Subject: Request to grant dismissal for FCC ID: 2ASK6-FXB101

To Whom It May Concern,

Please grant a dismissal for FCC ID: 2ASK6-FXB101 because the device is not suitable for mass production and will never be manufactured for the following reasons:

1. The reset button on the device that is connected to the microcontroller produces unexpected results when the button is pressed. The remedy for this reset behavior would require a redesign of the printed circuit board.
2. The contact pads for connecting the programmer to the printed circuit board are not adequate for mass production requiring a redesign of the pad layout on the printed circuit board.

Hereby acknowledge and confirm that FCC ID: 2ASK6-FXB101 will not be going to market, and that no production of 2ASK6-FXB101 will ever take place and that FCC ID: 2ASK6-FXB101 has never been marketed or sold anywhere in the world including the United States.

Yours Sincerely,

Simon Namikas
