125V 60Hz

15A/1875W Resistive
10A/1250W Tungsten
1/2 HP
Working Temp: -10 ~60℃
Wi-Fi Frequency: 2.4 GHz

▶Install the "Smart Life" App

1. Search for Smart Life App on App store/Google Play Store, or just scan the QR code below to download. (For iPhone, you can use build-in camera to scan the QR code. For Android, you may need barcode scanner to do that.

Please confirm the App icon before downloading.)
PS: You can also add this smart plug to smart life app directly if you already have it on your phone, it is compatible and works the same way.

2. Register an account and memorize the password, enter your email address or your phone number, then obtain verification code to complete the registry.
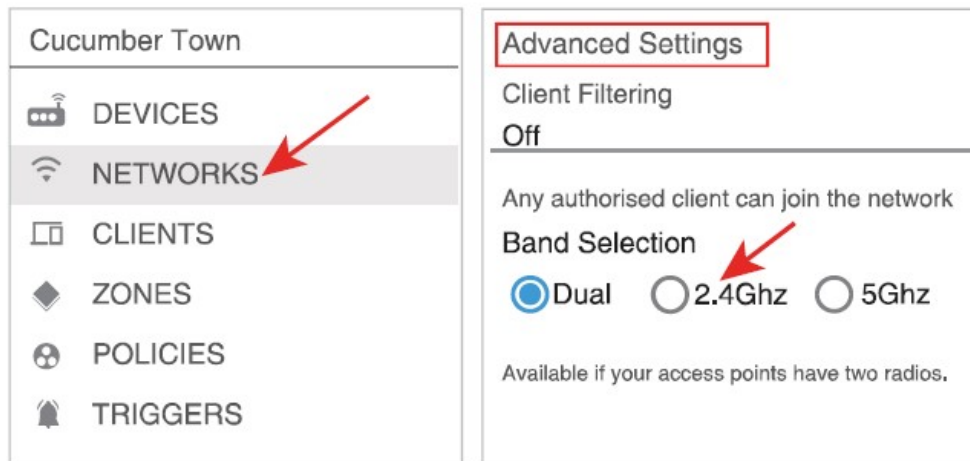

Smart Life

▶ Connect with Your Cellphone
Requirements: 2.4GHz Wi-Fi network

Please note:

1.If you only have 5GHz Wi-Fi router,you will not be able to complete the connection.

2. If you are using a dual Wi-Fi router and it broadcast 2 Wi-Fi signals, make sure that your phone is connected with the 2.4GHz Wi-Fi signal, it should be the Wi-Fi signal that next to "_5G" .

3. If you are using a dual-band Wi-Fi router but it broadcast only 1 Wi-Fi signal, you will have to manage your Wi-Fi router and change the settings to have 2.4GHz Wi-Fi.

B: AP Mode(Indicator light blinks once every 2 seconds) If the Easy mode connection failed, please remove and install the smart plug into your power outlet again. When the indicator is blinking quickly, it is in Easy mode. Hold the power button for about 7 seconds to enter into AP mode. Once you see the indicator light slowly blinking(every 2 seconds), you can start to try the AP mode connection.

---> First go back to the Add Device "+" interface. "Socket (Wifi). Then choose

the "Other Mode" in the top right corner and choose AP Mode.

Cancel   Other Mode

Reset the device first.

If the indicator is blinking fast, please skip the reset steps
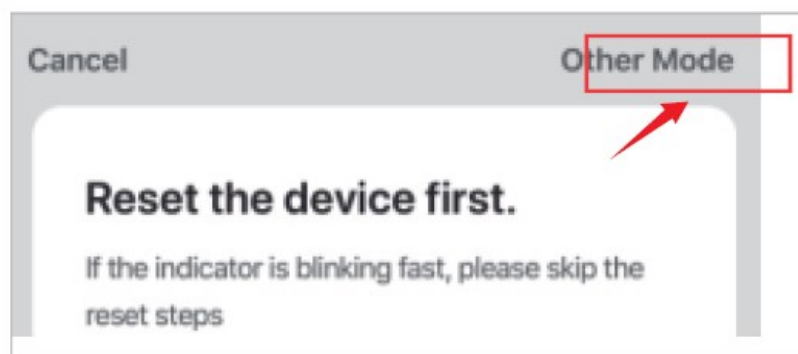

-->Make sure the indicator light is flashing slowly and confirm it in App;
-->Choose your 2.4G Wi-Fi and enter the password and confirm it in App;

-->Tap "Connect now" and choose Wi-Fi hotspot named "SmartLife-xxx", then go back to Smart Life application;

-->Wait till successful configuration and then tap "Completed".

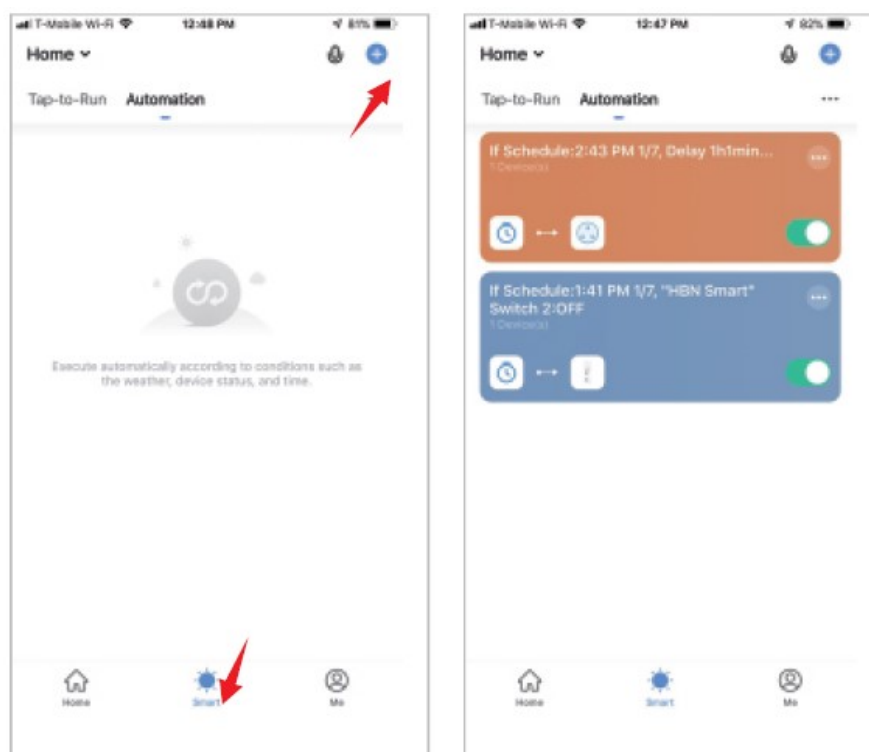

▶ Getting to Know Smart Life App
⊙〇 Switch

⊙ Left time

⊙ Schedule

Note: edit the default names in this interface, for better management.

▶Create Automations/Groups

You can create certain scenes and groups on Smart Life App, it allows you to control different smart devices in different rooms at the same time.

▶Device Sharing

If you want to give others the permission to control your smart plug, you can authorize that by activating the device sharing function
Go to the Smart Life app
-->Choose the device you want to share
-->Choose Edit Button -->Choose shared devices
-->Add sharing-->Enter his/her Smart Life account
-->Search and complete.

▶How To Connect with Amazon Alexa

Requirements:

1.Amazon Alexa Device and Alexa App
2.The Smart Plug connected with Smart Life App
3.Smart Life App user ID and password.
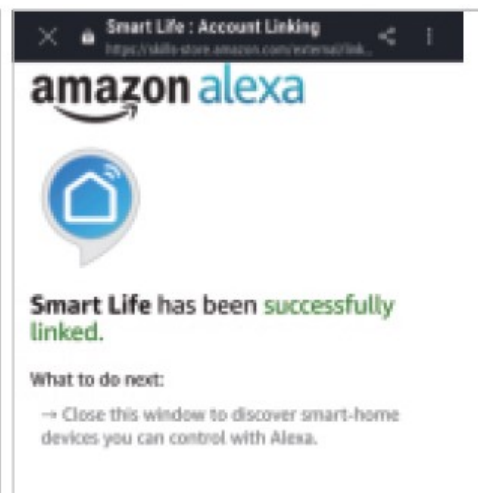

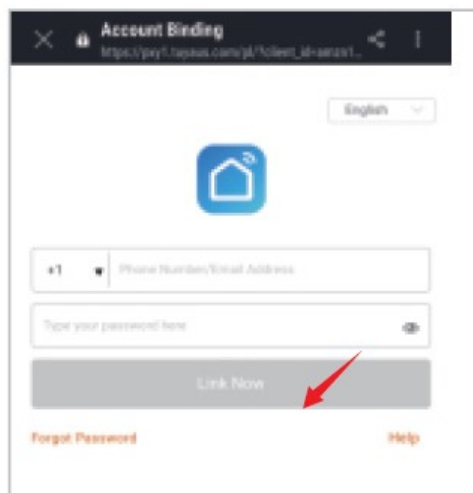

## Add Smart Life as a "Skill" for Alexa

Open Alexa app and choose Skills & Games
--> Search for Smart Life
--> ENABLE TO USE
--> Enter the Smart Life account

-->Authorize to use
-->Choose Smart Life. And then, the devices you added on will sync to Alexa App. You can also ask Alexa to discover new devices for you in this moment.

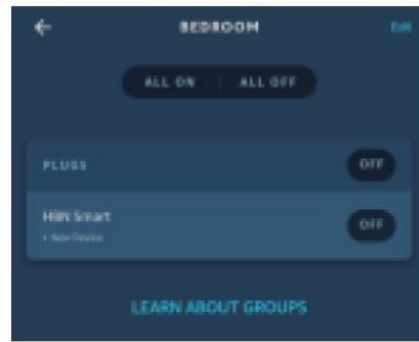

How to ask Alexa to turn on/off Smart Plug

First, you will need to make sure the names for the plug are the same on the Alexa app and on the Smart Life app. If they are not the same, Alexa will not

be able to identify the plug.
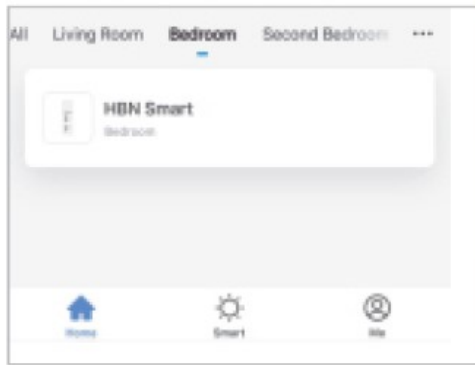

| Smart Life App | Alexa App |

Things you can do with Alexa

* Voice Control the smart plug
* Remote Control the smart plug via Alexa App.
* Add the smart plug to certain groups

on Alexa App.You should make sure all the smart devices' names at your home are nonrepetitive and recognizable for Alexa. For other questions about Alexa, please find out with Amazon Alexa support page, or contact us for help directly by email.

Tips for using Alexa Voice Control
Please make sure the device name you set for the smart plug is unique and recognizable for Alexa voice assistant. You should make sure all the smart devices names at your home are non-repetitive and recognizable for Alexa.

Voice assistant system needs the exact command to do the work.

▶How To Connect with Google Home

After you've connected the smart plugs with the Smart Life app successfully, you can start to link them to
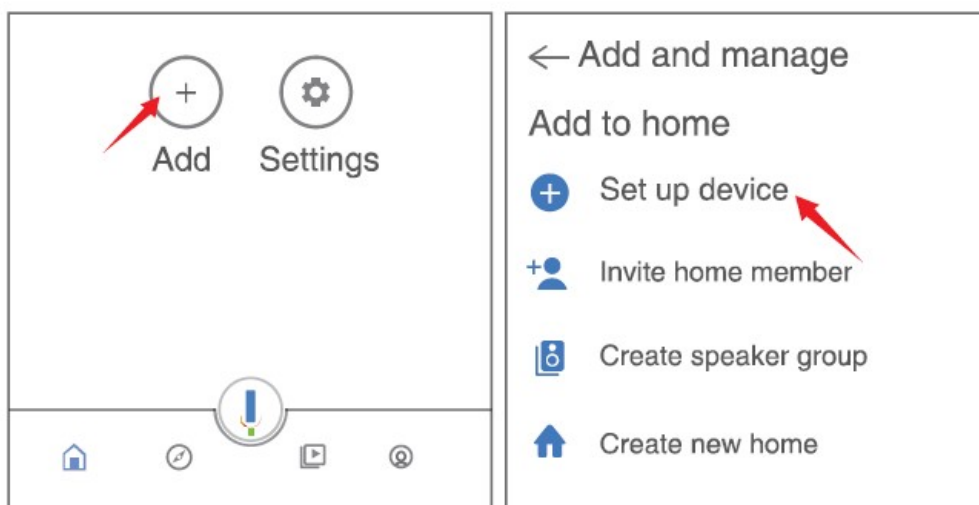

Google Home app:
Open Google Home app and find "Set up device"
-->Click "Works with Google"
-->Search Smart Life
-->Enter your Smart Life account
-->Authorize to use.

After that, you will see the smart plug at the home page of Google Home as "Linked to you", but you still haven't set the device name and assign a home or a room for it.

▶ Trouble Shooting

Q: Why did my phone connection fail?

A: * You should try both Easy Mode and AP Mode, read page 5-page 11, make sure to follow the guide and try again.

* Confirm your home Wi-Fi is 2.4GHz and that you've entered the correct password during the connection.

* Remove&Install the smart plug to start again.

Contact the customer support team for assistance if you still have problems with the connection after following the steps above.

Q: Why can't I voice control the plug with my Alexa/Google

A: * Make sure the smart plug is connected successfully on the Smart Life app. Ensure that they are working well by testing to see if you can turn the plug on and off through the app.

* Make sure the same account is linked on the Smart Life as a skill on Alexa/Google App.

* Make sure your Alexa/Google device is working fine.

* Check the device names that you set for this smart plug, it should be non-repetitive and recognizable for voice assistant, Also, please make sure your native language is available for Alexa.

If you still having trouble controlling our smart plug through voice control after

following all instructions, do not hesitate to contact us for help.

Q: Do I need to set up the device again if I changed my router?

A: Yes, you must set up the smart plug again if there are any changes to the current wifi status. (i.e changing the name of the wifi, changing the router/modem). There is no need to set the device up again if you are just changing the placement of the router in the same house.

Q: Why does it turns on/off or comes offline surprisingly ?

A: Make sure your connection to the wifi is not interrupted. Check to see if there were any timers/schedules set for the plug. If everything looks fine, reset the plug and install it again on the app. Email us at support@bn-link.com if the problem still persists.

Caution:

This device complies with Part 15 of the FCC Rules / Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions: (1) this device may not cause harmful interference. (2) this device must accept any interference received, including interference that may cause undesired operation.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

1. L'appareil ne doit pas produire de brouillage;

2. L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and

used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

MPE Reminding

To satisfy FCC / IC RF exposure requirements, a separation distance of 20 cm or more should be maintained between the antenna of this device and persons during device operation.
To ensure compliance, operations at closer than this distance is not recommended.

L'antenne installée doit être située de façon à ce que la population ne puissey être exposée à une distance de moin de 20 cm. Installer

l'antenne de facon à ce que le personnel ne puisse approcher à 20 cm ou moins de la position centrale de l' antenne.

La FCC des éltats-unis stipule que cet appareil doit être en tout temps éloigné d' au moins 20 cm des personnes pendant son functionnement.
