

<p style="text-align: center;">Solder Board-Component View 6</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 6'. The board is rectangular and features a large, light-colored rectangular area on its top half, which appears to be a solder mask or a specific component. The bottom half of the board is populated with various electronic components, including several integrated circuits (chips), resistors, and capacitors. A black ribbon cable is connected to the top edge of the board. The board is placed on a blue textured surface, and a black ruler with white markings is visible on the left and bottom edges for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm.
<p style="text-align: center;">Solder Board-Component View 7</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 7'. This board is more densely populated with electronic components than the one in View 6. It features a large central chip, several smaller chips, and numerous surface-mount components. A black ribbon cable is connected to the top edge, and a red and black wire is connected to the right side. The board is placed on a blue textured surface, and a black ruler with white markings is visible on the left and bottom edges for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm.

<p style="text-align: center;">Solder Board-Component View 8</p>	 A photograph of a green printed circuit board (PCB) with various electronic components. A white component is mounted on the right side. A ruler is placed vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board is set against a blue textured background.
<p style="text-align: center;">Solder Board-Component View 9</p>	 A close-up photograph of the green PCB, focusing on the central and right-hand sections. It shows a large black integrated circuit (IC) with a circular cutout, several smaller ICs, and various passive components like resistors and capacitors. The board is set against a blue textured background.
