

## Basic Instructions

- The buttons on the body are the supplementary buttons to be used in case of emergency and thus water pressure adjustment and dry temperature adjustment are not allowed. To use the adjustment function, press the corresponding buttons on the remote control again and use the adjustment button.
- Do not drop it, spill on it. It will cause damage and problems.

### 1 Sit on the seat

- Sit in center.
- If seat sensor is occupied, 'beep' sounds.
- If the seat is occupied, Rim nozzle on the ceramic discharges water for 2 seconds to wet the surface of toilet bowl (Pre-mist feature)

### 2 Press the "REAR WASH" or "FRONT WASH" button

- Operate either the "REAR WASH" or the "FRONT WASH" function. Each function operates for 90 seconds.
- It beeps if cleansing or bidet cleansing function is over.

### 3 Press the "DRY" button

- Dryer function will operate for 3 minutes.
- It beeps if dryer function is over.
- Drying operation can be maximized by gently wiping wet area with toilet paper.

### 4 Press the "STOP" button

- Once the STOP button is pressed, the wash and/or dry functions will cease and the nozzle will return to its resting position.

- When sitting on the seat, sit in the center so that seat sensor can operate well. (If seat sensor is not sensed, the function of Rear Wash, Front Wash, Dry does not operate.)
- The seat sensor of this product is located inside the seat. If the skin of human body touches this seat sensor, the sensor operates. If the seat surface is covered with a cover, the skin does not touch the sensor, and thus the sensor may not operate.

## Functions & Operation

### Oscillating Wash
