Re: Request for confidentiality
FCC ID: 2ATMU-CP-RM001

To whom it may concern,

We hereby respectfully request that under the provision of 47 CFR 0.459 and 0.457(d) the documents listed below and attached with this application for certification be provided with confidential status.

- Schematics.pdf
- Operational Description.pdf
- Frequency Block Diagrams.pdf
- Modular Integration Instructions (pursuant to FCC KDB 996369 D03)

Per FCC KDB 996369 D03 section 2.1, the module integration instructions may be held long-term confidential according to the following guidance:

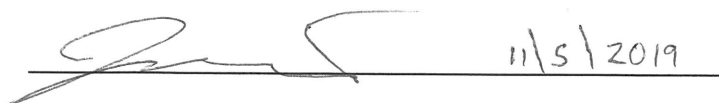

"If the modular transmitter is only approved for use by the grantee in its own products and not intended for sale to third parties, the integration instructions may not be detailed but this must be declared in the filing. In that case, it is permitted to place the instructions in the theory-of-operation exhibit folder using long-term confidentiality. The applicant must include a statement in the filing that the module is not for sale and the user manual integration instructions are internal confidential manufacturing documents. The grant of certification for such a modular transmitter must be limited."

This module is for use in Cleaveland/Price products only, *is not for sale*, and the user manual / integration instructions are internal confidential manufacturing documents.

Any exhibit / information for which we have requested confidentiality, but which may not be accorded such treatment by the FCC, should be returned to us.

The documents listed above contain trade secrets that are treated as confidential by us. Substantial competitive harm to us could result should they be made available to the public.

Sincerely,

11/5/2019

Justin Reinhart
