

5) The RF exposure plot values do not appear to match the data in the table above it and actually appear higher than identified in the table. Please explain.

*(5) Response: The plots show a max hold with a peak detector. The data show a quasi-peak measurement.*

14) The plots in the test report on page 12 values do not appear to match the data in the table above it and actually appear higher than identified in the table. Please explain

*(14) Response: The plots show a max hold with a peak detector. The data show a quasi-peak measurement.*
