How to correct calendar , time, week?

The time needs to be re-calibrated after the power is on to display the correct Month and calendar with the exact time. Please see the detailed operation process as follows:

Step 1: Correct calendar ----Press the button  for about one second, The number on month area will flash on the screen firstly, Then select the button  or  to calibrate the month, finally press the button

 for confirmation. At the same time, the number on date area start flashing, and then repeat the operation  or  to calibrate the calendar.

Step 2: Correct time----When the calendar calibration is confirmed, it will enter the time area for correction. Please repeat step 1.

Step 3: Correct week----After adjusting the time, the third step is to enter into the area of week. Please repeat step 1.

Step 4: After the week is corrected, press the button  again for confirmation, and the calendar & time & week calibration mode will be exited. In this case, the month, week and time displayed on the screen have been calibrated.

IV TIPS

- The calendar & time & week can be operated in the state of music playing or un-playing.
- You can press and hold button  for about 2 seconds to exit the correction state. Or you don't press it, the device will automatically exit the time setting mode after 7 seconds.

V PROBLEMS RESOLVING

1. Phone cannot search for the Bluetooth

- Confirm if the Bluetooth is turned on
- If you can't find the Bluetooth when it has been turned on. Check if other devices are connected to the Bluetooth. Please restart the Bluetooth and mobile phone.

2. Bluetooth and mobile phone are always disconnected or have noise after they are connected.

- There is some barrier between the mobile phone and Bluetooth or their distance exceeds the scope of the signal, So please do not fully hold the Bluetooth with your hand. In order to maintain the continuous stability of the signal, please try to keep Bluetooth and the phone is in the same direction.
- Maybe the internal circuit is unstable, please turn off the Bluetooth switch and restart again.

3. How far distance the mobile phone and the Bluetooth mirror can be kept when I use it?

- The mobile phone or Bluetooth mirror can work effectively up to 30 feet (10 meters). Generally, Bluetooth connection is the best when no any obstacle between them, the distance beyond the 30 feet (10 meters), you will hear a slight noise during the call, which is a normal situation.
