2. Do not spray insecticide, perfume or other flammable spray around the products.

01

### Warning

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).

02

- Before connecting the power supply, please check whether the voltage of the product is consistent with the local power supply voltage.

## 06/Wifi operation

1. Use your mobile phone to scan the QR code below to download the "Smart Life" APP. You can also search for "smart life" in the APP store or Google Play to install the APP.

2. Open the "Smart Life" APP and use your phone number or e-mail to register your "Smart Life" account, then login.

### Add appliance:

Connect your phone to your home WiFi and turn on bluetooth (please select 2.4ghz WiFi network) Open the "Smart Life" APP. Enter the homepage of the "Smart Life" APP. Click "+" to select to add a device, the APP will display manual addition and automatic discovery.

Automatic discovery: When the corresponding authority is turned on, the device can be automatically discovered, and the device needs to be in the network configuration state and turned on. Manually add: select the name corresponding to the product, WiFi+Bluetooth mode.

### Bluetooth configuration:

When confirming that the WiFi indicator of the device is flashing quickly, click OK, and then wait for the connection. (Recommended.) When "Successfully add 1 device" appears, it means the connection has been completed and your device will be listed in your APP list.

### Hotspot configuration network:

Click on the WiFi quick connection in the upper right corner to select the hotspot distribution network (compatibility mode), Confirm that the WiFi indicator of the device flashes slowly, click OK, and enter your home WiFi and WiFi password.

Next, click to connect to go to the WLAN setting interface of the phone, and then select the Wi-Fi network "SmartLife\_XXXX" to connect it.

Return to the "Smart Life" APP, the connection will start automatically. When appears "Add 1 device successfully", it means the connection is complete and Your device will be listed in your APP list. Now, you can control your smart device through the mobile APP anytime and anywhere (make sure your mobile phone and smart device are connected to the network, make sure your router name is changed to SmartLife\_XXXX)

## 07/ Maintenance

### Notice:

1. Unplug the unit and cool it down before maintenance or cleaning.
2. Do not immerse the unit into any liquid.
3. Do not use abrasive, corrosive or flammable cleansers (such as bleach or alcohol) to clean any part of the unit.
4. After cleaning the product, place it in a ventilated place to dry and avoid to dry it under sunshine directly.
