

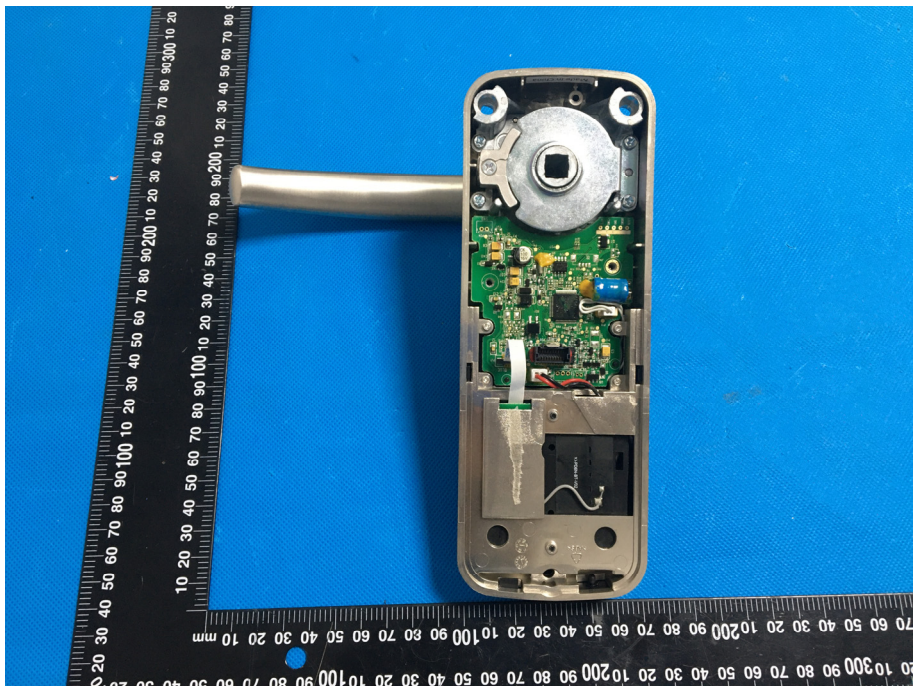

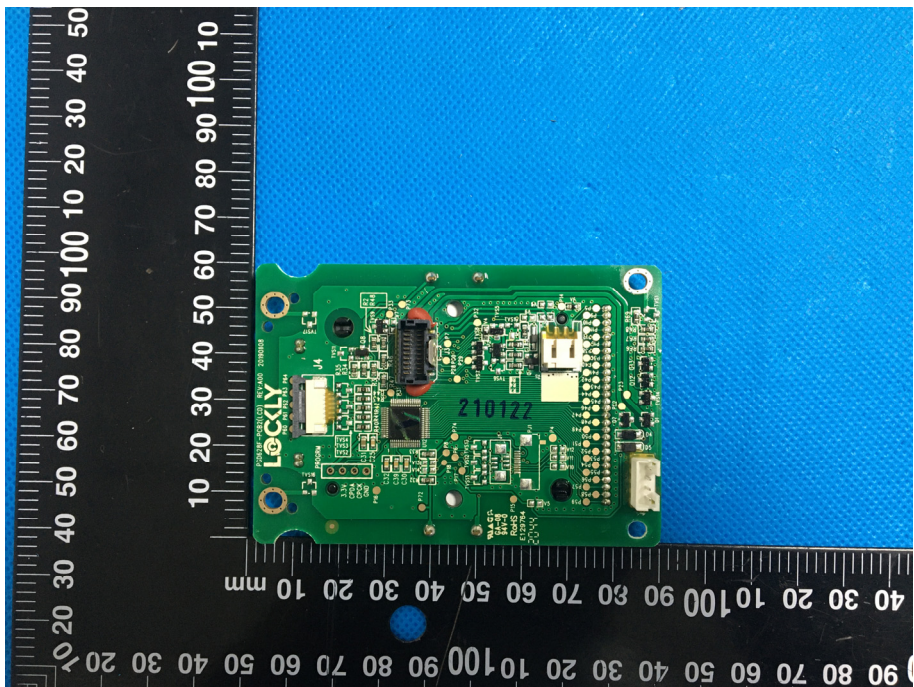

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

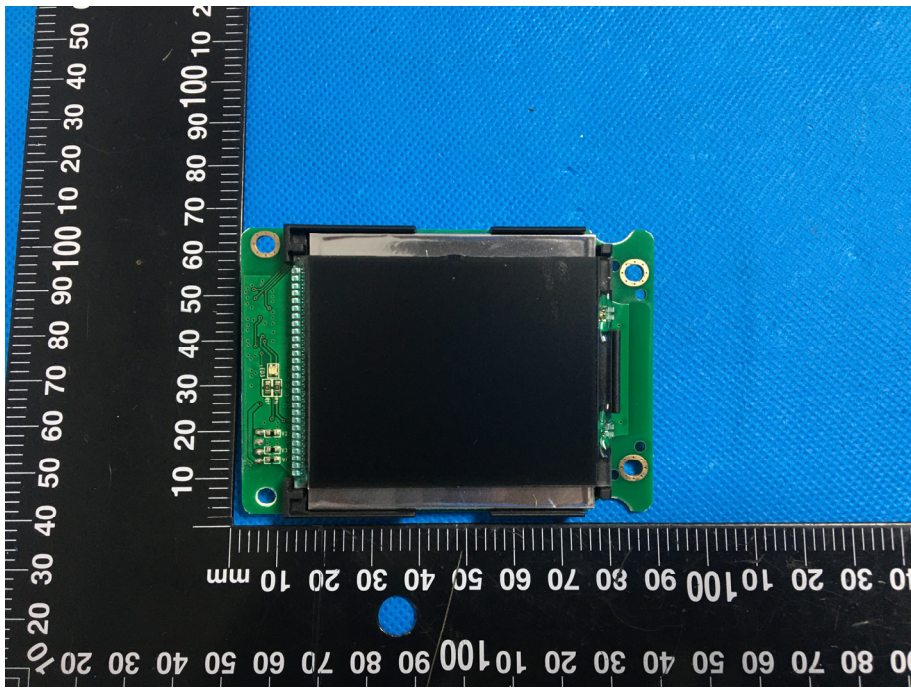

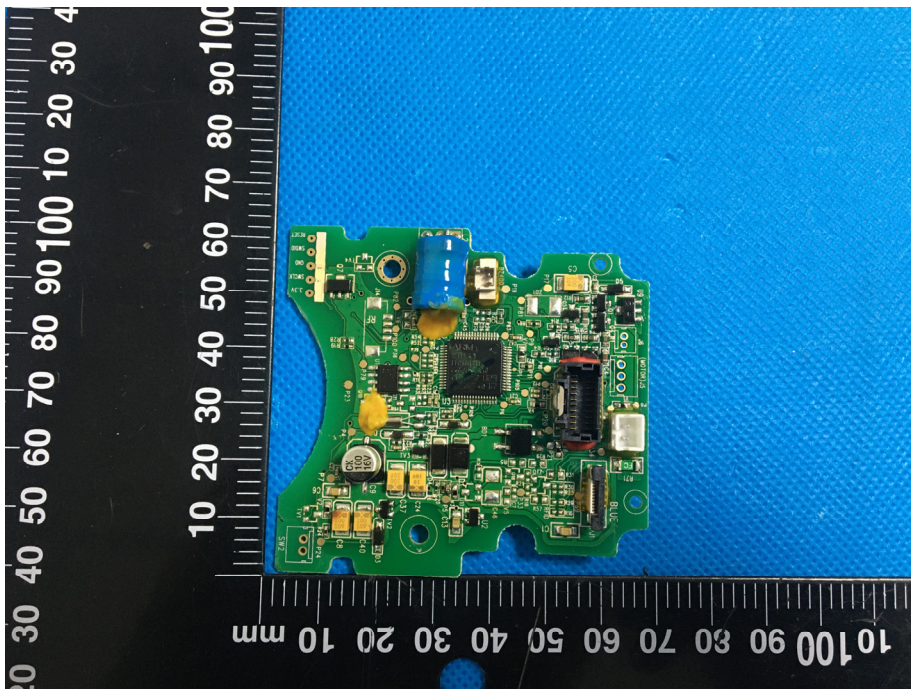

**EUT Housing and Board
View 1**

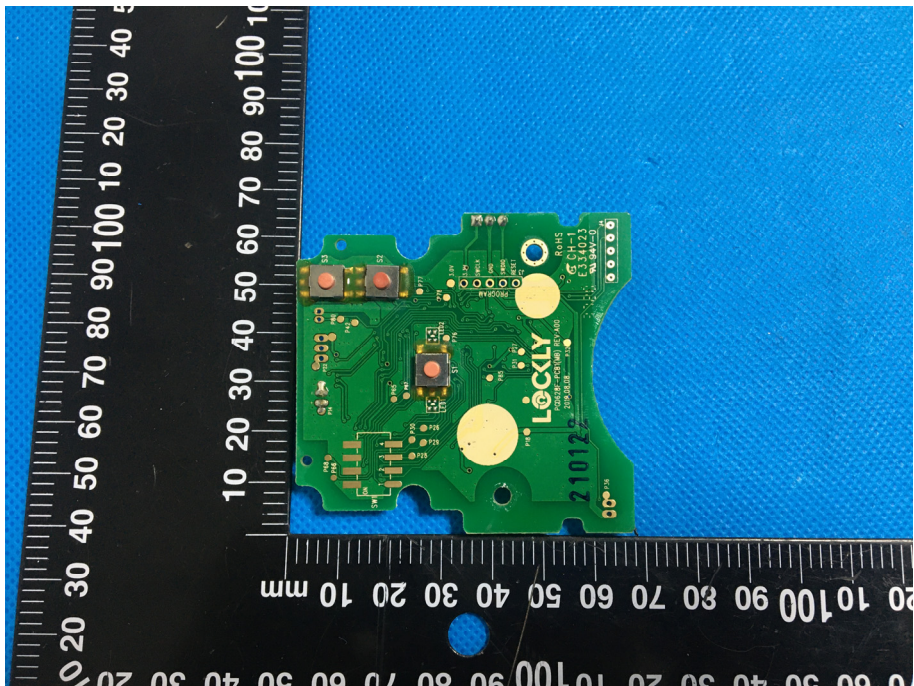

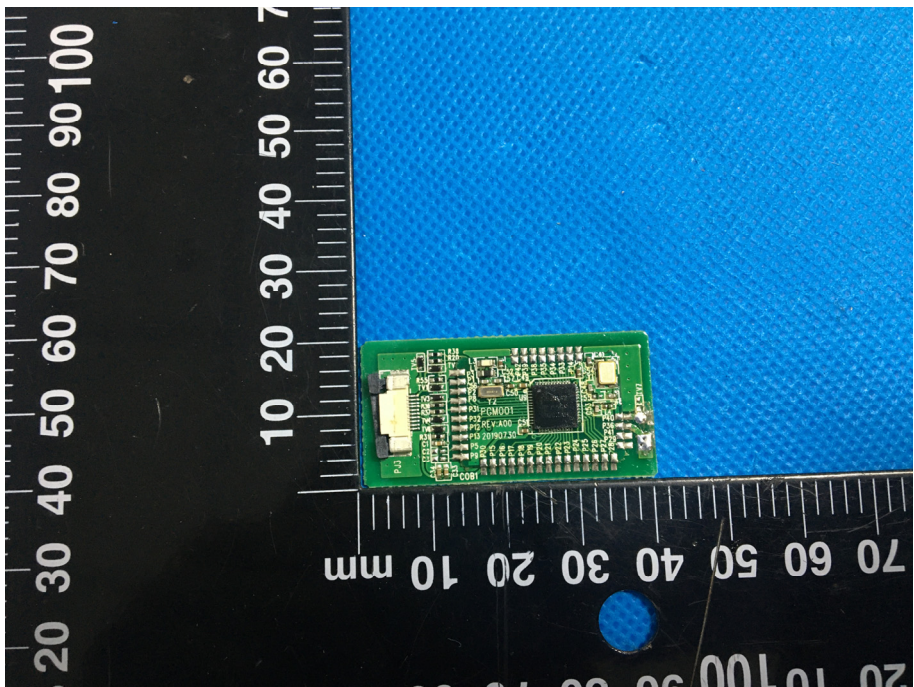

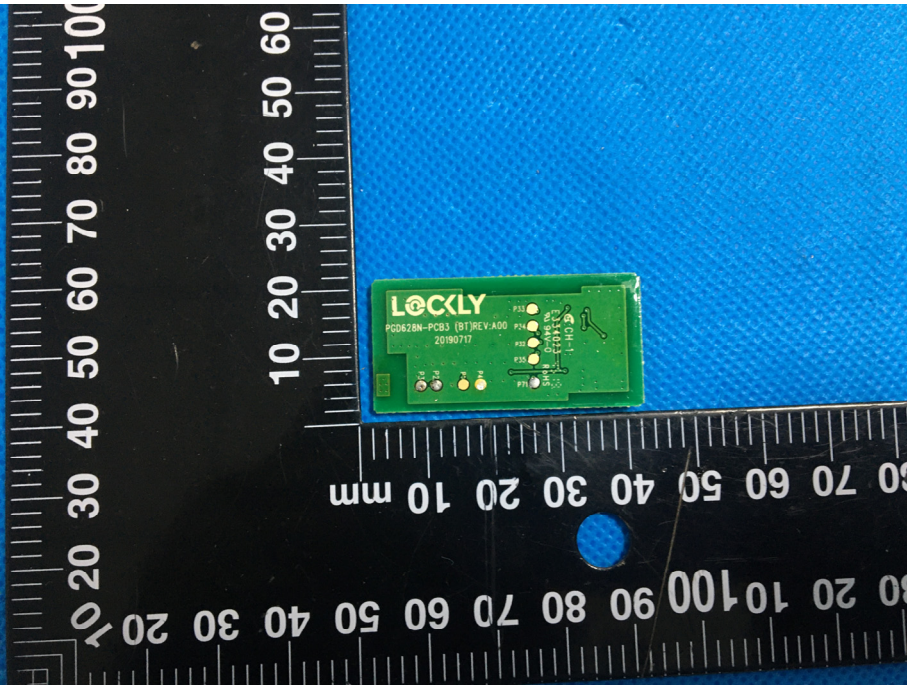

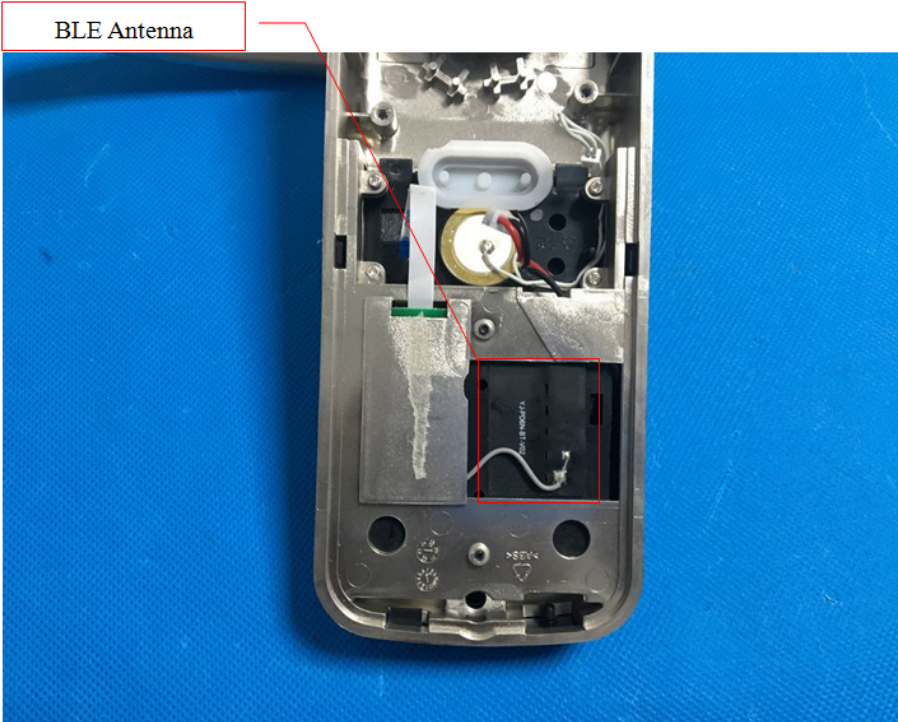

**EUT Housing and Board
View 2**

<p>EUT Housing and Board View 3</p>	 A photograph showing the back of a mobile phone housing with the internal circuit board exposed. A silver metal antenna is attached to the top of the board. The phone is placed on a blue textured surface next to a black ruler for scale. The ruler shows measurements in millimeters, with the phone's length being approximately 110 mm.
<p>Solder Board-Component View 1</p>	 A close-up photograph of the green printed circuit board (PCB) components. The board is populated with various electronic components, including a large integrated circuit (IC) labeled '2101ZZ', a smaller IC labeled 'LOCKLY', and several surface-mount components. The board is placed on a blue textured surface next to a black ruler for scale. The ruler shows measurements in millimeters, with the board's width being approximately 60 mm.

<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph showing a green PCB component with a large black rectangular area in the center. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm and its width approximately 40 mm. There are four circular holes, two on each side, and a connector on the left side of the component.</p>
<p style="text-align: center;">Solder Board-Component View 3</p>	 <p>A photograph showing a green PCB component with various electronic components, including a blue capacitor, a red component, and several integrated circuits. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm and its width approximately 40 mm. There are four circular holes, two on each side, and a connector on the left side of the component.</p>

<p style="text-align: center;">Solder Board-Component View 4</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'LOCKLY' and '21012', positioned on a blue textured surface. The component is irregularly shaped and features several components, including two large yellow circular pads, a central square component, and various smaller components and traces. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters from 0 to 100.
<p style="text-align: center;">Solder Board-Component View 5</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'LOCKLY' and '21012', positioned on a blue textured surface. The component is rectangular and features a central square component, a yellow circular pad, and various smaller components and traces. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters from 0 to 100.

<p style="text-align: center;">Solder Board-Component View 6</p>	 <p>A photograph of a green PCB component, labeled 'LOCKLY P0628N-PCB3 (BT)REV: A00 20190717', placed on a black ruler. The ruler shows measurements in millimeters. The component has several gold-colored pads and solder points. The background is a blue textured surface.</p>
<p style="text-align: center;">Antenna View</p>	 <p>A photograph of the internal components of a device, showing a battery and various electronic components. A red box highlights a component labeled 'BLE Antenna'. The device is placed on a blue textured surface.</p>
