## B. Access to the required information on the e-label

1. Users can access the information in no more than three steps in a device's menu, the actual steps are:

Press top right button > Setting > About, then it will display E-Label

No special access codes or permissions are required to go through the above steps beyond entering a user defined password (optional) to protect against unauthorized access to the application.

2. The information is stored on the device, no special accessories or supplemental plugins (e.g. a SIM/USIM card) are required to access the information.  
Yes, it is no special accessories or supplemental required.
3. Users are provided specific instructions on how to access the information.  
Yes, the details steps are in the user manual.

## C. Labeling for importation and Purchasing

Products utilizing e-labels are required to have a physical label on the product at the time of importation marketing and sales. For devices imported in bulk and not packaged individually, a removable adhesive label or, for devices in protective bags, a label on the bags is acceptable for this purpose. Any removable label shall be of a type intended to survive normal shipping and handling and must only be removed by the customer after purchase. For devices imported already in individual packages ready for sales, the information may alternatively be provided on the package. It shall contain:

1. The FCC ID and/or the DoC logo (if applicable); and
2. Any other information required by specific rule to be provided on the surface of the product unless such information is permitted to be included in the user's manual or other packaging inserts.

The FCC ID is present on the product packaging.

Model number is present on the product label, packaging label and shipping label.

## D. Other considerations

1. The above information must be programmed by the responsible party and the information must be secured in such a manner that third parties cannot modify it.

Yes, the e-label information is pre-programmed by grantee and the user cannot modify it.

2. All the applicable regulatory information required on the packaging or user manual instructions must be provided according to the rules even if it is displayed electronically. For example, hearing aid compatibility (HAC) rating for the phones as specified in 47 C.F.R.20.19.

Yes, it is provided in the user manual.
