7. Voice control mode

Turn on the robot dog and call Billy twice to wake up the robot dog. The dog will bark twice in response to the blue standby status of the eye light. Then you can say the command in the entry, the entry is as follows:

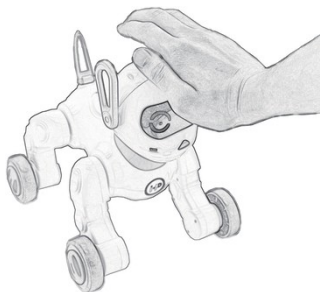

Sit down !
Stand up !
Lie down !
Say hello !
Shake head !
Yoga, Push up !
Dance for me !
What can you do!
You are so cute !

When you say the word in the above entry, the robot dog will do the corresponding action.

8. Gesture mode

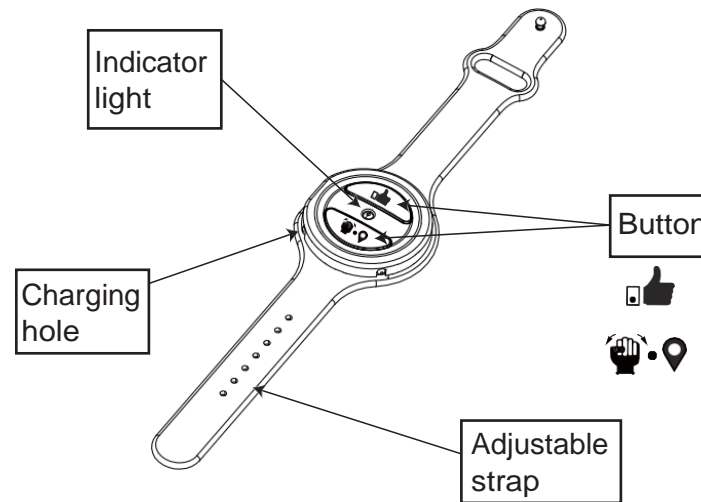

8.1. Billy is equipped with a variety of sensors, you can touch different parts of his body (such as the forehead, the back of his head, buttocks), it will have a variety of reactions, if you do not friendly push it, kick it, it will be angry (eyes LED light shows red) to protest.

8.2 Gesture bluetooth function (put your hand in front of the nose of the robot dog and swing it about 5cm, and the dog will make the movement of shaking his head and sitting down)

9. Bracelet control mode

Billy-Introduction to bracelet functions

9.1. Before using the bracelet mode, please wear the bracelet in your left hand and point upwards to disconnect the Bluetooth connection of the phone. At this time, press and hold the click button on the bracelet to connect to Billy quickly. At this time, the status of the bracelet is green, you only need to move back and forth.

9.2. Click the "switch" button, and you can switch to follow mode. Within 2 meters from Billy, the indicator light of the bracelet will turn blue and always light. At this time, Billy's eyes are in a blue flashing state, which indicates that Billy will follow you at any time. (note: in the following mode, please make sure that the bracelet can be seen by Billy, and it should not be covered by clothes or body, or the following mode will fail)

9.3. If the switch button is clicked again, the indicator light of the bracelet will turn green and turn on normally, and Billy's eyes will also turn green and turn on normally. At this time, it will return to the state of gesture control.

9.4. Long press thumb up button for more than 3 seconds and the indicator light of the bracelet will go off. At this time, the bracelet will disconnect from Billy and enter a dormant state. If you want to use it again, please press thumb up to wake up the connection.

9.5. Control method: long press the switch button for more than 3 seconds and the indicator light turns green. Turn off the connected machine dog and open another machine dog. Restart the bracelet and connect.

9.6. Please note: when selecting bracelet control or mobile APP control, only one of them can be selected, and the other device must be in hibernation or bluetooth disconnected state.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
