10. FAQ

Under normal operating conditions, if there are problems with the device, please refer to the following methods to solve.

Cannot take picture and record

Please check whether there is enough space for of TF card, or if it is locked.

Stopping automatically while recording

Due to the huge amount of HD video data, please use high-speed C10 TF card with SDHC compatible, there will be the mark of C10 on the TF card.

There is "wrong file" shown on LCD when replay the photo/video

Uncompleted files because of TF card storage error, please format your TF card.

Fuzzy image

Please check whether the lens stays with dirt, fingerprints, if so , please clean it before shooting.

Horizontal stripes interference in the image,

This is due to the wrong setting of light frequency error, please set the frequency 60HZ or 50HZ according to the local power supply.

Hang off

Please reset to recover when device hangs off.

Common Troubleshooting

Tips: This system max supports **128GB** TF card in storage, in order to ensure recording normally, please use good quality card, such as Kingston, SanDisk, Samsung and so on. Since the recording system has to read and write data fast, please use the Class 10 high-speed card. While the system is working, please do not insert or pull out the TF card, in case of damaging the card.

1. Dash cam do not power on after car engine start: Please check whether the power connection is good.
2. It can't record a normal video after the boot : Please check whether TF card inserted , or you need to format the TF card once; If TF card is damaged, please insert new card.
3. It crashes and other abnormal case: please press the RESET button to reset dash cam.
4. Video blur: Please check whether lens is clean, please wipe the lens and front windshield!
5. Press the power button can't boot: Please check the connection and power.
- 6.App picture is not smooth or can't be achieved: try to keep the number of background software less in your mobile phone, or keep the phone near the dash cam; or close APP and restart.

Disclaimer

Dash Cam is the recorder device of video, audio and other related information for vehicle on the road, its files are only as auxiliary reference for accident.

Special version: The device must records files under normal recording status.

But in the following situation, it will lead to files to be damaged or lost;

1. If you pull out the TF card in the recording status, final video files will be damaged or lost.
2. If there is illegal blackout in the recording status, final video files will be damaged or lost.
3. If there is a destructive collision in the recording status, video and audio files will be damaged or lost.
4. If there is a destructive collision in the recording status so that Memory card is loose, video and audio files will be damaged or lost.

The audio and video of car camcorder is only for a reference, we don't take any responsibility due to data-loss under the abnormal circumstances.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

The distance between user and products should be no less than 20cm
