Request for Class II Permissive Change filing

We formally request a Class II Change filing for the above referenced product.

The reason for this Class II Change filing is the use of an antenna different from that of the original certification.

Furthermore, the dipole external antenna we use has a peak gain of 3.5dBi which is higher than 1.4 dBi (maximum permissible gain of the original grant). The ISAAC part number of this antenna is WRLWFI-F01.

We use a different external antenna in order to optimize the signal coverage.

Furthermore, our host module is a cellular-Wifi router. That means we have an additional cellular module integrated in the host. The cellular module FCC ID is: 2ASYXEC21AWRU201.
