

The REIGN Wireless Safety Edge Kit is a revolutionary product that will make any safety edge set up wireless. This kit allows for all major safety edge technology to work with any manufacturers operator. By using the proprietary Reign wireless technology we get extreme range and penetration from the most reliable wireless edge kit on the market.

WHAT'S INCLUDED

There are two pieces that complete the wireless edge kit. This kit includes the transmitter, which is connected to the safety edge, part number XET-100. The second component of the kit is the receiver, which is connected to the operator, part number XER-100.

HOW IT WORKS...

Congratulations on your purchase of the Transmitter Solutions Wireless Safety Edge Kit. It has been designed with state-of-the-art radio technology to allow for extreme range and penetration allowing for maximum reliability.

The wireless safety edge kit comes factory paired with all the necessary components to get the system up and running quickly. Simply install the batteries to the XET-100 and supply 8-24 VAC/DC power to the XER-100 and you will be up and running.

1. FCC REGULATORY STATEMENT

FCC ID: (2ASPOXET100) and (2ASPOXER100): This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT! Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a

residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

FCC Caution: To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example – use only shielded interface cables when connecting to computer or peripheral devices).
