. The component features various electronic components, including a central lens assembly, and a multi-colored cable is attached to one end. The text 'CAM8 8628' is visible on the board.
<p style="text-align: center;">Solder Board-Component View 5</p>	 A photograph of a small green PCB component, possibly a sensor or camera module, placed on a blue textured surface. A black ruler is positioned vertically to the left of the component, showing measurements from 0 to 100 mm. The component has a lens and various electronic components. The text 'RoHS 01' and 'E123794' is visible on the board.

<p style="text-align: center;">Solder Board-Component View 6</p>	 A photograph of a small green PCB component, labeled 'LOCKY' and 'PCB4', placed on a blue textured surface. A black ruler with white markings is positioned below the component for scale. The ruler shows markings from 10 to 50 mm on the top edge and 20 to 100 mm on the bottom edge.
<p style="text-align: center;">Antenna View</p>	 A photograph showing the internal components of a device, including a main PCB and a smaller component labeled 'BLE Antenna'. A red box highlights the BLE Antenna component, and a red line points from the label to it. The device is shown from the back, with various wires and connectors visible.
