

## Product Overview

### **Power on/off**

Power on: Press and hold the power key for three seconds until the screen displays the startup screen.

Power off: Press and hold the power key for three seconds to bring up a dialog box and select "Shutdown".

If abnormal, please press and hold the power button for ten seconds and reboot.

### **Charging**

The indicator light changes from red to orange when charging and turns green when fully charged.

It is normal that the battery will have slight heat during charging. After the battery is fully charged, disconnect the charger from the AC power and then disconnect the product.

### **Warning:**

- Use of an unapproved or incompatible power supply or charger may cause fire, explosion or other hazards.
- Use only accessories approved by the device manufacturer that are compatible with this model. Use of other types of accessories may violate the warranty of this device and may result in a safety incident.

**To prevent possible hearing damage,  
do not listen at high volume levels for long periods.**

- Charging must be performed in a well-ventilated and well-discharged environment, away from flammable and explosive materials.
- Do not remove or replace the battery, otherwise it may damage the product and cause danger.
- Any kind of battery short circuit may cause serious consequences such as explosion, fire or personal injury!

**CAUTION**  
**RISK OF EXPLOSION IF BATTERY IS REPLACED**  
**BY AN INCORRECT TYPE**  
**DISPOSE OF USED BATTERIES ACCORDING**  
**TO THE INSTRUCTIONS**

### **Safety statement**

In order to use your wireless digital terminal safely and effectively, please read the following information before use:

- The product's ambient temperature for use is: -10~60°C. Avoid using the product in environments where the temperature is too high or too low.
- Turn off the machine at chemical plants, gas stations, and other places that are prone to

explosion.

- Use caution when using this product near pacemakers, hearing aids, and other medical electronics. It may interfere with these devices.
- To avoid demagnetization, keep this product away from magnetic materials such as floppy disks, credit cards, etc.
- Avoid exposing the product to strong sunlight or high humidity.
- This product has a camera and recording function, please follow the relevant laws and regulations.
- Do not store this product near water heaters, microwave ovens or high-pressure vessels.
- Do not disassemble, modify, or repair this product.

### **Disposal**

The equipment must be returned to a collection point for electronic equipment waste disposal. Defective batteries must be returned to a collection point for chemical waste disposal.

The company will not bear any responsibility for the consequences of non-compliance with the above suggestions or improper use.

If the content described in this manual does not match your product, please take the product as the standard.

We reserve the right to modify the contents of this manual at any time without prior notice. We extend our apology for the inconvenience!

### **Packing list**

- Host x1
- USB cable x1
- User Manual x1
- Lanyard x1

### **Disclaimer**

Users should understand that all content and services available through this product are third parties and protected by copyright, patents, trademarks and other intellectual property rights.

In any case (including negligence), any direct or indirect, incidental, special or consequential loss or damages, attorneys' fees, various expenses or any other losses arising therefrom, from any content or service provided by the product or the company does not warrant the accuracy, validity, timeliness, legality or completeness of damages, or the results of any information contained in or connected with any content or services used by you or any third party.

For any unauthorized third-party applications downloaded or installed on the product by the user

himself or uploaded or downloaded by any third-party applications, including incompatible software and products installed, Neusoft Corporation does not bear any responsibility for legality, quality or any other aspects, and the user bears the relevant risks. Any liability or damage caused by using this product in a manner not consistent with the intended use of the product and the use described in the user manual is at the user's own risk.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**NOTE:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

**SAR Information Statement**

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. \* Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is **0.246W/Kg** and when worn on the body, as described in this user guide, is **1.457W/Kg**(Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). The maximum scaled SAR in hotspot mode is **1.457W/Kg**. While there may be differences between the SAR levels of various phones and at

various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on

FCC ID: 2ASMA-S611G Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at

<http://www.wow-com.com>. \* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

### **Body-worn Operation**

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of **10mm** must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

Operations in the 5.15-5.25GHz Band are restricted to indoor usage only.
