- FAQ:Scan the QR code below

Adding Base station

Step

Power up the base station, and then connect the Ethernet port to your router with the network cable.

Step 2

The system indicator stays on with white light for 10 s, and then off, which means the base station is connected to the network.

Step 3

Scan the following QR code or serach "Ucfer" in Google Play or App Store to download and install the Ucfer App.

Step 4

Run Ucfer App, and then register an account for first use.

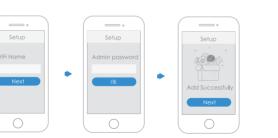

Step 5

Do the following operations to finish adding base station.

- Note: If you have more than one camera, do step 5 to add them one
 - If the Wi-Fi network changed or the indicator status goes wrong, reset the camera, and then do step 5 to add it again.

Pairing Camera

Step 1

On the base station: Press the SYNC button, and then the system indicator on the base station flashes with white light.

Step 2

On the camera: Press the SYNC button, and then the indicator on the camera flashes with green light.

Step 3

The pairing starts, and the indicators flash as described below:

- The system indicator on the base station stays on with white light for 10 s, and then off.
- The indicator on the camera stays on with green light for 10 s, and then off.

The pairing succeeded then.

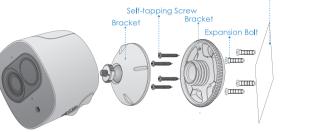

Note: You can pair six cameras at most with one base station, and pair one camera at a time.

Keep the distance of the base station and the camera within 30 cm (12 inches) during pairing.

Installing Camera

Note: Make sure the mounting surface is strong enough to hold at least three times the device weight.

Mountina Surface

- Step | Drill screw holes on the mounting surface as the positioning map shows, and then put in the expansion bolts.
- Step2 Open the bracket, and then attach the bottom of the bracket to the mounting surface with the self-tapping screws.
- Step3 Attach the other half of the bracket to the camera, then adjust the lens to the ideal angle, and then fix the bracket.
