SPECIFICATIONS

Model No.	Q10
Size	193*193*332mm
Net Weight	2.7KG
Input	AC100-240V 50/60Hz
Power	45W
Volume	1L
Working Capacity	700ml/d(30°C 80%RH)
Noise	<45dB
Applicable Ambient Temperature	5-50°C
Coverage Area	<20m ²

FUNCTION INSTRUCTION

Purification dehumidifier combines with functions of dehumidification and purification, providing three working modes for users to enjoy fresh air and suitable humidity in the meanwhile.

I. Water Full Instruction

- When the water tank is full, dehumidifier indicator will flash in Red color and the machine will stop operation.
- Put the water tank back to the machine after pouring the water to restart.

II. Reminder For Replacing Filter Instruction

- When the machine detects that the filter runs out, the air purifier indicator will change to yellow and keep flashing.
- Press the purification button for 7 seconds to reset after replacing a new filter.

III. Low-temperature Dehumidification

The running temperature for the machine is 5°C to 50°C, when the temperature is above 5°C, the machine will continue to work

- 06 -

IV. Button Instruction

When the machine is connected to the power supply, the buzzer will ring for one time, all indicator light will light for one time and then go out, and the machine will enter the standby state. The buzzer will ring with every touch of any button.

1. Purification Button

- Press the button, the purification indicator will turn on, the machine will start working with air purification.
- Press it again, the machine will power-off.

2. Dehumidification Button

- Press this button when the machine is turn on, the machine will dehumidify with purification function.
- Press again, turn off the dehumidification function and its indicator light, the purification function and its indicator will keep operating.

3. Mode Button

- Press the button to set modes when the function of purification turns on.
- This button can be set three modes circularly: high-grade, low-grade and mid-grade. The corresponding indicator will turn on after setting.

4. Time Button / Wifi Button

- When the machine is working, touch the timer button to set 2/4 hours and its corresponding indicator light will be on and keep green.
- The machine will stop when the time is up.

WORKS with Smart Life APP

1. Download & Registration

- Scan the QR code to download "Smart Life" APP. You can also search "Smart Life" in either APP store or Google Play to install the APP.
- Open the "Smart Life" APP, tap "Register" to register a "Smart Life" account with your phone number or E-mail. Then sign in the APP.

2. Add Devices in Easy Mode (Recommend)

- Make sure your smart device is energized and your mobile phone is connected to your WIFI network. If the WIFI indicator of smart device keeps flashing to indicate that the smart device enters the mode of configuring the mobile phone; if not, please press the WIFI button for more than 7 seconds, after hearing the smart devices "beep", then loose it and this means the device is already for configuration.
- Open your "Smart Life" APP and tap "+" on the top right of the APP. Select type of service device, tap "All devices" and turn to "Add Device", then automatically fetch the password of the WIFI network that your mobile phone connects to. Then tap "OK" to connect to the device.
 - When appearing "Successfully added 1 device", it means the connection is complete and your device will be listed in your APP list.

- 08 -

3. Add Devices in AP Mode

- If failed in Easy Mode, users could also add devices in AP Mode.
 - Press the WIFI button for more than 7 seconds until hearing "beep" and the WIFI indicator light begin to flash quickly, then press the Timer button for another 7 seconds until hearing "beep" and the indicator light begin flash slowly, this means the device is already for configuration in the AP Mode.
 - Tap "+" on the top right of the APP. Select Device Type and tap it. Then select "AP Mode" on the top right of the APP. Tap "Connect now" to go to the WLAN Settings interface in your mobile phone and select the WIFI network named "Smart Life_XXXX" to connect it.
 - Return to the "Smart Life" APP, the connection will start automatically.
 - When appears "Successfully added 1 device", it means the connection is complete and your device will be listed in your APP list.
- Now you can control your smart device via your mobile phone APP anytime and anywhere (Make sure your mobile phone and smart device are all connected to the network). You can share your devices with your friend or family after you add your devices successfully.

4. Q&A

- (1) Why failed in adding device?
- Make sure the device is powered on and close to your mobile phone when adding device.
 - Make sure your mobile phone is connected to the WIFI network and your WIFI router is working properly.
 - Make sure the device is ready for configuration. Please refer to the Product Instruction "Add Devices in Easy Mode" or "Add Devices in AP Mode" for details.
 - Make sure the connected devices have not reached the maximum number of WIFI router. If not, please disconnect the network of some devices.

- 09 -

- (e) Make sure password of the WIFI network is correct when adding new device.
(f) Make sure you have not used any Chinese Characters to name your WIFI network.
- (2) Can I control device with 2G/3G/4G/5G network?
When adding device for the first time, it requires that your mobile phone and device are connected to the same WIFI network. After adding device successfully, you can remote control your device with 2G/3G/4G/5G network.
- (3) How can I share my device with others?
Open your Smart Life APP, select your device and tap the button in the top right corner. Tap "Shared devices" and "Add sharing", then select the "country/region" where the account belongs to and input the "Account number" (a phone number or an E-mail address) you want to share with. (Please make sure the phone number or E-mail is registered.)
- (4) How can I manager the device shared by others?
Open your Smart Life and you can operate the device by tapping the product in the "Shared device I received" on the home page.
- (5) How to remove device?
Method 1: Press the WIFI button for more than 7 seconds, you will hear "beep", it means the device is removed, and the WIFI indicator light begin to flash quickly again.
Method 2: Open your "Smart Life" APP, select your device and tap the button in the top right corner. Tap "More". Then tap the "Remove Device" in the bottom, the WIFI indicator light begin to flash quickly again.

METHODS OF POURING WATER

- The water tank has maximum capacity of 1000ml with 700ml per day working capacity.
- The machine will auto-off when the water tank is full, the indicator light will turn on.
- Please turn off the machine when water tank is full, pull out the water tank, and then put it on a horizontal place. Opening the water tank cover with upright direction and pour the water.
- Please reset the water tank and restart the machine after pouring the water.
- Do not move or destroy the water tank float, otherwise the machine will not work or cause any other unnecessary breakdowns.
- The water tank can be connected with the hose to drain water when pulling out the silicone rubber drain stopper and plug the hose into the drain hole.

Notice: Please open the tank cover according to the photo, then pour the water.

MAINTENANCE

Cleaning & Storage

- Ensure the machine is unplugged before maintenance.
 - After opening the water tank cover, use soft cloth with neutral cleanser to clean the water tank.
 - Use soft cloth with neutral cleanser to clean away any dust or debris from the surface of the unit and air inlet/outlet.
 - Do not clean the filter with a vacuum cleaner or wash it directly, just put the filter under the sun to sterilize regularly.
 - If you do not use the machine for a long time, ensure the water tank is clean and the machine is completely dry out, put on the dust cover bag and place it in a cool and well-ventilated place.
- Notice: Please don't drop any water into the machine when clean the air outlet.

FAQ

SITUATION	REASON
No working	<ul style="list-style-type: none"> Is it plugged into a power socket? Is there a power outage? Is the home leakage switch or fuse cut off? Is the water full?
Poor performance (less water in the tank)	<ul style="list-style-type: none"> Is the filter blocked? Is the door opened? Is there any obstacle blocking the air inlet/outlet? Is there any other equipment releasing steam indoor? Is the indoor temperature too low? (the dehumidification capacity will be weaker in a low temperature and humidity environment)
The air volume becomes smaller	<ul style="list-style-type: none"> Is the filter too dirty so that it blocks the air to enter inside? Is the air inlet/outlet of the machine blocked by something?
Significant noise	<ul style="list-style-type: none"> Is there anything stuck on the fan in the air outlet? Is the machine tilted?
Leakage	<ul style="list-style-type: none"> Is the machine tilted or dumped? Is there any water in the tank when moving the machine? Is the floating ball in the water tank fall off? Is the drain hose plugged in the right place. Is the silicone rubber drain stopper plugged the drain hole.

Notice: If the above FAQ can not solve your problems and need maintenance, please contact the supplier or after sales service center. Please do not disassemble the machine to maintain by yourself.

FCC Warning:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
