Install WiFi APP on phone

A.Android system mobile phone

Open the “Google Play Store” to search “AZDOME” or scan the QR barcode to download.

After the installation is completed, if you want "AZDOME" access to cell phone photos, please click "OK" (Note: you must select "OK", otherwise you can't preview the pictures download by APP).

Open the phone WiFi settings, search the WiFi Hotspot, search the dash cam's WiFi, the name GS63H....., enter the password: 12345678.

B.IOS system Apple phone.

Open the "Apple Store" to search "AZDOME" or scan the QR barcode to download.

After the installation is completed, if you want "LuckyCam" access to cell phone photos, please click "OK" (Note: you must select "OK", otherwise you can not preview the pictures download by APP). Open the phone WiFi settings, search the WiFi Hot-spot,search the dash cam's WiFi, the name GS63H....., enter the password: 12345678.

NOTE:You can change the WiFi password in LuckyCam APP.

GPS Player Installation and Instruction

NOTE: when recording, dash cam screen don' t show the longitude and latitude data、 speed.

If you want to see your longitude and latitude data、 speed(MPH or KM/H), you can playback your video in the dash cam(function of "GPS Stamp" is on) or download the "Car DV Player" to play video file:

1. Please go to the website <http://www.azdome.hk/downloads.html>, you can find the file in the Page.
2. You can e-mail us to service@azdome.hk or you can also like our Facebook Page to get the installation file.

Using the AZDOME GPS Player

1. Please open the Car DV Player and install it for the first use.
2. Click File –Open to choose the file which you want to play, click to start play.

If the Google Map can't be normally loaded by GPS Player, please try the following operations:

1. Run GPS Player as the administrator (right click on the GPS Player, then choose running as the Administrator)
2. Upgrade the Internet Explorer to IE 10 or above
3. If the GPS player still can't work, please contact us at service@azdome.hk

FAQ

Q1: What should I do with the AZDOME dash cam firstly?

Please format your Micro SD/TF Card in dash cam: ① On the Video Mode, Please press button "M" for twice; ② Then press button down "v" for 11 times and select "Format". ③ Select "OK" and press button "OK".

Q2: How to change the right Timezone and date?

Please go to camera's system settings > Time Zone Setting > Set your correct GMT value > Set your time > OK to confirm

Please press button "M" for twice, select "Timezone Setting" press button "OK" and select your Timezone. And select "Date/Time", change the right time.

Note: Don't forget press button "M" so that time and time zone can be set successfully.

Q3: Camera turns ON / OFF frequently automatically.

Please reset your camera. Please make sure that "Motion Detection" is set to OFF. Also Please make sure "Auto Power Off" "Parking Mode" is also set to OFF.

Q4: My Video playback on PC is lagging.

You are viewing high-bit rate version of video files. General computer configuration may have problem with faster data processing. Please record videos at lower resolution and try again. Contact us if problem still persists.

Q5: Camera gets HOT

It is normal for your camera to run slightly hot. Due to the higher video resolution, the dash cam may be hot during using. (no more than 140 ° F/60°C).

Q6: Why it's power off when I driving?

If no operation is detected after 3 minute (default setting), the dash cam will enter screen-saver mode. Press any button will reactivate the screen. If you don't need this function, you can turn off the back light.

Q7: How to interrupt the WiFi when connect with phone?

When it connects to your phone via WiFi, you will not be able to operate this device. If you want to operate it, please long press "EMERGENCY BUTTON" to disconnect or restart the device.

Disclaimer

The videos/pictures taken by Car dash cam is only for a reference, we don't take any responsibility due to data-loss in the abnormal circumstances. Special version: The device will records files in normal recording status. But in the following situation, it will lead to files to be damaged or lost;

1. If pulling out the TF card in the recording status, final video files will be damaged or lost.

4. If there is a destructive collision in the recording status leading to Memory card loose, video and audio files will be damaged or lost.

Notice

This product complies with the radio interface requirements of the European Community.

This symbol means the product must not be discarded as household waste, and should be delivered to an appropriate and recycling helps protect natural resources, human health and the environment. For more information on disposal and recycling of this product, contact your local municipality, disposal service, or the shop where you bought this product.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

To comply with RF exposure requirements, a minimum separation distance of 20cm must be maintained between the user's body and the device, including the antenna.
