

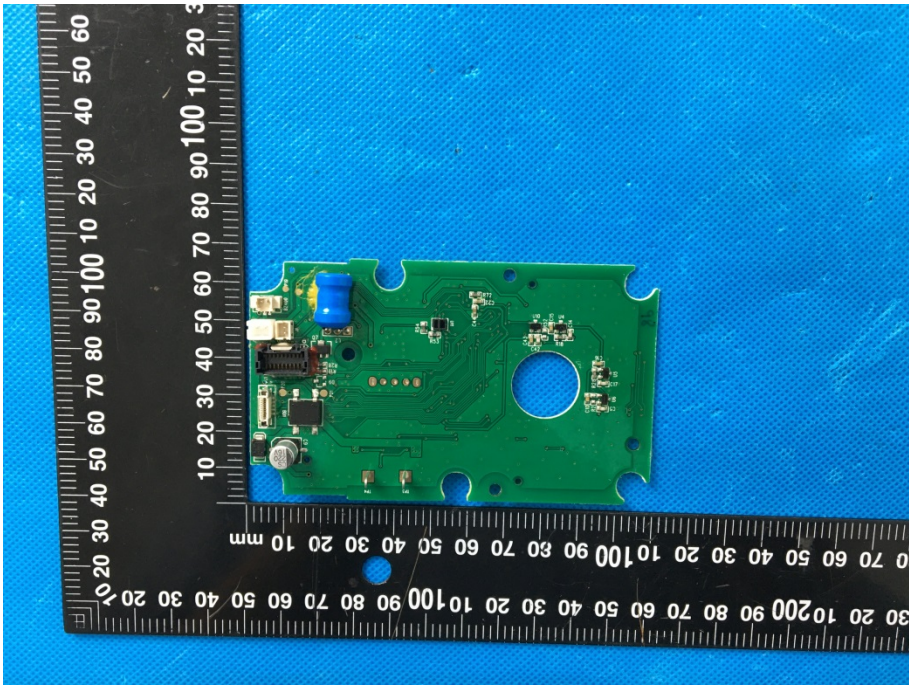

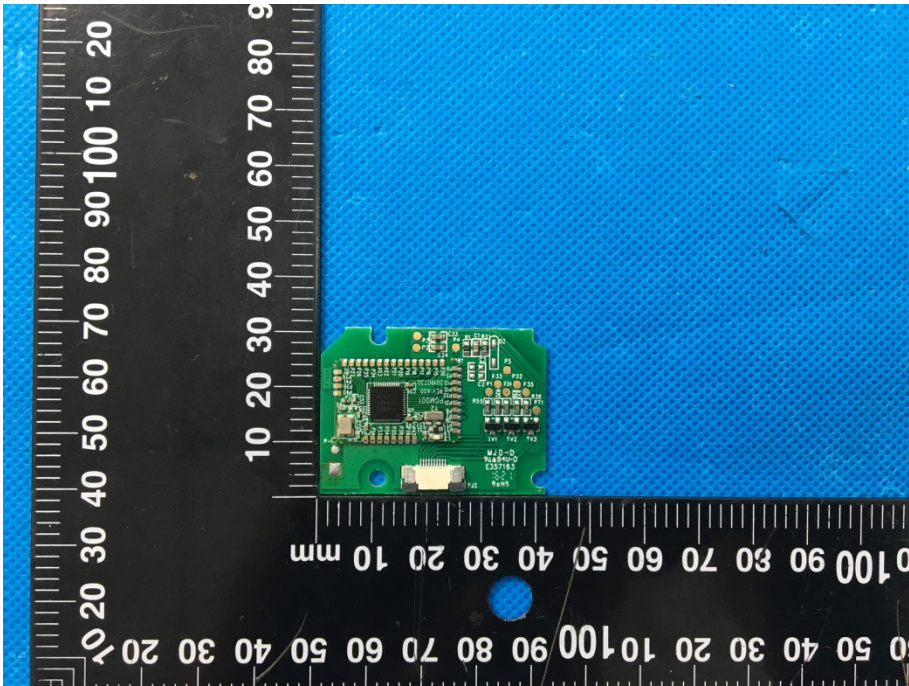

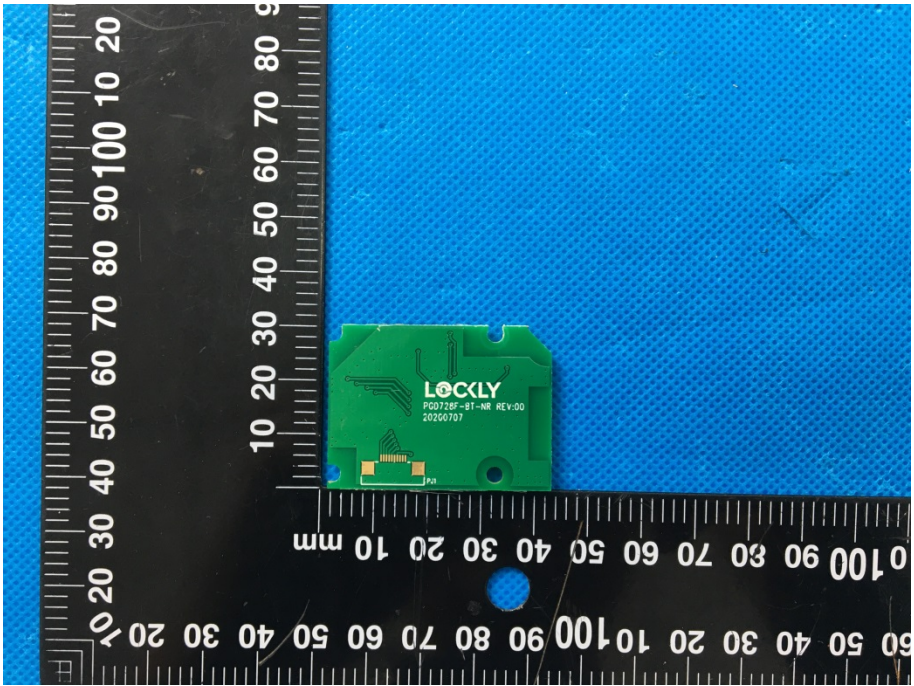

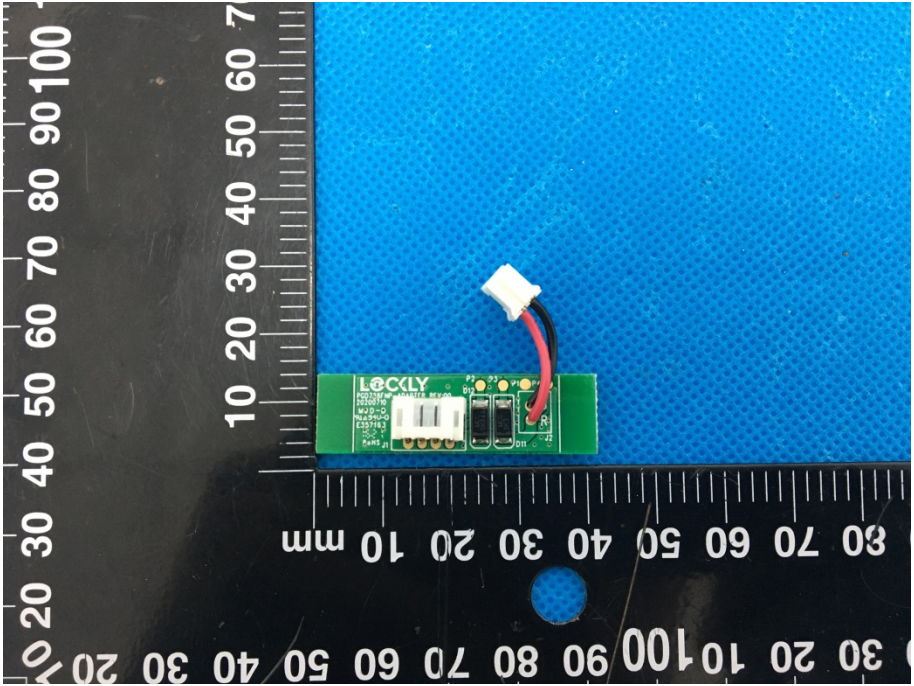

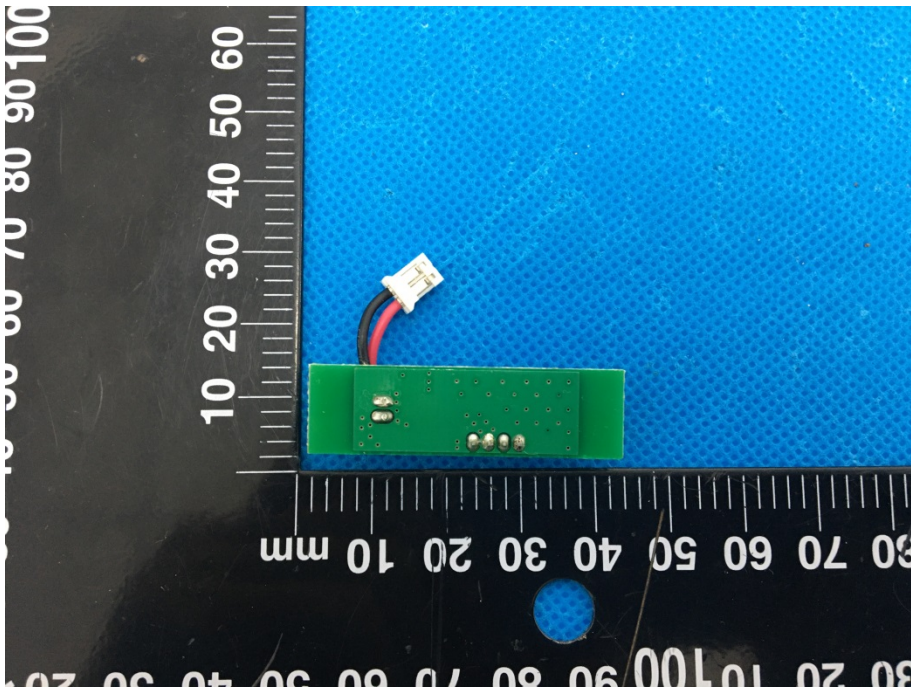

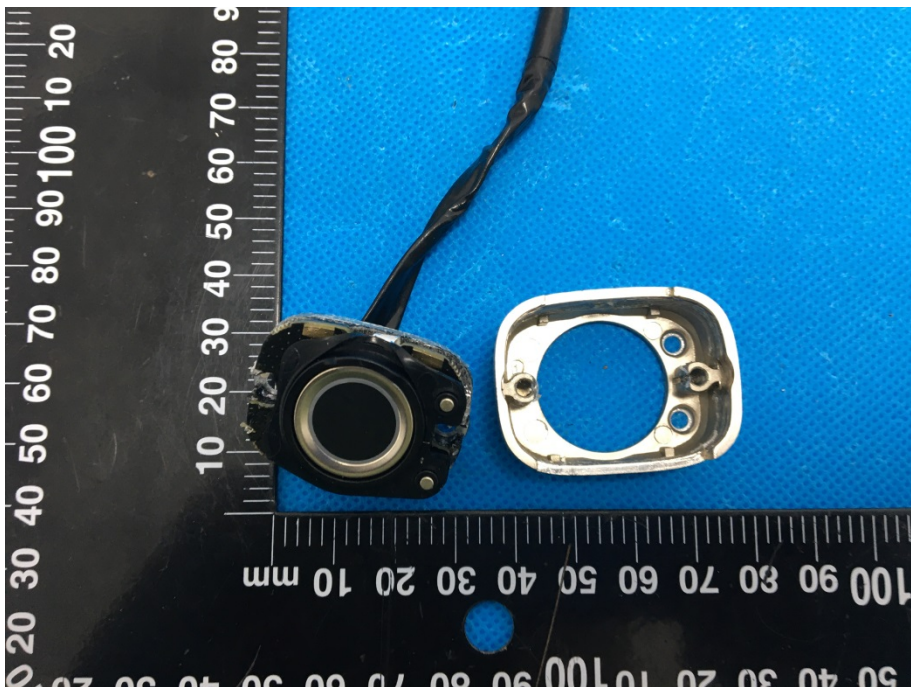

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

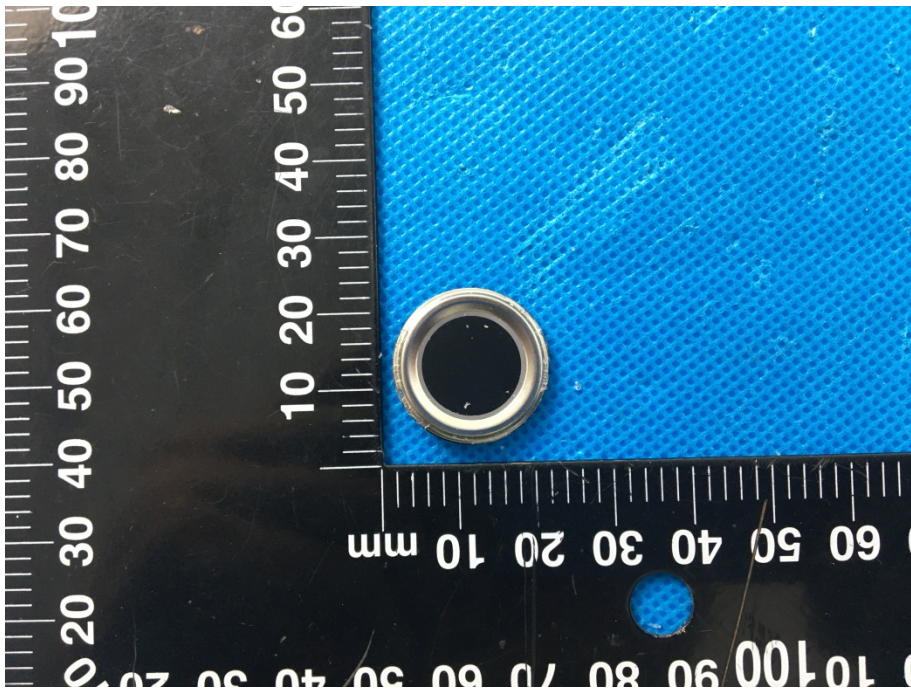

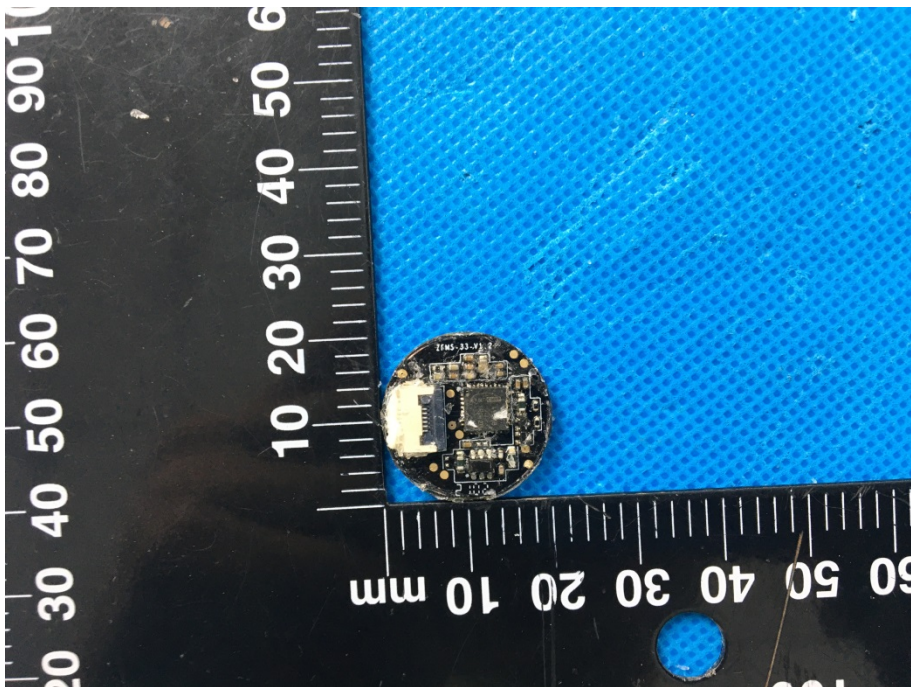

Model: PGD7A

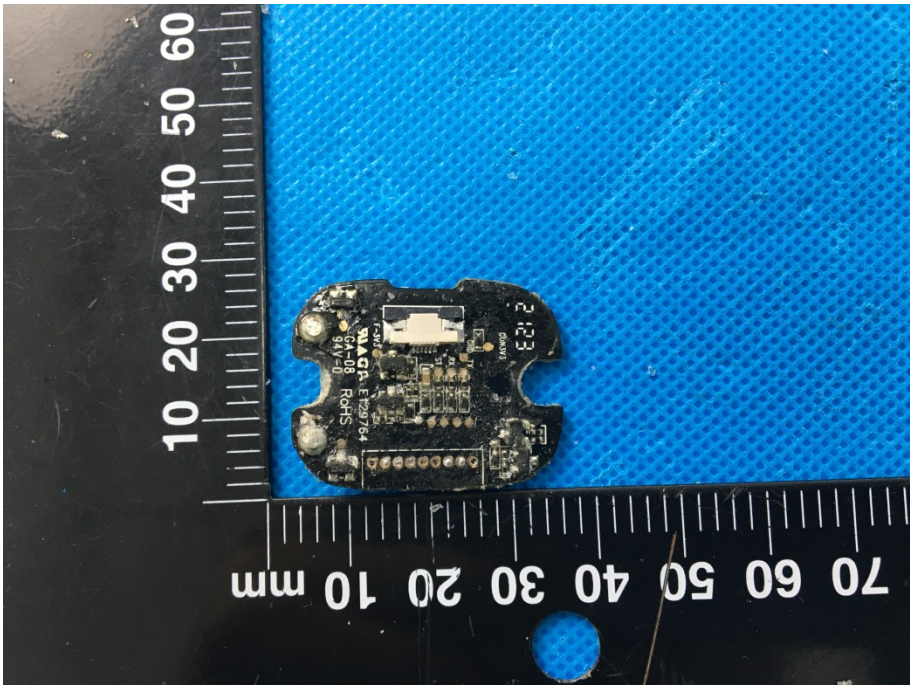

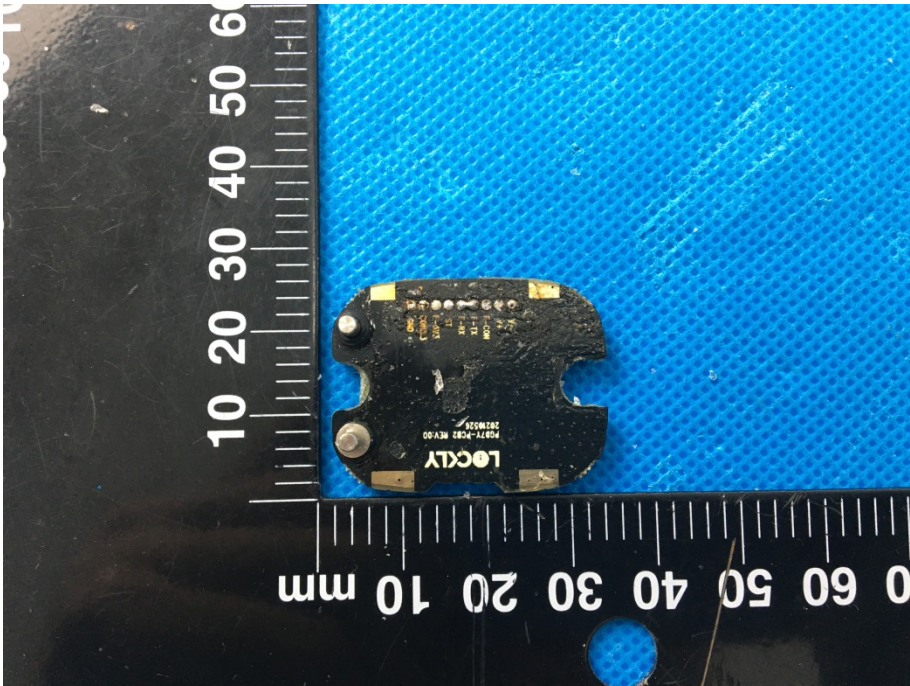

<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph of a green printed circuit board (PCB) component, labeled as View 2. The board is rectangular with rounded corners and features a large circular cutout in the center. It is populated with various electronic components, including a blue electrolytic capacitor, a silver cylindrical component, and several integrated circuits. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically on the left side of the board, with the 0 mark at the top and the 100 mark at the bottom.
<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph of a green printed circuit board (PCB) component, labeled as View 3. This board is smaller and more densely populated with components than View 2, featuring a large central chip and numerous smaller components. It is placed on the same blue textured surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically on the left side of the board, with the 0 mark at the top and the 100 mark at the bottom.

<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph of a small green printed circuit board (PCB) component, labeled 'LOCKLY P00725F-01-NR REV:00 20250707', placed on a blue textured surface. The component is positioned next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 25 mm wide and 15 mm high. The component has several gold-colored pads and a small gold-colored component on its surface.</p>
<p style="text-align: center;">Solder Board-Component View 5</p>	 <p>A photograph of a small green printed circuit board (PCB) component, labeled 'LOCKLY P00725F-01-NR REV:00 20250707', placed on a blue textured surface. The component is positioned next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 25 mm wide and 15 mm high. The component has several gold-colored pads, a small gold-colored component, and a white connector with two red and black wires attached to it.</p>

<p>Solder Board-Component View 6</p>	 <p>A photograph of a small green printed circuit board (PCB) component. The component is rectangular and has several small components soldered onto its surface. A white connector with two red and black wires is attached to one end. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component positioned between the 10 mm and 60 mm marks.</p>
<p>Solder Board-Component View 7</p>	 <p>A photograph showing two components. On the left is a black, circular component with a lens-like center. On the right is a silver, rectangular metal component with a circular opening and several small holes. Both components are placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the components positioned between the 10 mm and 100 mm marks.</p>

<p style="text-align: center;">Solder Board-Component View 8</p>	 A photograph showing a circular solder component on a blue textured surface. A black ruler with white markings is placed below the component for scale. The ruler shows markings from 0 to 100 mm. The component is approximately 10 mm in diameter. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom.
<p style="text-align: center;">Solder Board-Component View 9</p>	 A photograph showing a circular solder component on a blue textured surface. A black ruler with white markings is placed below the component for scale. The ruler shows markings from 0 to 100 mm. The component is approximately 10 mm in diameter. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom.

<p style="text-align: center;">Solder Board-Component View 10</p>	 <p>A photograph of a small, irregularly shaped black PCB component. The component has a central white rectangular area and several small components. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements from 0 to 60 mm vertically and 0 to 70 mm horizontally. Text on the component includes 'GA-08', 'SCHS', 'E120764', and 'JANCO'.</p>
<p style="text-align: center;">Solder Board-Component View 11</p>	 <p>A photograph of the same PCB component from a different angle. The component is black with gold-colored solder points. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements from 0 to 60 mm vertically and 0 to 70 mm horizontally. Text on the component includes 'LOCLTY', 'REV.03', and '20210522'.</p>

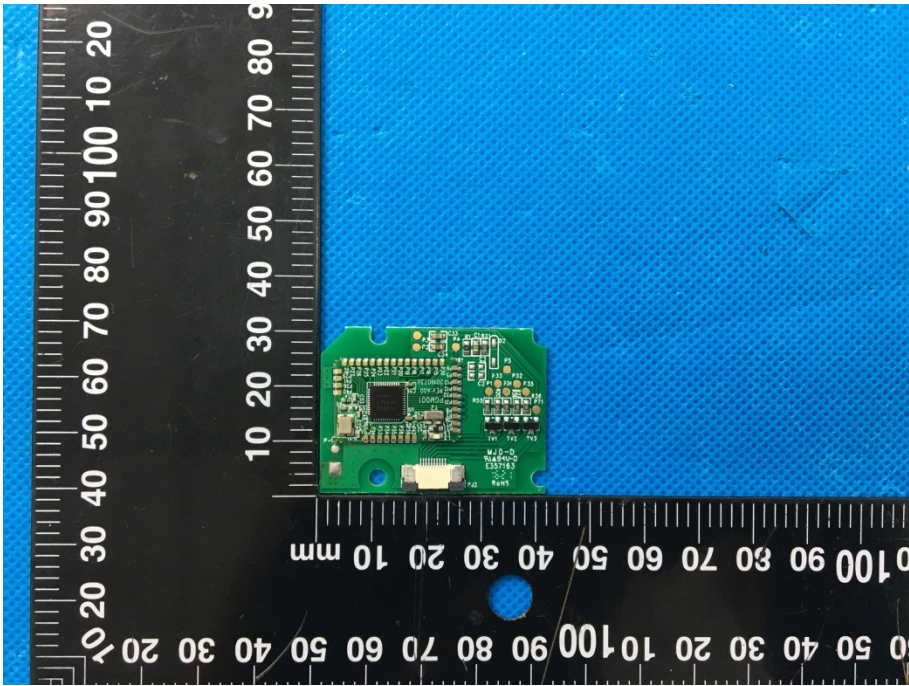

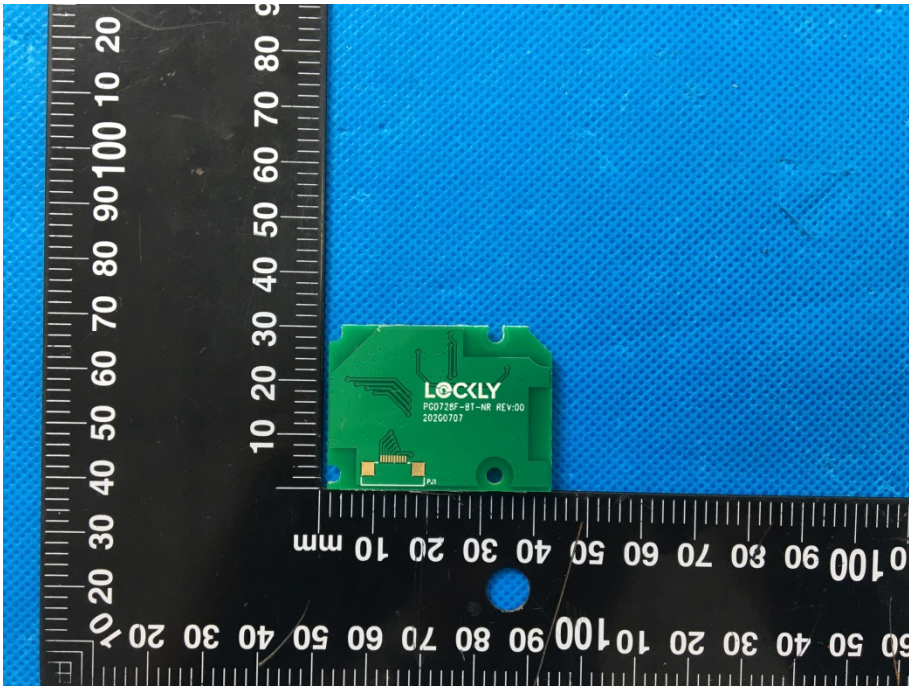

Model: PGD7Y

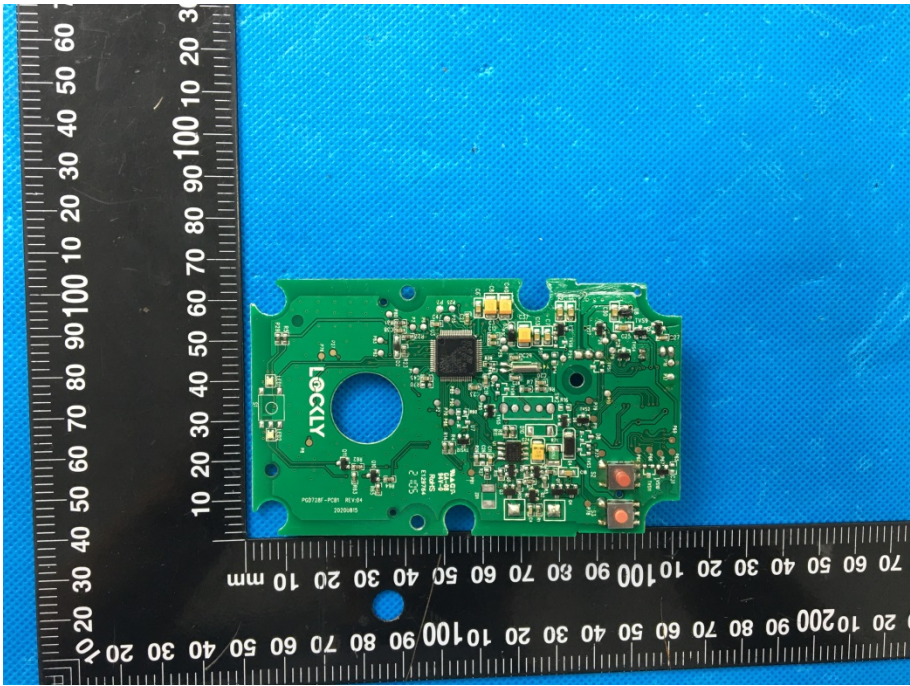

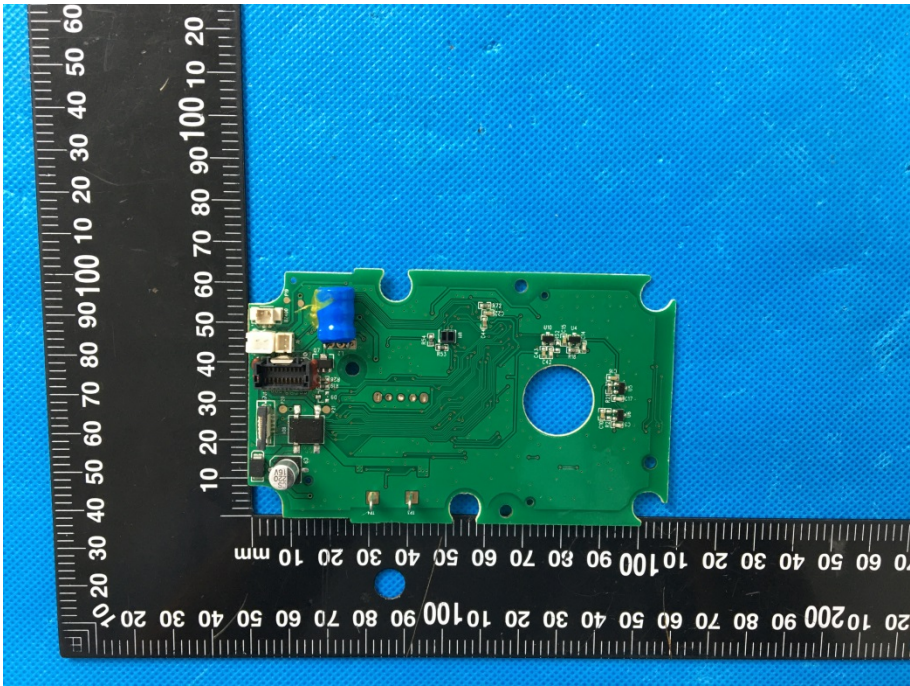

**EUT Housing and Board
View 1**

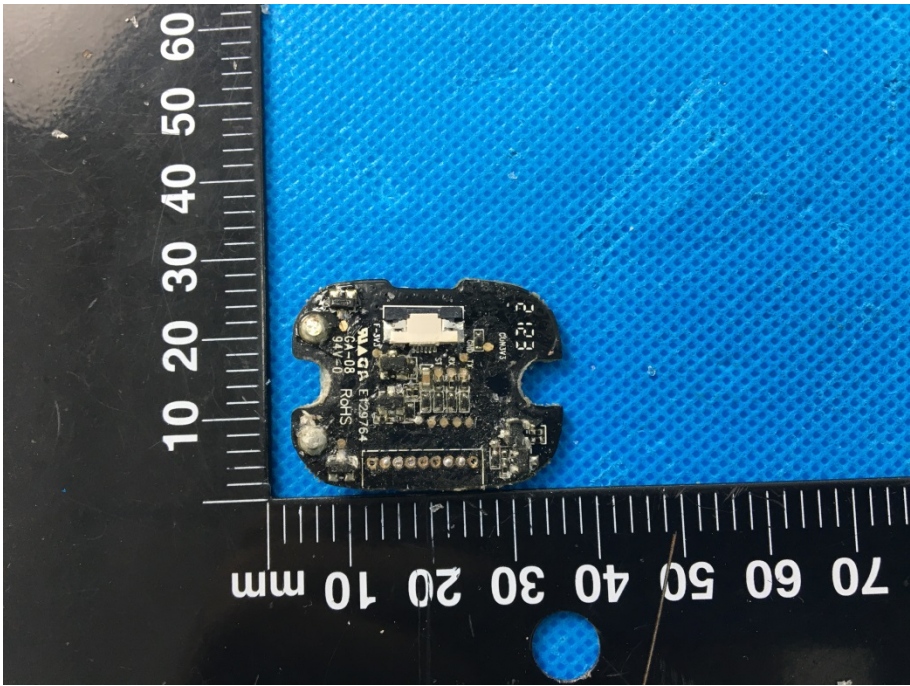

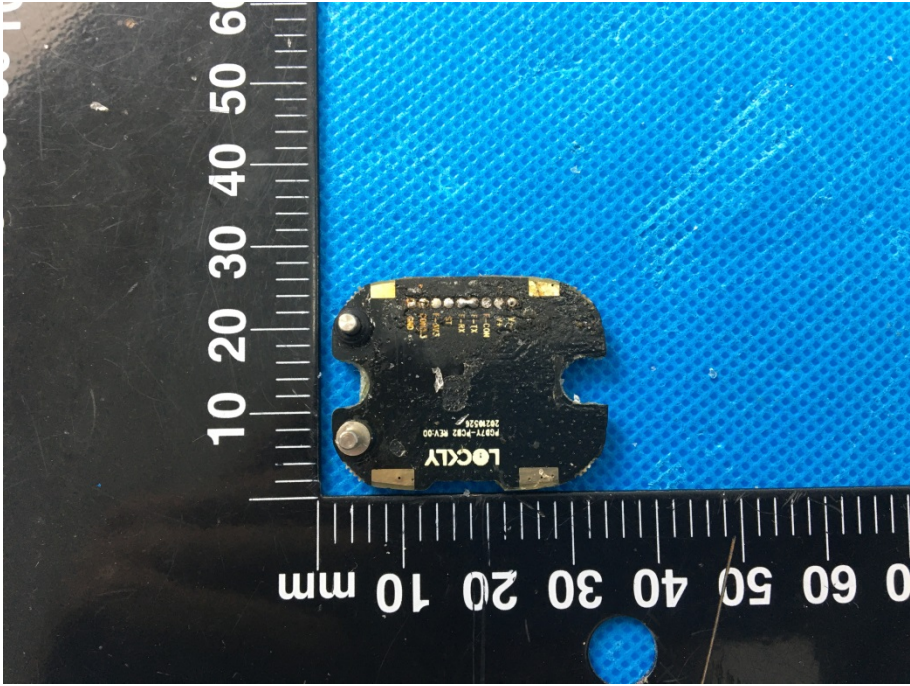

**EUT Housing and Board
View 2**

<p style="text-align: center;">Solder Board-Component View 1</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The component is rectangular and populated with various electronic components, including a central integrated circuit (IC) and several surface-mount components. It is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left and horizontally below the component for scale. The ruler shows measurements in millimeters, with the component's width being approximately 40 mm and its height approximately 25 mm.
<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph of the same green PCB component, labeled 'Solder Board-Component View 2'. This view shows the reverse side of the component, which is mostly blank with some traces and a small component. The text 'LOCKLY' is printed on the board, along with 'PG0728F-B1-NR-REV-00' and '20200707'. It is placed on the same blue textured surface. A black ruler with white markings is positioned vertically to the left and horizontally below the component for scale. The ruler shows measurements in millimeters, with the component's width being approximately 40 mm and its height approximately 25 mm.

<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'LOCKLY', mounted on a blue textured surface. The board is rectangular with a large circular cutout in the center. It is populated with various electronic components, including a large black integrated circuit (IC) in the center, several smaller ICs, resistors, and capacitors. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters. The ruler is oriented vertically in the image, with the 0 mark at the top and the 100 mm mark at the bottom. The board's width is approximately 100 mm.
<p style="text-align: center;">Solder Board-Component View 4</p>	 A photograph of the same green PCB component from a different perspective. The board is oriented vertically, showing its length. It features a large circular cutout and is populated with electronic components, including a blue electrolytic capacitor, a silver capacitor, and various resistors and ICs. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters. The ruler is oriented vertically in the image, with the 0 mark at the top and the 100 mm mark at the bottom. The board's length is approximately 100 mm.

<p style="text-align: center;">Solder Board-Component View 7</p>	 <p>A photograph of a small, irregularly shaped black PCB component. The component has a central white rectangular area and several small components. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements from 0 to 60 mm on the left and 0 to 70 mm on the bottom. The component is approximately 25 mm wide and 15 mm high.</p>
<p style="text-align: center;">Solder Board-Component View 8</p>	 <p>A photograph of the same PCB component from a different angle. The component is black with some gold-colored markings and a central white area. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements from 0 to 60 mm on the left and 0 to 70 mm on the bottom. The component is approximately 25 mm wide and 15 mm high.</p>
