## uAttend Cloud Time Clock

### **Description:**

uAttend time clocks work in conjunction with the online cloud account and allows customers to automate their time and attendance management. Employees use the time clocks to record their punch times which are then sent to the online account, while the uAttend online account gives customers the ability to streamline their processes using the system's automated time card calculation engine.

### **Time Clock Features:**

- Allows employees to authenticate for time and attendance punching by scanning a fingerprint, RFID or entering a unique personal identification number (PIN).
- Allows employees to perform In/Out, Break/Lunch, Department transfer and Job punches on the time clock.
- Connects to the internet using WiFi or Ethernet.
- Captures and sends real-time punches to the uAttend online account.
- Time clock works in conjunction with uAttend online account to track time by pay period, automate rules, and run advanced calculations for exporting time data to payroll systems.

### **FCC Statement:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body
