

<p style="text-align: center;"><b>Solder Board-Component View 5</b></p>	 <p>A photograph showing a small black electronic component with a white connector and two red wires. The component is placed on a blue textured surface next to a black ruler. The ruler has markings in millimeters and centimeters. The component is oriented vertically, and the ruler is placed horizontally next to it for scale. The component has the word 'LOCKLY' printed on it.</p>
<p style="text-align: center;"><b>Solder Board-Component View 6</b></p>	 <p>A photograph showing a small black electronic component with a white connector and two green wires. The component is placed on a blue textured surface next to a black ruler. The ruler has markings in millimeters and centimeters. The component is oriented vertically, and the ruler is placed horizontally next to it for scale. The component has the word 'LOCKLY' printed on it.</p>

<p style="text-align: center;"><b>Solder Board-Component View 7</b></p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled '7', showing the solder side. The board is populated with various electronic components, including a large square component with a dark, textured surface, several smaller integrated circuits, and surface-mount components. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board is resting on a blue textured surface.</p>
<p style="text-align: center;"><b>Solder Board-Component View 8</b></p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled '8', showing the solder side. The board is populated with various electronic components, including two large square components with dark, textured surfaces, several smaller integrated circuits, and surface-mount components. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board is resting on a blue textured surface.</p>

<p style="text-align: center;"><b>Solder Board-Component View 9</b></p>	 A photograph of a green printed circuit board (PCB) component, labeled '220516', placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters. The component features various electronic components, including a central integrated circuit, several resistors, and a small white component. The ruler indicates the component is approximately 100 mm wide and 50 mm high.
<p style="text-align: center;"><b>Solder Board-Component View 10</b></p>	 A photograph of a black printed circuit board (PCB) component, labeled 'LOCKLY', placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters. The component features various electronic components, including a central integrated circuit, several resistors, and a small white component. The ruler indicates the component is approximately 100 mm wide and 50 mm high.

<p><b>Solder Board-Component View 11</b></p>	 A photograph of a black PCB component with four gold-plated circular pads at the corners. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's width being approximately 100 mm and its height approximately 60 mm.
<p><b>Solder Board-Component View 12</b></p>	 A photograph of a green PCB component with a central square pad and two smaller pads on the right side. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's width being approximately 40 mm and its height approximately 20 mm.
