

<p style="text-align: center;">Solder Board-Component View 5</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled '210816', placed on a blue textured surface. The board is positioned between two black rulers. The ruler on the left shows markings from 0 to 100 mm, and the ruler on the right shows markings from 0 to 200 mm. The board features various electronic components, including a large circular cutout, several surface-mount components, and a connector on the right side.</p>
<p style="text-align: center;">Solder Board-Component View 6</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'LOCKLY', placed on a blue textured surface. The board is positioned between two black rulers. The ruler on the left shows markings from 0 to 100 mm, and the ruler on the right shows markings from 0 to 200 mm. The board is densely populated with various electronic components, including a large central chip, several smaller components, and a connector on the right side. The text 'LOCKLY' is printed on the board.</p>

<p style="text-align: center;">Solder Board-Component View 7</p>	 <p>A photograph of a black printed circuit board (PCB) with various electronic components. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm. The PCB has several components, including a large integrated circuit (IC) in the center, a smaller IC to its right, and various passive components like resistors and capacitors. There are also connectors and pads on the board. The text 'LOCKLY' is visible on the board. The board is oriented vertically in the image.</p>
<p style="text-align: center;">Solder Board-Component View 8</p>	 <p>A photograph of a black PCB, similar to the one in View 7, but with a large, dark, rectangular component (possibly a display or sensor) mounted on it. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm. The PCB has several components, including a large integrated circuit (IC) in the center, a smaller IC to its right, and various passive components like resistors and capacitors. There are also connectors and pads on the board. The board is oriented vertically in the image.</p>
