

Z27 Smart band

User guide

Band usage instructions

Component introduction

Charging instruction

Charging CLIP charging (charging mode as shown below) Plug the USB interface into the charging stand for charging, and the charging voltage is 5V.

Sports interface

In the sports interface, you could press and hold for three seconds to enter the specific category of sports interface. click to switch into different kind of exercise including skipping running cycling etc. Long press and hold for three seconds on the specific sports interface to enter the sport details interface, also press and hold for three seconds to exit the current exercise

Message interface

In the message interface, the band will save 8 pieces of message pushed in APP recently. Long press 3 seconds to view the message if there is no Message message, it will be stopped in the message interface. Click to turn to the next page. View all the information, and press and hold for three seconds to delete the current message, then to exit the message interface

Wearing method

- 1. The best wearing positioning of the wristband should be after the ulnar styloid process.
2. Adjust the size of the wrist according to the adjustment slot, buckle up the wristband.
3. Keep the sensor stay close to your skin and avoid moving

Power on/Poweroff

- 1. When powered off charge or long press the function button for 3 seconds can turn on the band with vibration.
2. When powered on, after the switch to the shutdown interface, long press the function button for 3 seconds can turn off the band with vibration.

Band operation

- 1. Short touch function button to turn on the screen or switch display when the band is turned on.
2. No operation default five second screen standby display off, users can connect to the mobile APP to modify the idle time before turning off the display.
3. The band Factory setting by default turned on for 24 hours heart rate monitoring, and the user can select in the APP device interface to turn it on or off in the general settings

More function interface

In the more function interface long press and hold for three seconds to enter the sub menu interface for more function operations. More symbol

Search phone interface

When connected to the phone, long press and hold the phone interface for three seconds, the phone will ring a reminder. Search phone symbol

Reset settings interface

Long press and hold on the restore interface for three seconds, all data of the band will be cleared. As for the App, the data on the current day will be cleared. (The rest of the historical data will retain)

Product information interface

In the product information interface, long press and hold for three seconds to view the firmware version number and Bluetooth address. Symbol of the product about About icon

Ap installation

Scan the QR code below or enter any major App markets to download and install "Power Fit"

System requirements: iOS 8.0 or above, Android 4.4 or above, support Bluetooth 4.0

Device connection

You need to connect to the APP for calibration that you use the band in the first time. After the connection is successful, the band will synchronize the time automatically. Otherwise, the step counting and sleep data will not be accurate

Shutdown interface

In the shutdown interface long press for more than three seconds to shut down the phone with vibration. Shutdown symbol

Brightness adjustment interface

In the brightness adjustment interface, long press and hold the brightness symbol for three seconds until it blinks, a single press can adjust different brightness, in the total of four levels of brightness. Brightness symbol

Precautions

- The band should avoid strong impact, extreme heat and exposure under the sunlight for a long term.
Do not disassemble, repair or modify the band yourself.
This band is charged with 5V/500MA. Overvoltage load power supply charging is not applicable.
The suggested usage environment temperature should be 0 to 45 Celsius degree. Do not throw it into the fire to avoid explosion/detonating.

APP installation

Bluetooth connection: After the pairing is successful, the APP will save the Bluetooth address of the band automatically. When the APP is opened or running in the background, it will search the band and try to connect to it when found

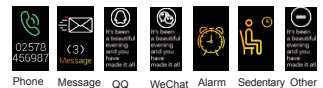

Data synchronization: Manually pull down the screen on the home page to sync data, the band can store 7 days of offline data. The more data, the longer the synchronization time, the longest is about 2 minutes, and there will mention Synchronization completed remind after the synchronization is completed

APP Function and setting

Personal information and exercise goal. You have to fill in your personal information after you enter the APP

Reminder function

Activate the reminder function needs to turn on the reminder switch in the APP setting centre and keep the mobile phone and the band in a state of successful connection of Bluetooth. Vibration to remind when new messages coming up

Bluetooth 4.0

- 1. Due to the signal interference of the Bluetooth wireless connection the connection time may vary in each time. If it is not connected for a long time, please make sure that the operation is carried out without the interference from the magnetic field or from mobile Bluetooth equipment.
2. Turn off Bluetooth and turn it on again.
3. Close the mobile background app or restart the phone.
4. Do not connect other Bluetooth devices to your phone at the same time.
5. Check whether the APP is running normally in the background, if it is not in the background, it may not be connected.

Unable to detect the band? Because the band is not detected by the mobile phone during the Bluetooth broadcast, please make sure that the band is charged and activated and is also not bound to other mobile phones already. Then you can put the band close to the mobile phone. If it still does not work, please turn off the Bluetooth of your phone and restart the Bluetooth after 20 seconds

Why has the wrist been worn tight when measuring heart rate? The band uses the principle of light reflection. After the light penetrates the skin, the signal reflected the sensor is collected to calculate your heart rate. If you do not wear it tightly, ambient light will enter the sensor, which will affect the measurement accuracy

Frequently Asked Questions

Why is this too long to wait for the first time heart rate test? For the first time to detect heart rate, it needs to collect longer signals depend on different groups of people. In order to calculate your heart rate accurately

What if the Bluetooth connection is not available/Connection/reconnection failed or reconnection is slow? Confirm that your device is either iOS 8.0 or Android 4.4 or above, and also supports

Incoming call reminder: When calling in, the band will vibrate and display the name and number of the caller. If the APP turns on the Call rejection function, long press and holds the wristband function button to reject the call for three seconds. SMS reminder: When receiving a text message, the band vibrates and displays a symbol to remind, click to view the text message content. Customized exercise planning, able to help improve physical fitness. WeChat reminder: When receiving a WeChat message, the band vibrates and displays a symbol to remind, click to view the WeChat content. Smart alarm: Threealarm can be set. After setting, it will be synchronized to the band. The smart alarm clock is a silent alarm clock. When the alarm is activated, the band will initiate moderate vibration and support offline alarm reminder. Sedentary reminder: The default reminder interval is one hour; in the connected state, after the user is turned on, if the user does not exercise within one hour, the band will vibrate to remind the user to exercise. Other reminders: When receiving other messages such as emails, the band will vibrate and display another reminder symbol, click to view the content

Sleep detection function: When you fall asleep, the band will determine to enter the sleep monitoring mode automatically and detect the length of your deep sleep/light sleep/awake time period, calculating your sleep quality; sleepdata can only be viewed on APP at this moment. Note: Sleep data will only be available when you wear the band to sleep

Why didn't I receive a reminder when the reminder function was turned on? Android phone: Make sure the phone and the band are connected. After connecting, enable the corresponding permissions in the phone settings, allow the Power Fit app able to access phone calls, text messages, contacts list, and keep Power Fit running in the background. If the phone is installed with the security software, please allow the software to allow Apple mobile phone: If there is no reminder after connecting, it is recommended to restart the mobile phone to reconnect. When connecting the band in again, you must wait for the mobile phone to come up. [Bluetooth Pairing Request], and click [Pairing] to have your reminder function available

Is the band waterproof? Support IP67 waterproof and dustproof level. IP67 standard is capable in less than 35 Celsius degrees, and water depth is 1 meter for up to 30 minutes. As usual, wash hands, raining, cold water shower and car wash can be worn at will

Does the Bluetooth connection need to be turned on all the time? Is there still data recording after disconnection? Before the data is synchronized, data is retained on the main body of the band (data can be retained for seven days). When the Bluetooth connection between the mobile phone and the band is successful, the band data will be uploaded to the mobile phone automatically. Please synchronize the data to the mobile phone in time. Note: If you enable the call and SMS reminder function, you must keep the Bluetooth connected but alarm clock reminder is supported in offline

Main function interface

There are main interfaces in the band. Long press for three seconds on the main interface to select which specific interfaces to switch to. Single click to switch Long press and hold for three seconds to confirm selecting the current main interface. After the APP is paired for the first time, the band will synchronize the time and date of the phone. Remind: 1. When it is not wearing, do not beat, and display the last heart rate value measured; 2. When it is wearing, beating, the heart rate value would be cleared and the measurement will be started, displaying the realtime heart rate value

Interface display steps

The interface display steps, the band default step counter mode: when the band is worn on the wrist that the user walks and the arm swings, the band record walking step data according to the number of swings

Specifications

Table with 4 columns: Device Type, Smart Continuous Heart Rate Bracelet, Type of battery, Polymer. Rows include Display, Product weight, Dimensions, Waterproof rating, Wristband material, and other specifications.

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: -- Reorient or relocate the receiving antenna. -- Increase the separation between the equipment and receiver. -- Connect the equipment into an outlet on a circuit different from that which the receiver is connected. -- Consult the dealer or an experienced radio/TV technician for help. This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

智能连续心率手环

使用说明书

手环快速使用说明

部件介绍

充电方法

充电夹充电 (充电方式如下图) 将USB接口插入充电座即可进行充电, 充电电压5V.

运动界面

在运动界面, 长按三秒进入具体运动界面, 包括跳绳、跑步、骑行等多项运动, 点击可切换. 在具体的运动界面长按三秒开始运动, 进入运动详情界面, 长按三秒退出当前运动.

消息界面

在消息界面, 手环会保存APP最近推送的8条信息. 长按三秒即可查看消息 (无消息则停在消息界面), 点击翻页, 长按三秒删除当前消息, 查看完信息即可退出.

心率测试注意事项

- 测试时, 请勿自行拆卸, 避免影响手环心率LED灯点亮;
测试时, 避免剧烈运动, 避免影响测试的准确性;
测试区域要保持清洁, 汗水或污渍会影响测试结果.

佩戴方法

- 1. 手环以右侧套好后佩戴最佳;
2. 根据调节孔调好适合手腕的大小, 扣上腕带扣;
3. 传感器要紧贴皮肤避免移动.

开/关机

- 1. 在手环关机状态下, 充电或长按功能键, 手环震动并开机;
2. 在手环开机状态下, 切换至关机界面, 长按功能键3秒手环震动关机.

手环操作

- 1. 在手环开机状态下短触功能键可点亮屏幕或切换显示;
2. 无操作默认五秒息屏, 用户可连接手机APP修改息屏时间;
3. 手环出厂默认打开24小时心率监测, 用户可在APP设备界面的通用设置中选择打开或关闭.

更多功能界面

在更多功能界面, 长按三秒即可进入下级菜单界面, 进行更多功能操作.

查找手机界面

连接状态下, 在查找手机界面点击长按三秒, 手机会发出铃声提醒.

还原界面

在还原界面长按三秒, 手环数据全部会清零, APP当天数据清零 (其余历史数据继续保留).

关于界面

在手环关于界面, 长按三秒查看固件版本号及蓝牙地址.

安装手环APP

扫描下方二维码进入各大应用市场下载并安装"Power Fit"

设备要求: iOS 8.0及以上; Android 4.4及以上, 支持蓝牙4.0.

设备连接

首次使用手环需连接APP进行校准, 连接成功后手环会自动同步时间, 否则步数和睡眠数据不准.

关机图标

在手环关机状态下, 长按三秒即可进入关机界面.

亮度调节界面

在亮度调节界面, 长按三秒亮度图标开始闪烁, 单击可选择不同亮度, 共有四档亮度.

注意事项

- 请避免手环遭受强烈撞击、极高温和摩擦. 请勿自行拆卸、修改或改换本机. 本机使用5V/500MA充电, 严禁使用高压电源/电焊机进行充电. 本机使用环境为0度~45度, 禁止将其扔进火中, 以免引起爆炸.

打开手机APP

蓝牙连接: 配对成功后, APP自动保存手环蓝牙地址, APP打开后在后台运行, 都会自动搜索并连接手环.

数据同步: 在APP主页手动下拉同步数据; 手环可存储7天的离线数据, 数据量越多, 同步时间越长, 最长大约2分钟, 同步完成后会有"同步完成"的提示.

APP功能及设定

个人信息和运动目标. 进入APP后请先设定个人信息

我的一个

可设置头像、性别、年龄、身高、体重, 个人信息可提高数据的精准度. 定制个人每天的运动目标, 合理的运动规划, 有助于身体素质的提高.

睡眠功能

睡眠功能需要在APP设置中心开启睡眠开关, 并保持手机与手环在蓝牙连接成功的状态, 来测量实时睡眠数据.

蓝牙连接不上怎么办? (连接/重连失败或连接速度很慢) 确认您的设备是iOS8.0和安卓系统4.4及以上版本并支持蓝牙4.0. 1. 由于蓝牙无线连接存在信号干扰的问题, 可能每次连接的时间不等, 如果长时间连接不上, 请尝试操作在无线端或蓝牙设备干扰环境下进行. 2. 关闭蓝牙再打开. 3. 关闭手机后台应用或重启手机. 4. 手机不要同时连接其他蓝牙设备或功能. 5. APP是否在后台正常运行, 如果不是在后台可能连接不上.

无法搜索到手环? 因为手环蓝牙广播时没有被手机检测到, 请确保手环处于有电, 并激活状态, 且未与其他手机绑定, 然后将手环靠近手机, 如果仍然无效, 请关闭手机蓝牙, 20秒后再打开手机蓝牙.

测量心率时为什么手环佩戴的比较紧? 手环采用光电原理, 通过光源穿透皮肤后, 采集反射到传感器的信号来计算您的心率, 如果佩戴不紧, 会有环境光线传入传感器, 会影响测量精度.

常见问题

首次测试心率等待时间过长? 首次测试心率, 需要根据不同人群采集较长的信号, 才能准确计算您的心率.

主要功能界面

手环有3个主界面, 在主界面长按三秒后可以进入界面选择, 单击进行切换, 长按三秒确定选择当前主界面. APP首次配对连接好以后, 手环会同步手机的时间、日期等信息.

注意: 1. 未佩戴时, 不跳动, 显示最后一次测试值; 2. 佩戴时, 心跳动, 心率清零并开始测试, 显示实时心率值.

计步界面

显示计步, 手环默认计步模式, 将手环佩戴在手腕上, 当用户走路并且手臂摆动的时候, 手环根据摆动的次数记录为行走步数数据.

基本参数

Table with 2 columns: Device Type, Smart Continuous Heart Rate Bracelet, Type of battery, Polymer. Rows include Display, Product weight, Dimensions, Waterproof rating, Wristband material, and other specifications.
