WiFi Smart Converter User Manual

Function Key and Indicator Description

Short press the power button, red indicator lights up means power on, red indicator becomes blue which means power off.

Short press the power button for about 5 seconds, blue indicator flashes rapidly (2 times/ per second) means the product begin enter into EZ(rapidly blink) mode.

Press 5s more in EZ mode, it will enter AP (Slowly blink) mode.

Blue indicator flashes slowly means the network connection is abnormal, please check the router or network configuration.

Technical Parameters

Maximum current: 10A

Rated voltage: 85-240V

Rated power: 2200W

Input voltage: 110-220V

Wireless Type: Wi-Fi 2.4GHz

Operating temperature: -10℃ - 60 ℃

Support system: Android \IOS

Turn On Intelligence

Use your phone to scan the QR code below or search "smart life" in application market to download and install the App

Step 1: Registration and login "smart life" APP.

If you don't have the account of "Smart life" APP, register an account or sign in with cellphone number + verification code. This page describes the Registration process.

1.Tap"Register"in the upper blank (pic 1)

2. The system automatically determines your country / area. You can also select your

country code by yourself. Enter the cellphone number/E-mail and tap "Next" (pic 2) 3. If you enter the mobile cellphone number, enter the verification code in the message (pic 3), and enter the password, tap"Confirm" to finish your registration. 4. If you enter the E-mail, enter the password (pic 4), tap" Confirm" to finish your registration.

Make sure your phone is connected to WiFi in your home. Click "+" in the upper right corner of the homepage and select "Electrical outlet" from the device type.

8. Now you can control these devices using Google Home. Take the bedroom light as an example, the supported voice are commanded as below:

Ok,google, turn on the bedroom light.

OK,google, brighten the bedroom light.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance

could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -- Reorient or relocate the receiving antenna.
- -- Increase the separation between the equipment and receiver.
- -- Connect the equipment into an outlet on a circuit different

from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.

FCCID: 2ASTM-TP
