# Full Circle

## WELCOME MESSAGE FROM AMPERE

Thank you for purchasing Full Circle. Full Circle is, quite simply, the best true wireless power bank on the market today. When we say “true wireless”, we mean that you can use Full Circle with no wireless, AT ALL. Simply place Full Circle on your favorite wireless charger to power it up (perhaps Unravel... cough cough). And, when you’re on-the-go, place your device on Full Circle for a no-fuss charging experience. We are leveraging state-of-the-art wireless charging technology for the fastest, most consistent wireless charging on the market today. And, we designed Full Circle to work in conjunction with the Side Pocket fanny pack. So, if you purchased Full Circle on its own, we encourage you to check out Side Pocket on our site.

Follow our quick start guide for use instructions and please reach out to us if you have any questions or comments. We love hearing from you.

Founders,

AMPERE™

## Getting Started

### Charging Full Circle

Unravel plugged in with Full Circle on top of unravel, it will charge wirelessly, just like a phone

When you receive Full Circle, it will be approximately 25% charged. So, the first thing you should do is power it up. You can charge Full Circle with either a USB-C cable or by placing it on a Qi-enabled wireless charger. Ampere wireless chargers have been designed to charge Full Circle at the fastest possible speeds. When all the LEDs are illuminated, Full Circle is 100% charged, and you are good to go.

## Using Full Circle to Power Your Devices

### Wireless Charging

Ensure that your device is Qi-enabled before attempting to wireless charge any devices. Align the charging receiver on your device with the center of Full Circle on the center of the circle. Full Circle is designed to work with your device in both horizontal and vertical alignments to work as a phone stand on the table or to secure your phone in place while on the go. Gently pull each of the four elastic bands over the corners of your phone to hold it in place.

## Notes on Wireless Charging

- To begin charging, press the power button. If you remove your device then place it back on Full Circle within 10 minutes, it will charge automatically. After ten minutes, you will need to press the button to begin charging again.
- You can wirelessly charge and discharge at the same time. Place Full Circle on a wireless charger and your device on Full Circle. (Note: The power needs to be at least 20% and the USB-A and USB-C ports will not work)
- You can wirelessly charge a device at the same time as using the wired output. However, when using both, the wired output will take priority and the wireless charging may slow down.
- When charging Full Circle via the USB-C port, you can use both the USB-A output and the wireless charging output.
- You cannot use charge Full Circle using the wired USB-C input and the wireless input at the same time. In this circumstance, the wired USB-C input will take priority.

## Wired Charging

You can also charge your wired-charging device using Full Circle's USB-A or USB-C output ports. Simply plug in your device to charge -- when charging with the ports, charging will start automatically. When your device is fully charged, the charging will stop automatically. To turn off charging, press the power button once.

## Notes on Wired Charging

- When using USB-A only, the power will be MAX 5V/3A
- When using the USB-C only, the power will be PD 18W
- The USB-A port and the USB-C port share a 5V/3.4A output -- Full Circle will intelligently determine the power allocation.
- You cannot use the USB-A port while wirelessly charging Full Circle and wirelessly charging a device on full circle.

## LED Indicator Screen & Power Button

- Press the power button to turn on wireless charging
- Hold the power button for three seconds to turn off all charging
- Press the power button to show battery level for 5 seconds

Each light is an indicator of 25% of battery light:

## When Charging Full Circle

- When the battery capacity is 0-25%, only the 1st LED is blinking.
- When the battery capacity is 26-50%, the 1st LED is lit and the 2nd LED is blinking.
- When the battery capacity is 51-75%, the 1st and 2nd LEDs are lit and the 3rd LED is blinking.
- When the battery capacity is 76-99%, the 1st, 2nd and 3rd LEDs are lit and the 4th LED is blinking.
- When the battery is 100% fully charged, all the LEDs will normally on.

## Wireless Charging Indicator

1. While wireless charging the green light will stay illuminated
2. When a device is fully charged the green light will turn off
3. The light will flash green if there is a problem with wireless charging

## Using Full Circle with Side Pocket

Insert Full Circle Power Bank into the power bank pocket and zipper closed. Make sure the Full Circle wireless output (the side with the circle) is facing the front of the bag so the back of the phone pocket aligns with the front of Full Circle.

To keep the temperature lower, we recommend opening the bottom pocket to promote airflow around the power bank.

## Other Information and Features

Overcharge Protection  
Short Circuit Protection  
Temperature protection  
Foreign Object Detection (wireless output)

To reset, allow Full Circle to discharge completely then re-charge fully using the wired the USB-C port.

Standby Current  $\leq 200\mu\text{A}$  (Vbat = 3.7V)  
Certifications: CE, FCC, ROHS

Temperature range for operation: 0°C - 35°C  
Temperature range for storage: -10°C - 60°C

Charging Time:  $\leq 5\text{H}$  @ 15W Input or  $\leq 8\text{H}$  @ 10W Input  
Efficiency: 75+% @ 10W Output  
Effective Charging Area D:  $\geq 20\text{mm}$   
Effective Charging Distance: 8mm

## Warnings

- Read all instructions and warnings prior to using this product. Improper use of this product may result in product damage, excess heat, toxic fumes, fire or explosion, for which damages you ("Purchaser"), and not Ampere ("Manufacturer") are responsible.
- Do not store/use the device in high-temperature environment, including heat caused by intense sunlight or other forms of heat.
- Do not disassemble this device or attempt to re-purpose or modify it in any manner.
- Use with only certified Type-C PD adapters.
- Full Circle is designed for personal use only. It is not suitable for commercial applications.
- Remove all foreign metal objects from your device before using on Full Circle.
- If this device is used by a minor, it is the sole responsibility of the purchasing adult to provide supervision, instructions, and warnings. The purchaser agrees to hold the Manufacturer harmless for any claims/damages resulting from misuse by a minor.
- Products have undergone rigorous quality assurance inspections. If the device is excessively hot, is emitting odor, is deformed, or is experiencing or demonstrating an abnormal phenomenon, immediately stop all product use and contact Manufacturer.

## Legal

This product is meant for use only in conjunction with the appropriate devices. Please consult your device packaging to determine whether this product is compatible with your particular device. Manufacturer is not responsible for any damages to any device incurred through the use of this product. Manufacturer shall not in any way be liable to you or to any third party for any damages you or any third party may suffer as a result of use, intended or unintended, or misuse of this product in conjunction with any device or accessory other than the appropriate device for which this product is designed. Manufacturer will not be responsible for any damages you or any third party may suffer as a result of use of this product as outlined above. Purchaser agrees to defend, indemnify, and hold Manufacturer harmless for any claims or damages arising from unintended use or misuse, including use with an unintended device.

## FCC Information

This device complies with Part 15 of the FCC Rules. Operation of this product is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Warning: Changes or modifications not expressly approved by the party responsible for compliance with the FCC Rules could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body
