
Product specification wireless microphone (GTCOM-WM-01)

Coding operation: After opening the tailpipe, you can see the body of the tailpipe②③is Channel add-subtract key ,②Jianwei Channel Reduction ,③Jianwei Channel Plus. Simultaneous long press ②③ , When the code is operated, the antenna sign can be seen flickering in the lower right corner of the LCD screen.

Volume operation: on-state ,Short press①power button ,VOL can be seen in the upper right corner of the LCD screen. At this time, the volume can be adjusted by adding or subtracting the channel keys. ② Jianwei's volume decreases , ③Jianwei's volume increases..

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

FCC

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction. This device should be installed and operated so that its antenna(s) are not co-located or operating in conjunction with any other antenna or transmitter.

Information about the types of antennas and cables that may be used with the device to ensure compliance with the EIRP limits applicable to unlicensed wireless microphones: the gains of the antenna used for transmitting is 0dBi Spiral Antenna, and the antenna de-signed with permanent attachment and no consideration of replacement.

LICENSING INFORMATION

Licensing: A ministerial license to operate this equipment may be required in certain areas. Consult your national authority for possible requirements. Changes or modifications not expressly approved by Tone Communication Technology Co., Ltd. void your authority to operate the equipment. Licensing of wireless microphone equipment is the user's responsibility, and licensability depends on the user's classification and application, and on the selected frequency. we strongly urges the user to contact the appropriate telecommunications authority concerning proper licensing, and before choosing and ordering frequencies.
