

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Radiation Emission Test Setup (Below 30MHz)

Radiation Emission Test Setup (30MHz to 1GHz)

<p>Radiation Emission Test Setup (1GHz to 18GHz)</p>	A photograph of a radiation emission test chamber. The chamber walls are covered with white, square-shaped pyramidal absorbers. A white, rectangular test fixture is mounted on a white, four-legged stand in the center of the chamber. To the right, a red, curved antenna is visible. The floor is covered with a grey mat and a row of blue, conical absorbers along the edge.
<p>Radiation Emission Test Setup (Above 18GHz)</p>	A photograph of a radiation emission test chamber, similar to the one above. The chamber walls are covered with white, square-shaped pyramidal absorbers. A white, rectangular test fixture is mounted on a white, four-legged stand in the center of the chamber. A blue, flexible antenna is connected to the test fixture. To the right, a blue, flexible antenna is visible. The floor is covered with a grey mat and a row of blue, conical absorbers along the edge.
