-1-

Charging Indications

(1) Charging. Put the earbuds in the charging case (on the top of Armor 15) to charge, when the earbuds are charging, the red light is always on and the status bar at the top of Armor 15 will display the earbuds battery icon and charging prompt; when the earbuds are fully charged, the indicated light goes out and the battery prompt disappear.

(2) Low Power Prompt. When the earbuds battery voltage is lower than 3.55V, there will be a "Low Battery" warning tone every minute.

Power ON and OFF

(1) Boot Method: Pick up two earbuds from the charging case and they will automatically turn on. (There is a "Power ON" tone)

(2) Shutdown Method:

① Put the earbuds into the charging case, the earbuds is turned off. (There is a "Power Off" tone)

② After turning on or disconnecting the Bluetooth, if there is no operation, the earbuds will automatically shut down after about 3 minutes.

-2-

---

③ **Low Power Shutdown:**

When the earbuds battery voltage is lower than 3.2V, the earbuds will automatically shut down.

Pairing and Connection

TWS Pairing

Pick up two earbuds from the charging case to flash between a red and blue light (When TWS is not paired), and the two earbuds are automatically paired (There is a "TWS Pair Successful" tone); when the TWS pair is successful the blue light of the left and right earbuds flash quickly.

Fast Pairing

When the Bluetooth of the phone is turned on, take out two earbuds from the charging case, and the phone will automatically pop up a quick pairing prompt; follow the prompts to complete the pairing and connection to the phone. (with a "Bluetooth Connection Is Successful" tone and the indicated light goes out)

Note: Only after connecting for the first time or clearing the Bluetooth connection record, a pairing prompt box will pop up. Subsequent connections will be automatically reconnected without a pairing prompt box popping up.

-3-

Common Pairing

(1) Connect Manually

Find the Bluetooth menu in the Settings and turn Bluetooth on; search for Bluetooth devices and select " uBuds Inside" to pair. (with a "Bluetooth Connection Is Successful" tone and the indicated light goes out.)

(2) Reconnect Automatically

When the earbuds is on and paired with TWS successfully (with a "TWS Pair Successful" tone and the blue light of the left and right earbuds flash quickly) it will enter the reconnection mode within 5 seconds and reconnect to the latest paired device. (with a "Bluetooth Connection Is Successful" tone and all the indicated light goes out)

(3) Disconnect and Reconnect

The earbuds can be too far from the phone to cause disconnection, if the earbuds is back to the working area in 3 minutes the connection will be recovered; or you need to reconnect it manually if over 3 minutes.

-4-

Bluetooth Disconnected

(1) Disconnect for Great Distance

The earbuds and the mobile phone are disconnected for the distance is too far. If the earbuds can not be back to the working area within 3 minutes, it will disconnect the Bluetooth and turn off.

(2) Disconnect Manually

Find the Bluetooth menu in the Settings; search for paired device and click " uBuds Inside" to disconnect or delete device.

Single Ear Mode:

The earbuds supports single ear mode; taking out a single earbud from the case to automatically reconnect to the latest paired device; if there is no paired device, you can manually pair it with Bluetooth.

Functions and Operations

Call Scene

When the earbuds is in the pairing state, after connecting with the mobile phone, when there is an incoming call, there will be a ringtone reminder of the incoming call.

(1) Answer Incoming Calls

Double click the left or right earbud switch button to answer the call. (In single ear mode, operate in the same way)

(2) Hang up the Phone

During the conversation with the other party, if you want to end the call, double click the left or right earbud switch button to hang up the call. (In single ear mode, operate in the same way)

(3) Reject the Call

Press and hold the left earbud or right earbud switch button for 2 second and then let go to reject the call from the other party. (In single ear mode, just operate in the same way)

-6-

Music/Standby Mode

(1) Play / Pause

When the earbuds is in the pairing state, after connecting with the mobile phone, select the APP playback software you need to start, then double click the left or right earbud switch button to start playing music; double click the left or right earbud switch button again to pause the music playback. (In single ear mode, operate in the same way)

(2) Cut Songs (up and down songs)

When the earbuds is in the pairing state, after connecting with the mobile phone, in the process of playing music, at this time triple-click the left or right earbud switch button, the music can switch to the next song; quadruple-click the left or right earbud switch button, the music can switch to the previous song.

(3) Voice Assistant

When the earbuds is successfully paired and connected to the mobile phone, press and hold the left or right earbuds button for 5 second to turn on the voice assistant (There is a "Di" prompt tone), and press and hold the left or right earbud button for 5 second again to turn off the voice assistant (There is a "Di" prompt tone); it supports Siri and Google Assistant.

-7-

Operation Exception Handling Method

(1) There is no sound in a certain earbud due to improper operation or long-time shielding of the earbud signal. Please try to move to the range where the signal can be received to restore normal.

(2) For failures caused by unknown causes, turn off the earbuds and then turn it on again.

(3) If you change a single product or misuse it, causing the left and right earbuds to be disconnected, pair the left and right earbuds again.

(4) If there is no sound when listening to music after the earbuds is connected to the mobile phone, please go to the Bluetooth settings of the mobile phone and find the name of the connected earbuds (uBuds Inside). When the connection is displayed, click the earbuds name again.

-8-

---

(5) If the two earbuds have been paired and connected to the mobile phone, there is no sound from the earbud after answering the call. You need to check the audio output of the mobile phone and select the Bluetooth pairing name (uBuds Inside) corresponding to the earbud before proceeding Bluetooth call.

Thank you for using this product, we wish you a happy life.
