Wireless Digital Terminal S611 Series
User Manual

Product Overview

-1-

Packing list

Host x1	USB cable x1
User Manual x1	Lanyard x1

-2-

Power on/off

Power on: Press and hold the power key for three seconds until the screen displays the startup screen.
Power off: Press and hold the power key for three seconds to bring up a dialog box and select "Shutdown". If abnormal, please press and hold the power button for ten seconds and reboot.

Charging

The indicator light changes from red to orange when charging and turns green when fully charged.
It is normal that the battery will have slight heat during charging. After the battery is fully charged, disconnect the charger from the AC power and then disconnect the product.

Warning

※Use of an unapproved or incompatible power supply or charger may cause fire, explosion or other hazards.
※Use only accessories approved by the device manufacturer that are compatible with this model. Use of other types of accessories may violate the warranty of this device and may result in a safety incident.

-3-

※Any kind of battery short circuit may cause serious consequences such as explosion, fire or personal injury!

CAUTION

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS

Disposal

The equipment must be returned to a collection point for electronic equipment waste disposal. Defective batteries must be returned to a collection point for chemical waste disposal.
The company will not bear any responsibility for the consequences of non-compliance with the above suggestions or improper use.
If the content described in this manual does not match your product, please take the product as the standard. We reserve the right to modify the contents of this manual at any time without prior notice. We extend our apology for the inconvenience!

Safety Statement

In order to use your wireless digital terminal safely and effectively, please read the following information before use:
※The product's ambient temperature for use is:

-4-

反面

-10~60 ° C. Avoid using the product in environments where the temperature is too high or too low.
※Turn off the machine at chemical plants, gas stations, and other places that are prone to explosion.
※Use caution when using this product near pacemakers, hearing aids, and other medical electronics. It may interfere with these devices.
※To avoid demagnetization, keep this product away from magnetic materials such as floppy disks, credit cards, etc.
※Avoid exposing the product to strong sunlight or high humidity.
※This product has a camera and recording function, please follow the relevant laws and regulations.
※Do not store this product near water heaters, microwave ovens or high-pressure vessels.
※Do not disassemble, modify, or repair this product.

Restrictions

This device is restricted to use and put into service due to the need for a spectrum license and/or the conditions attached to authorization for the use of frequencies within all European Union countries (BE/BG/CZ/DK/DE/EE/IE/EL/ES/FR/HR/IT/CY/LV/LT/LU/HU/MT/NL/AT/PL/PT/RO/SI/SK/FI/US/UK).

Disclaimer

ed by copyright, patents, trademarks and other intellectual property rights.
In any case (including negligence), any direct or indirect, incidental, special or consequential loss or damages, attorneys' fees, various expenses or any other losses arising therefrom, from any content or service provided by the product or the company does not warrant the accuracy, validity, timeliness, legality or completeness of damages, or the results of any information contained in or connected with any content or services used by you or any third party.
For any unauthorized third-party applications downloaded or installed on the product by the user himself or uploaded or downloaded by any third-party applications, including incompatible software and products installed, Neusoft Corporation does not bear any responsibility for legality, quality or any other aspects, and the user bears the relevant risks. Any liability or damage caused by using this product in a manner not consistent with the intended use of the product and the use described in the user manual is at the user's own risk.

FCC Compliance

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

-6-

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

Health and safety information
Radio Frequency (RF) Energy
This model phone meets the government's requirements for exposure to radio waves.

-7-

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.
The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.
The highest SAR value for the model phone as reported to the FCC when tested for use at the ear is 0.463W/kg and when worn on the body, as described in this user guide, is 1.277W/kg (Body-worn measurements differ among phone models, depending upon available enhancements and FCC requirements).
While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

-8-

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: 2ASMA-S611.
For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1 cm from the body. Use of other enhancements may not ensure compliance with FCC RF exposure Guidelines. If you do not use a body worn accessory and are not holding the phone at the ear, position the handset a minimum of 1cm from your body when the phone is switched on.
