View 2**

<p><b>EUT Housing and Board View 3</b></p>	
<p><b>Solder Board-Component View 1</b></p>	

<p style="text-align: center;"><b>Solder Board-Component View 2</b></p>	 A photograph showing a green printed circuit board (PCB) component with a large black rectangular area in the center. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm. The component has several small components and solder joints visible around the edges of the black area.
<p style="text-align: center;"><b>Solder Board-Component View 3</b></p>	 A photograph showing a green PCB component with various electronic components, including resistors, capacitors, and integrated circuits. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm. The component has a large circular hole in the center and the word "LOCLY" printed on it.

<p style="text-align: center;"><b>Solder Board-Component View 4</b></p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled '210114', positioned on a blue textured surface. A black ruler with white markings is placed vertically to the left of the board, showing measurements from 0 to 100 mm. The board features various electronic components, including a microcontroller, several resistors, and a small blue component. The board has a complex shape with several circular cutouts and mounting holes.</p>
<p style="text-align: center;"><b>Solder Board-Component View 5</b></p>	 <p>A photograph of a smaller green PCB component, labeled 'LOCLY', positioned on a blue textured surface. A black ruler with white markings is placed vertically to the left of the board, showing measurements from 0 to 100 mm. The board is populated with several surface-mount components, including a microcontroller and various passive components. Text on the board includes 'PCD728-BT REV:00', '20190507', 'RoHS', 'CH-1', 'E334023', and 'PL 94V-0'. A white cable is connected to the board's edge connector.</p>

<p><b>Solder Board-Component View</b> 6</p>	 <p>A photograph of a green printed circuit board (PCB) component. The board is rectangular and features a central integrated circuit (IC) with numerous pins. A white cable is connected to the top edge of the board. The component is placed on a black surface with a white ruler for scale. The ruler shows markings in millimeters, with the component's length being approximately 40 mm. The background is a blue textured surface.</p>
<p><b>Antenna View</b></p>	 <p>A photograph showing the interior of a device's housing. A black rectangular component, identified as a BLE antenna, is mounted on the inner surface. A white cable is connected to the antenna. A red box highlights the antenna component, and a red line points from a label "BLE Antenna" to it. The antenna has the part number "YJ-P00728-BT-V03" printed on it. The device's interior is black, and the background is a blue textured surface.</p>
