## HW Similarity Declaration

ELOshield Verification Module

FCC ID: 2ASP7-VERIFM-V01

FRN No: 0028314623

ELOKON GmbH declares that the internal PCB for radio communication in both the verification module and the antenna module are 100% electrically identical, only a different casing is placed around the PCB.

The FW settings are the same and under these conditions the results of RF tests for the antenna module can be reused for Verification Module.
