Step 3 Confirm configuration result

After configuration is successful, jump to device list page, click the device to open real-time view live or device setting
Device installation

The device mounting surface needs to be able to bear 3 times the combined weight of bracket and device.

1.Fix bracket to installation position (2-3 meters from ground)

Take out the bracket and fix it at the place you want to install with screws

2.Move and fix the device on the bracket in the direction of the arrow

FAQ

Q: How to save camera recordings?
A:1.Local TF card storage, maximum to 128G. when TF card is full, auto delete older videos, loop record video.
2. Recommend cloud storage, Alarm video storage to cloud server, real-time push alarm small video, safe and reliable, you can learn more on APP cloud service page.

Q: What should I do if forget device password?
A: restore factory setting , reconnect and set new password
Note: The access password involves privacy and security, please treat it with caution

Q:What should I do if can't connect to camera or abnormal offline in use?
A:1. check if camera battery is charged and if the router network is normal
2.Press and hold the power button to power off and restart the camera.
3.restore factory setting(Press and hold the reset button for 6 seconds until you hear "Restoring to factory settings, do not power off" and release it), follow instructions to re-add device
Note: For the position of the reset button, please refer to the chapter "Camera Description".

Q:Does it support 5G band routers?
A: If 5G band and 2.4G band of your router are the same SSID, you can connect directly. If 5G band and 2.4G band are not the same SSID (2SSIDs, 5G band is XXXX-5G,2.4G band is XXXX-2.4G), Please connect WiFi of phone to 2.4G SSID(XXXX-2.4G) of router , then configure camera

FCC Warnning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection againstharmful interference in a residential installation. This equipment generates, uses and can radiateradio frequency energy and, if not installed and used in accordance with the instructions, maycause harmful interference to radio communications. However, there is no guarantee thatinterference will not occur in a particular installation. If this equipment does cause harmfulinterference to radio or television reception, which can be determined by turning the equipmentoff and on, the user is encouraged to try to correct the interference by one or more of thefollowing measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
