

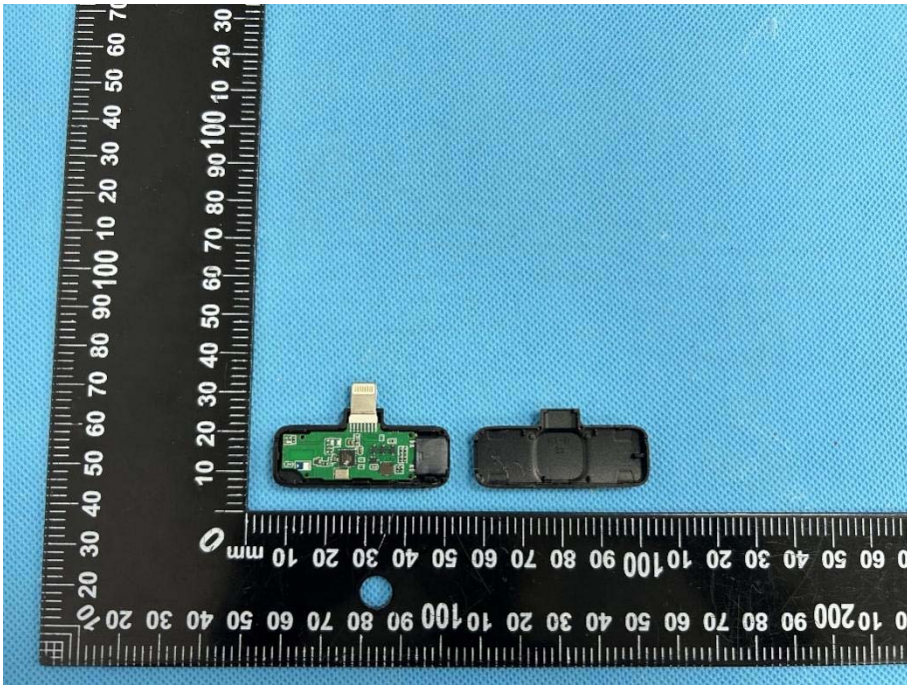

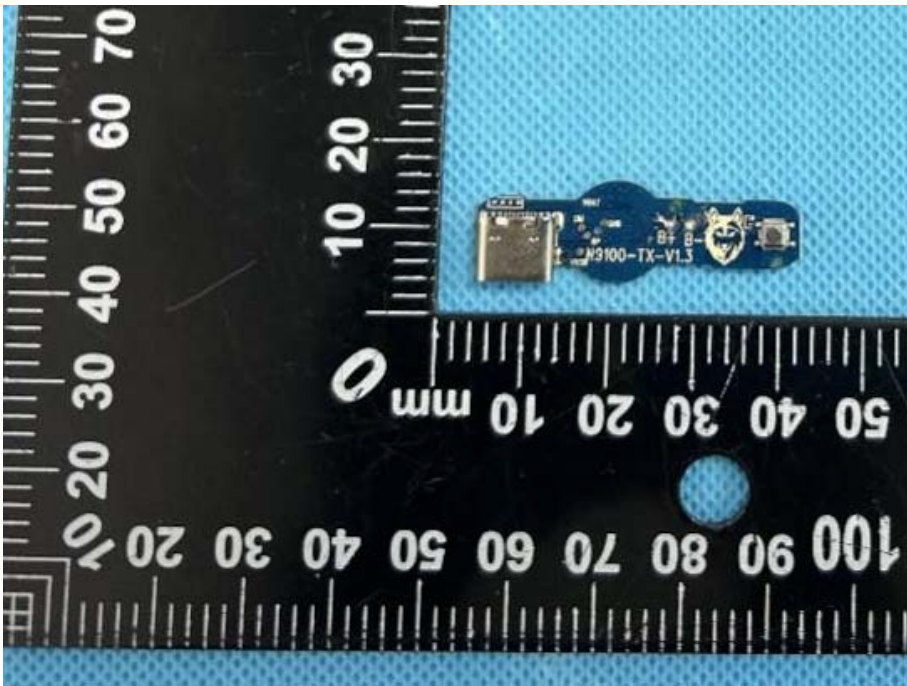

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

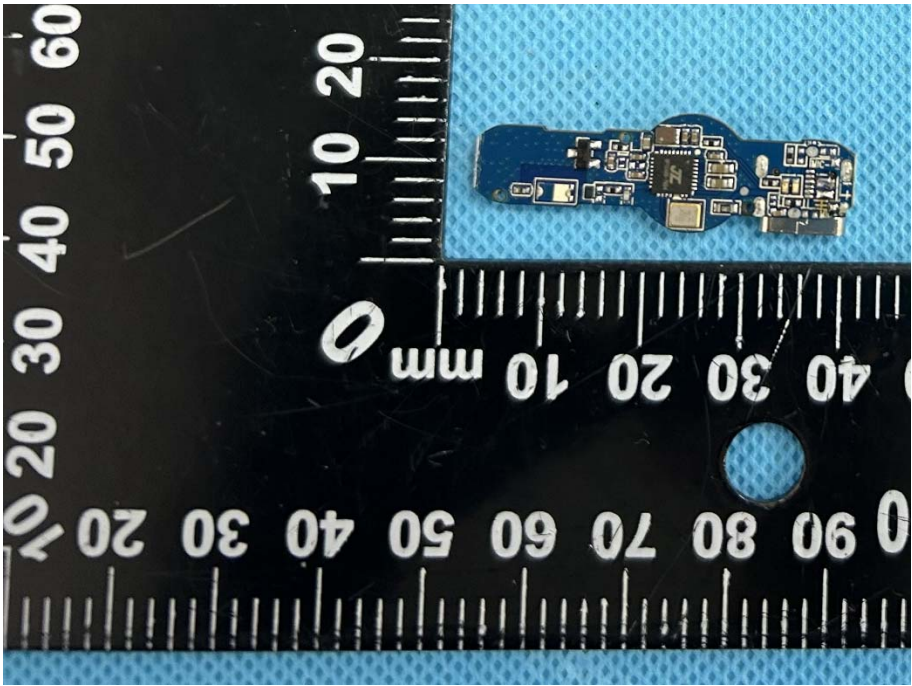

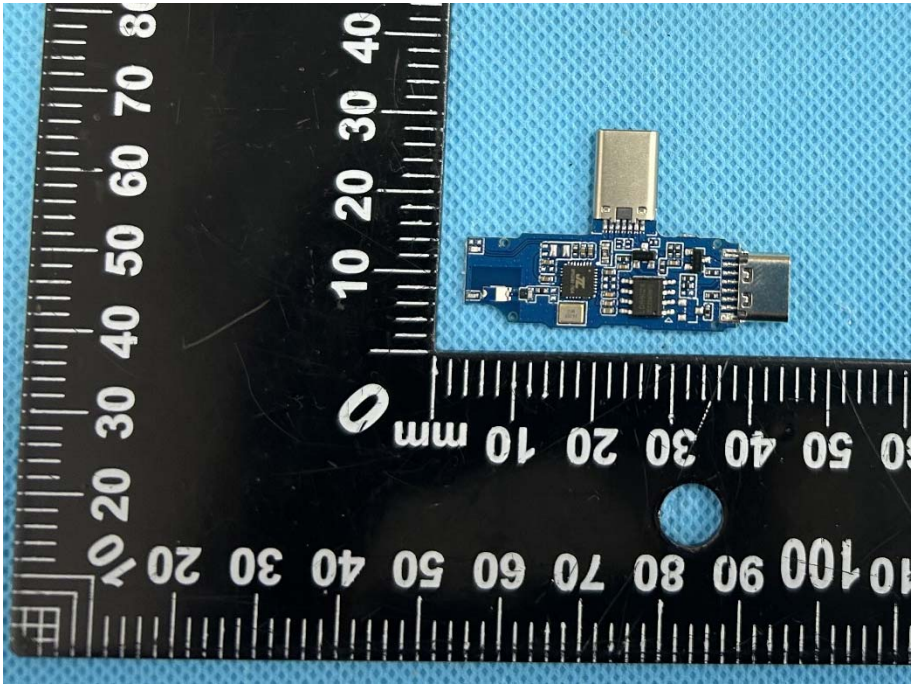

**EUT Housing and
Board View 1**

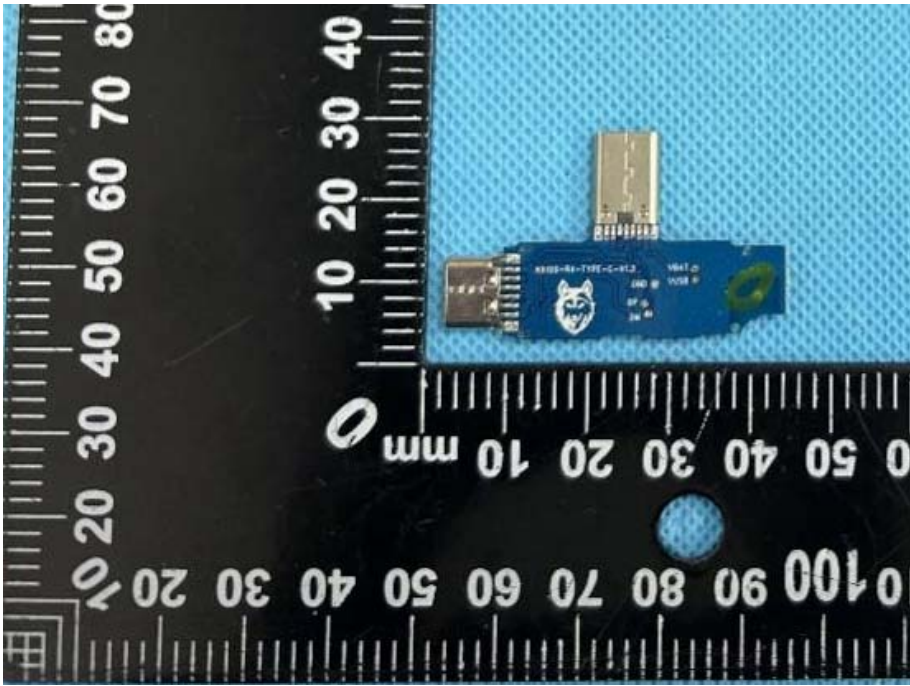

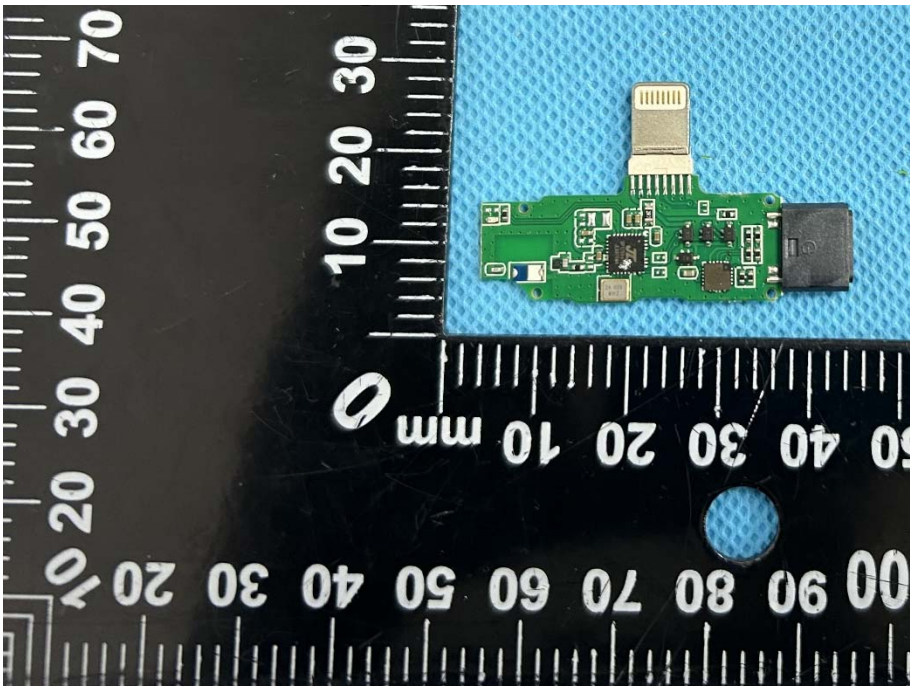

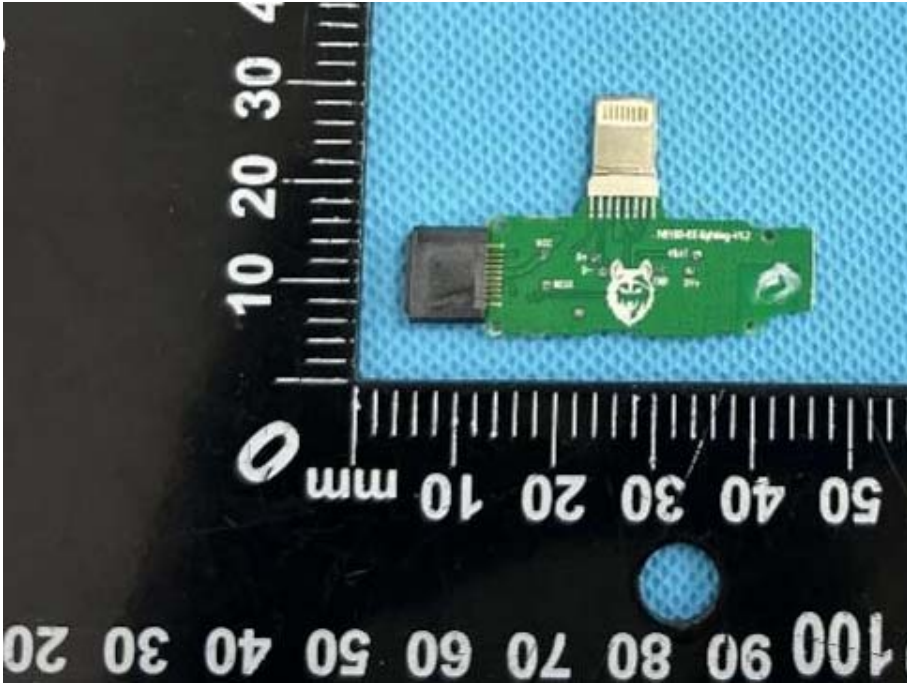

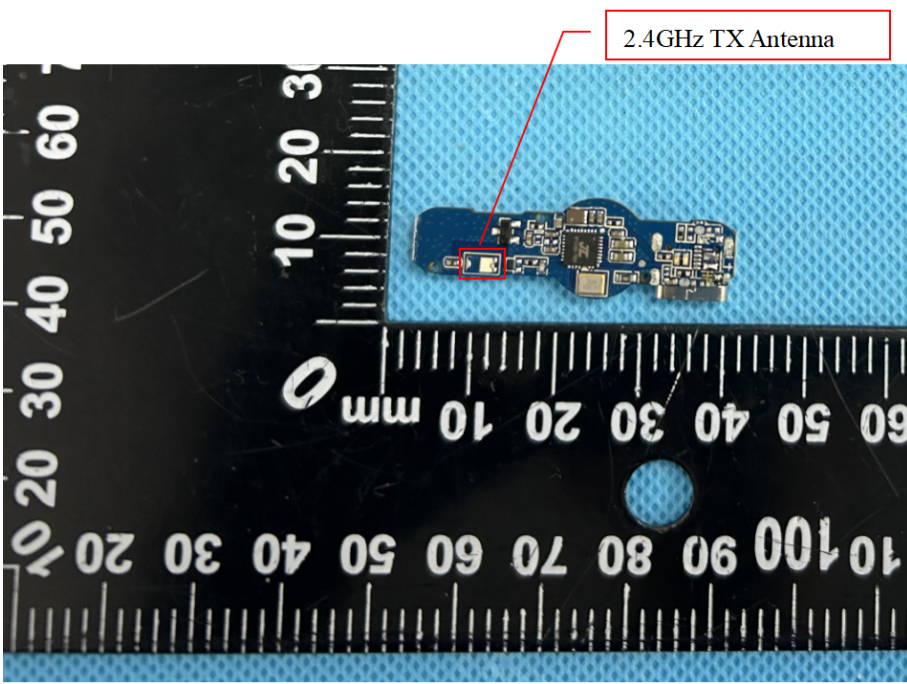

**EUT Housing and
Board View 2**

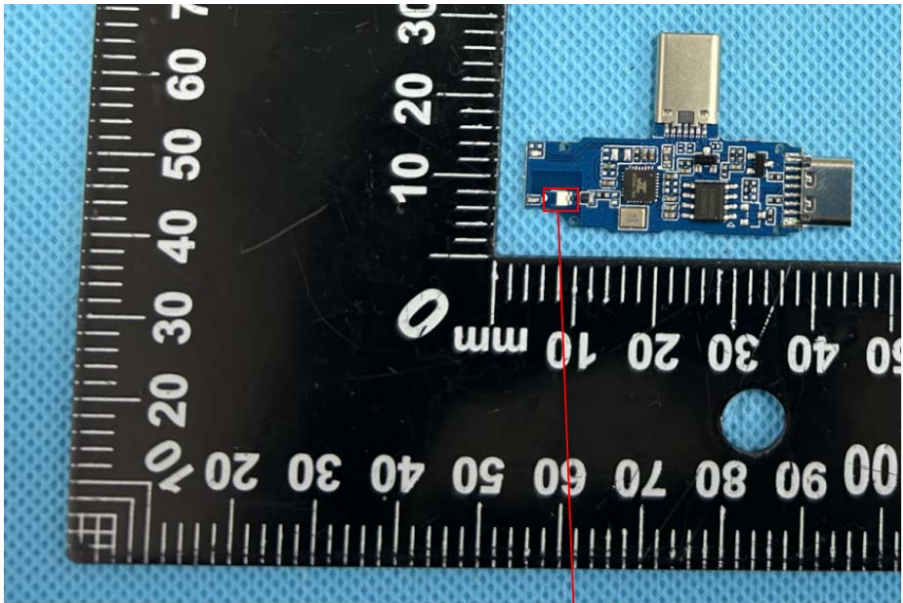

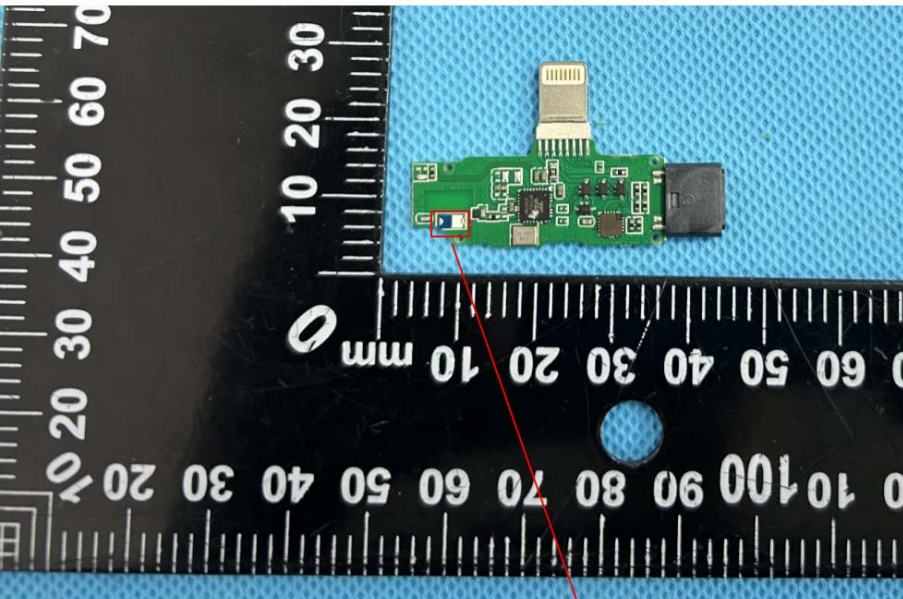

<p>EUT Housing and Board View 3</p>	 A photograph showing two components on a blue textured surface. On the left is a green printed circuit board (PCB) with a gold-plated connector. To its right is a black plastic housing. A black ruler with white markings is placed below the components for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The components are positioned between the 10 mm and 100 mm marks.
<p>Solder Board-Component View 1</p>	 A close-up photograph of a small blue PCB component. The component has a gold-plated connector on the left and various electronic components on the right. A black ruler with white markings is placed below the component for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The component is positioned between the 10 mm and 30 mm marks.

<p>Solder Board-Component View 2</p>	 <p>A photograph of a blue printed circuit board (PCB) component, likely a USB-to-UART bridge, placed on a blue textured surface. The component is positioned horizontally. To its left is a black ruler with white markings, showing millimeter and centimeter scales. The ruler markings are oriented vertically, with the 0 mark at the top and the 100 mark at the bottom. The component's length is approximately 40 mm. The board features various electronic components, including a microcontroller, several resistors, and a USB connector on the right side.</p>
<p>Solder Board-Component View 3</p>	 <p>A photograph of the same blue PCB component from a different perspective. The component is oriented vertically, showing its USB connector at the top and a UART connector at the bottom. The blue textured background and the black ruler with white markings are visible. The ruler markings are oriented horizontally, with the 0 mark on the left and the 100 mark on the right. The component's width is approximately 20 mm. The board features various electronic components, including a microcontroller, several resistors, and a UART connector on the right side.</p>

<p>Solder Board-Component View 4</p>	 A photograph of a blue printed circuit board (PCB) component. The board is rectangular and features a USB-A connector on the left side and a gold-plated USB-B connector on the right side. A small white cat logo is visible on the board. The component is placed on a black surface with a white ruler for scale. The ruler shows markings in millimeters, with the component's length being approximately 40 mm. The background is a blue textured surface.
<p>Solder Board-Component View 5</p>	 A photograph of a green printed circuit board (PCB) component. The board is rectangular and features a USB-A connector on the left side and a gold-plated USB-B connector on the right side. The board is populated with various electronic components, including a microcontroller, capacitors, and resistors. The component is placed on a black surface with a white ruler for scale. The ruler shows markings in millimeters, with the component's length being approximately 40 mm. The background is a blue textured surface.

<p>Solder Board-Component View 6</p>	 <p>A photograph of a green printed circuit board (PCB) component, likely a solder board, placed on a blue textured surface. The component features a gold-plated connector on the right side and a black component on the left. A white circular logo is visible on the board. A black ruler with white markings is positioned below the component, showing measurements in millimeters. The ruler markings are oriented vertically, with 0, 10, 20, 30, 40, 50, and 60 mm visible.</p>
<p>Antenna View 1</p>	 <p>A photograph of a blue PCB component, identified as a 2.4GHz TX Antenna, placed on a blue textured surface. The component is a complex circuit board with various components and traces. A red box highlights a specific area on the board, and a red line points from a text label to this box. The text label is "2.4GHz TX Antenna". A black ruler with white markings is positioned below the component, showing measurements in millimeters. The ruler markings are oriented vertically, with 0, 10, 20, 30, 40, 50, and 60 mm visible.</p>

<p>Antenna View 2</p>	 <p>2.4GHz RX Antenna</p>
<p>Antenna View 3</p>	 <p>2.4GHz RX Antenna</p>
