

# Retro Turntable Operation Guide

## *MJI 1689*

Thank you for buying this product. You may already be familiar with using a similar unit , but please take the time to read these instructions.

### **Where to put your turntable**

It is important that you consider carefully in advance where your turntable will be situated and make sure that it is:

- \* On a flat and stable surface with sufficient ventilation
- \* Away from bright sunlight or heat sources, such as a radiator or naked flame and lighted candles must not be placed on the turntable
- \* Not in a humid or very damp place such as a bathroom

### **Important safety instructions**

Please read this instruction manual carefully before attempting to use the turntable and keep the manual for future reference

The turntable is for indoor use only

Do not move the turntable while it is connected to the mains supply via the adapter

Clean the turntable with a slightly damp cloth and do not use abrasive cleaners

Children should be supervised to ensure that they do not play with the turntable

**WARNING:** If the flexible cable of the adapter is damaged, it must be replaced by the manufacturer or his service agent or a similar qualified person in order to avoid a hazard

## **FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

**General Descriptions:**
