Declaration for WLAN 5GHz-Band

As manufacturer of the model: IC-CPD, we hereby declare:

The WLAN module contained in the model: IC-CPD transmits in the 5GHz subband of 5150-5250 MHz. In the 5GHz sub-band, only the "client mode" is activated, not the "access point mode".

The model: IC-CPD is a charger for BEV and PHEV with integrated protection to prevent overheating and electrical hazards. These include WLAN communication for value-added services and Power Line Communication (PLC) (Bentley has disabled PLC).
