

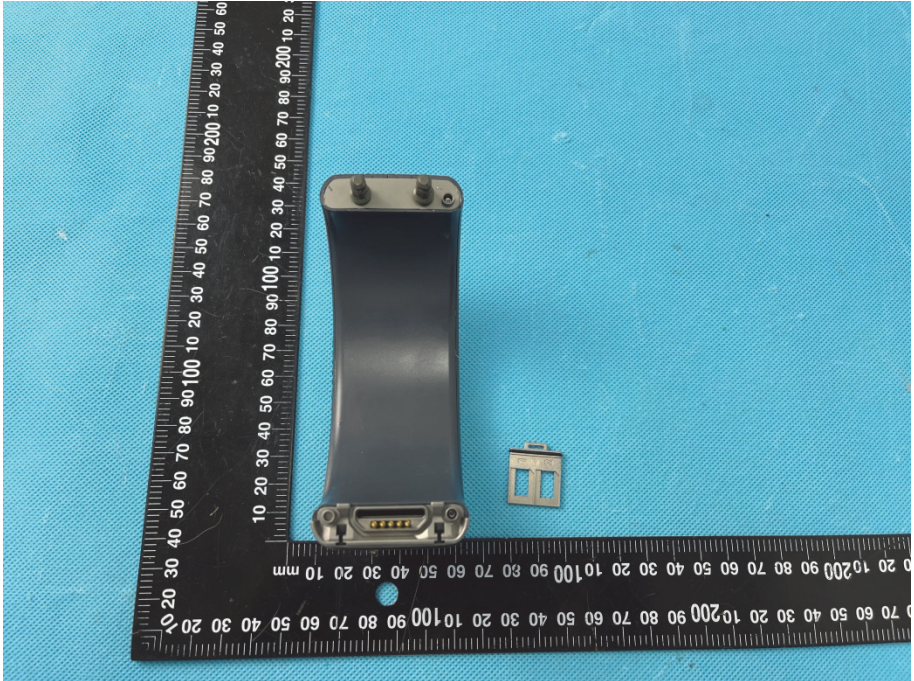

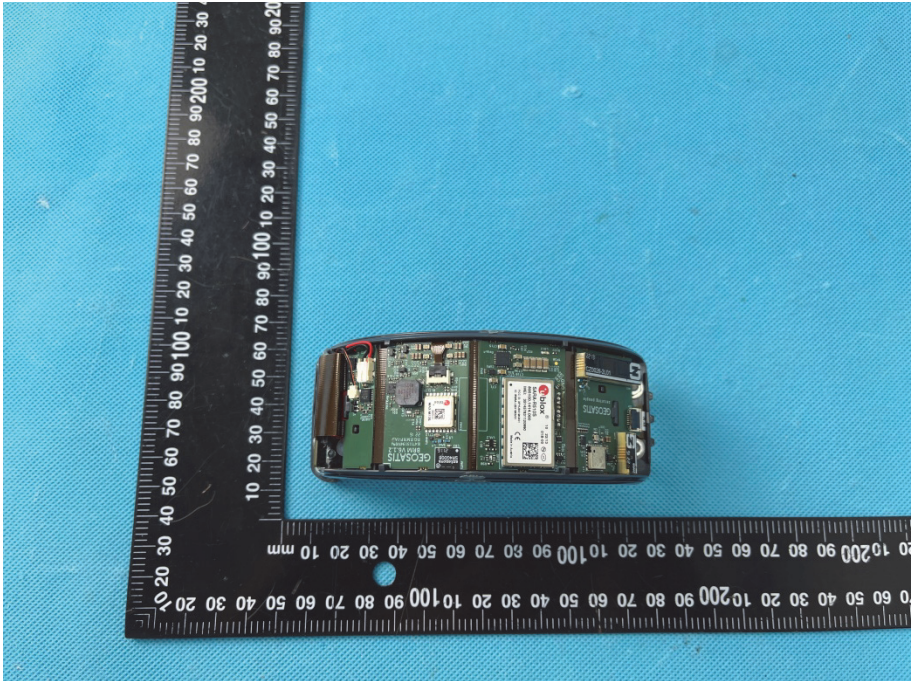

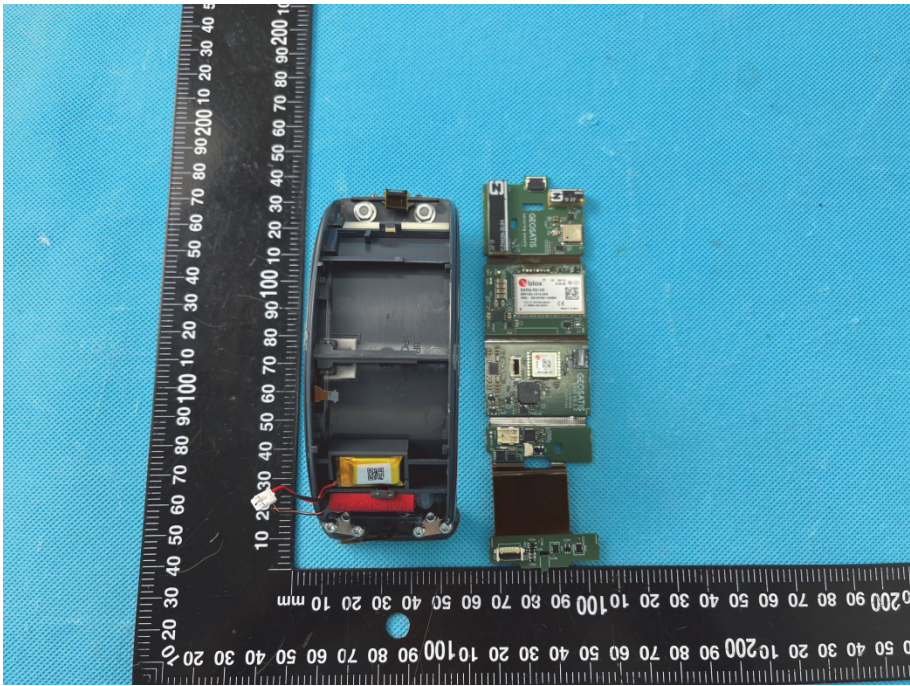

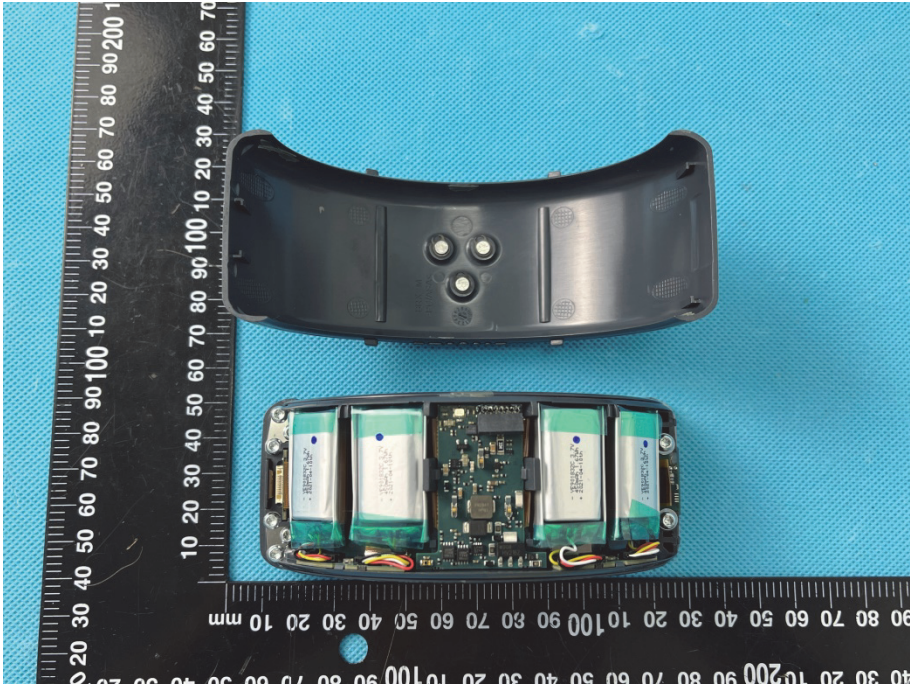

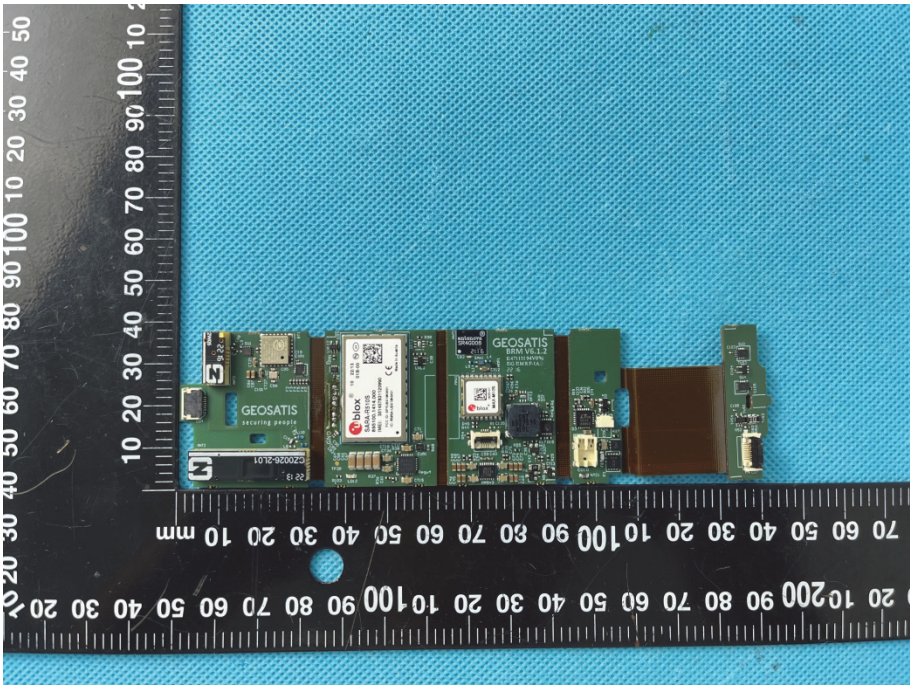

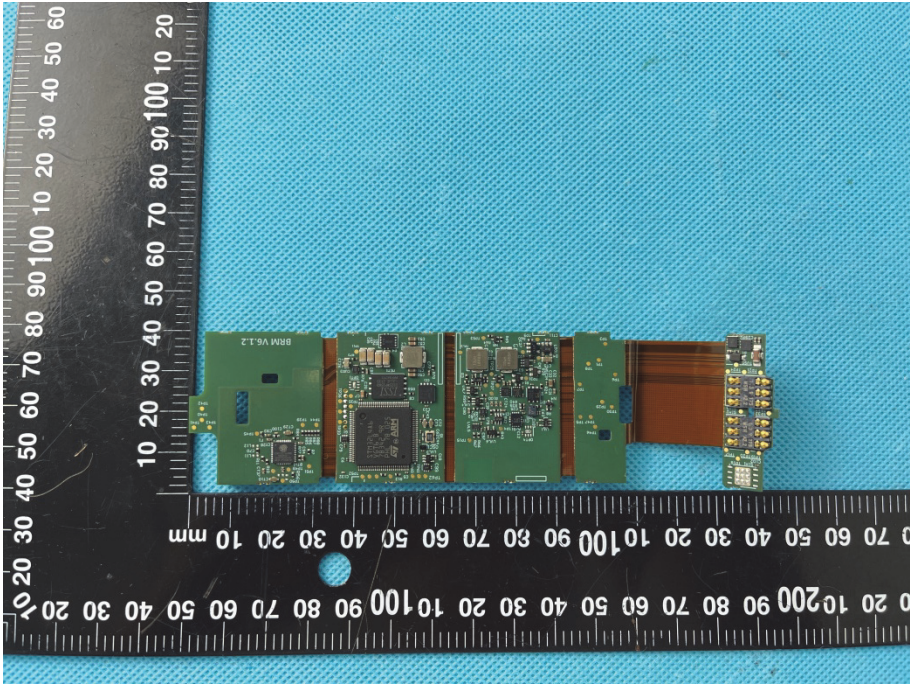

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	
<p>EUT Housing and Board View 2</p>	

<p>EUT Housing and Board View 3</p>	 <p>This photograph shows the internal components of the EUT housing. On the left is the black plastic housing with a battery compartment. To its right is the green printed circuit board (PCB) populated with various electronic components, including a SIM card, a microcontroller, and other integrated circuits. A black ruler with white markings is placed vertically to the left of the components for scale, showing measurements in millimeters.</p>
<p>EUT Housing and Board View 4</p>	 <p>This photograph shows the EUT housing and board from a different perspective. The top part of the image shows the black plastic housing, which is curved and features three circular buttons or sensors. Below it is the green PCB, which is populated with four large, rectangular components, likely capacitors or memory modules. A black ruler with white markings is placed vertically to the left of the components for scale, showing measurements in millimeters.</p>

<p style="text-align: center;">Solder Board-Component View 1</p>	 <p>A photograph showing a green printed circuit board (PCB) assembly with various components. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board's length spanning approximately 100 mm. The components include a SIM card, a USB drive, and several integrated circuits. The text 'GEOSATIS' is visible on the board.</p>
<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph showing a different view of a green PCB assembly. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board's length spanning approximately 100 mm. The components include a SIM card, a USB drive, and several integrated circuits. The text 'BRM V6.1.2' is visible on the board.</p>
