Safety Information

1. The LED light is partial waterproof; don't put it into the water.
2. The power adaptor is waterproof, but still don't put it into the water.
3. Operating Voltage should be confirmed in the rated voltage range.
4. Examine the light after installation. It should not be plugged in if there is water inside the light.
5. Do not plug in when there is water in the plug. If a plugged in unit or socket get wet, don't touch it. Disconnect the fuse or circuit breaker that supplies power to the light, and then unplug it for drying.
6. Do not operate the light if the appliance has damaged parts or is malfunctioning.
7. Unplug before putting on, taking off or cleaning the light; do not operate the light with wet hands.
8. For eye safety, don't look directly into the light.
9. Do not repair yourself; consult us for help if the light doesn't work well or discard it.

Note:

A Drip Loop (see the below illustration) should be used to avoid water dripping along the power cord onto the electrical outlet. The power adaptor is sitting on the ground floor and the Drip Loop must always be below the level of the outlet. If the plug or outlet gets wet, DO NOT TOUCH any part of the appliance. Disconnect the fuse or circuit breaker that supplies power to the light, and then unplug it for drying.
