

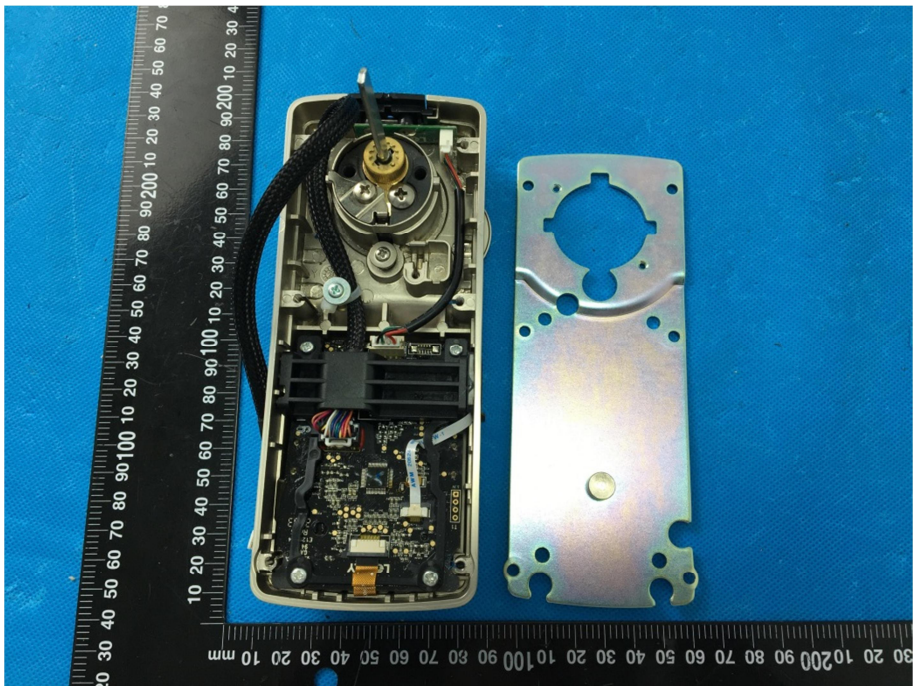

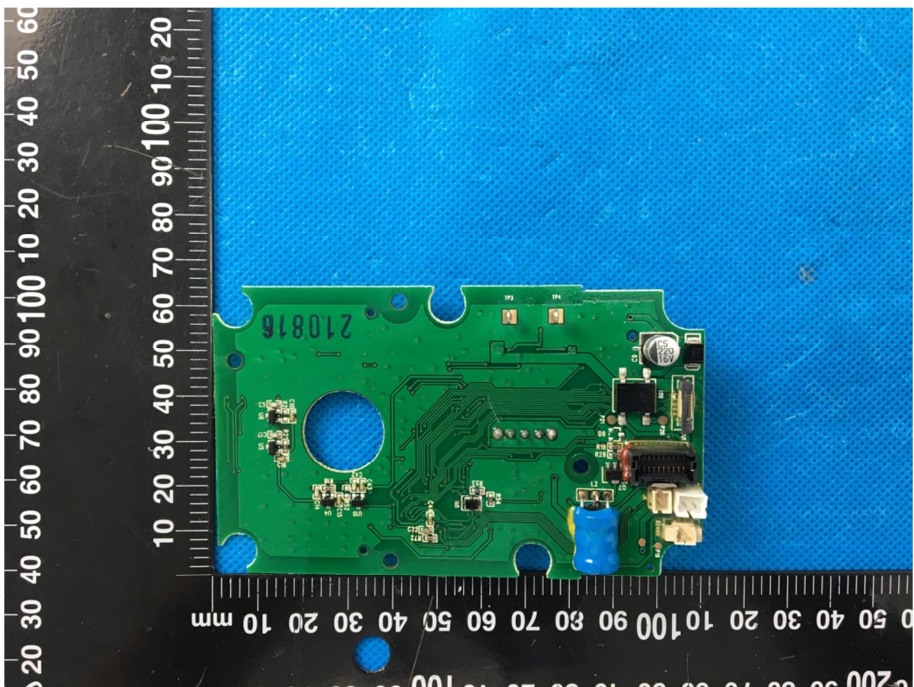

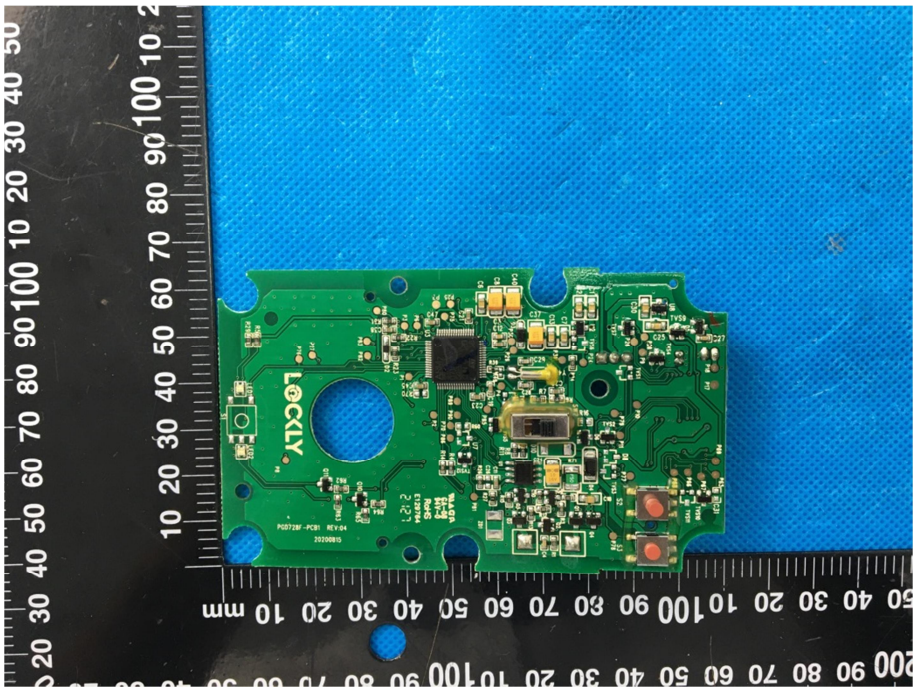

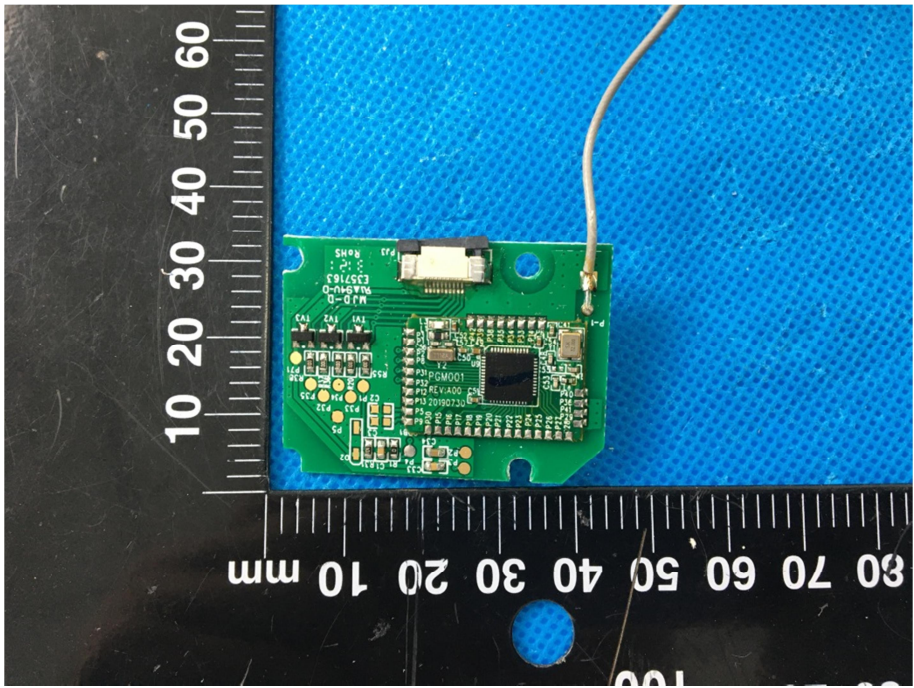

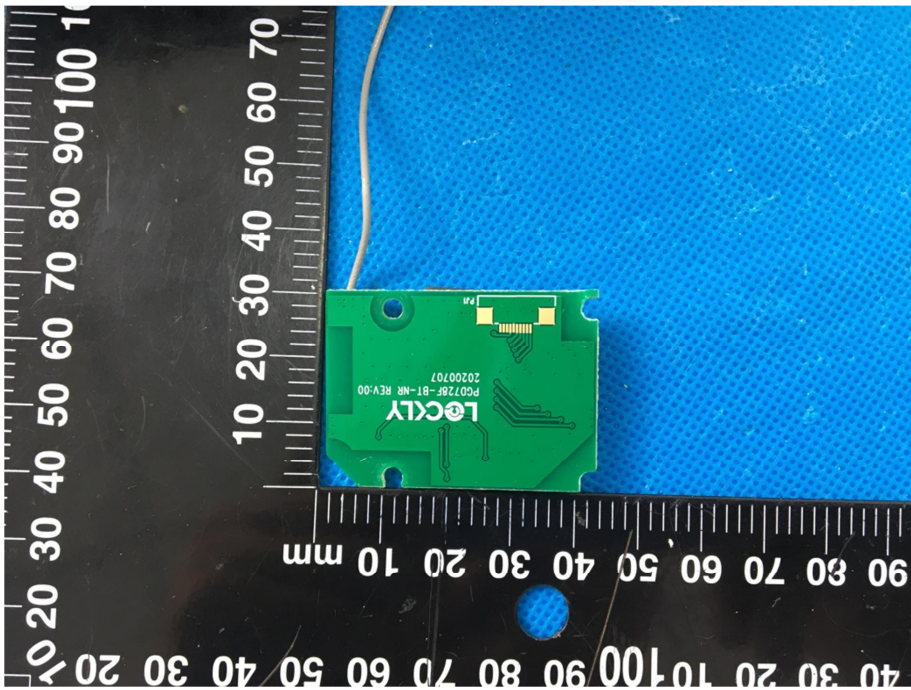

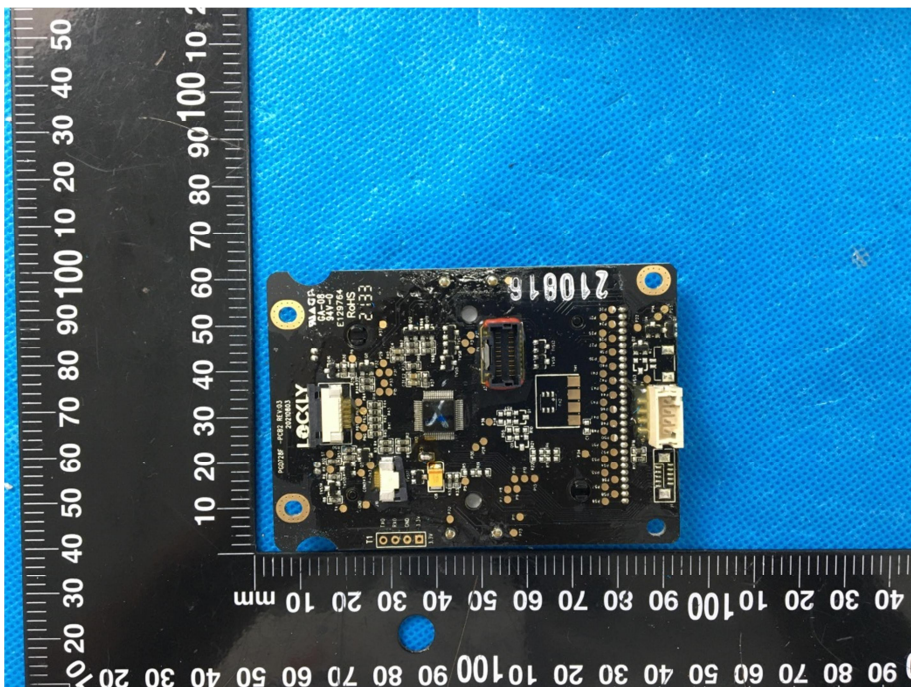

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	
<p>EUT Housing and Board View 2</p>	

<p>EUT Housing and Board View 3</p>	 A photograph showing the EUT housing and board assembly. The housing is a silver-colored metal shell with a circular cutout at the top. The board is a green PCB with various components, including a large blue capacitor and a black cable. A black ruler is placed vertically to the left of the assembly for scale, showing measurements in millimeters. The background is a blue textured surface.
<p>Solder Board-Component View 1</p>	 A close-up photograph of the solder board component. The board is a green PCB with various components, including a large blue capacitor and a black cable. A black ruler is placed vertically to the left of the component for scale, showing measurements in millimeters. The background is a blue textured surface.

<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 2'. The board is rectangular with several circular cutouts and is populated with various electronic components, including a central microcontroller, several resistors, and capacitors. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board's dimensions are approximately 100 mm by 60 mm. The text 'WALTEK' is visible on the board.</p>
<p style="text-align: center;">Solder Board-Component View 3</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 3'. The board is smaller than the one in View 2 and features a central microcontroller, several resistors, and capacitors. A thin, light-colored wire is soldered to one of the components on the board. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements in millimeters from 0 to 60. The board's dimensions are approximately 60 mm by 40 mm. The text 'WALTEK' and 'REV. 4.00' are visible on the board.</p>

<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph of a small green PCB component. The component is rectangular with a notch on the right side and a circular hole on the left. It has gold-colored pads and a small gold wire extending from the top. The text on the component includes 'LOCKLY', 'PG0728F-B1-MR REV.00', and '20200701'. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 40 mm.</p>
<p style="text-align: center;">Solder Board-Component View 5</p>	 <p>A photograph of a larger black PCB component. The component is rectangular with several circular holes and various electronic components, including a microcontroller, capacitors, and connectors. The text on the component includes 'LOCKLY', 'PG0728F-B1-MR REV.00', '210815', and '2133'. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm.</p>
