## WARRANTY:

LEXI provided one-year warranty is valid if the product is used in accordance with the instructions and for its intended purpose. Claims will only be accepted on submission of the original proof of purchase (invoice, sales slip or receipt) stating the purchase date, the name of the dealer and a description of the product with product ID labeled at the products. The LEXI's warranty lapses if:

- a. Anything has been changed, crossed out, deleted or rendered illegible on the purchase docket or product description.
- b. The failure is caused by damage, faulty connections or abuse.
- c. A defect is caused by extreme circumstances not inherent to the product, for example, lighting, flooding, fire, incorrect use or negligence.
- d. The product has been opened or disassembled.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## TROUBLESHOOTING

- Ensure your device is within 15 meters without obstacle block the LEXI hub and lights
- Ensure your smart device turned on Bluetooth and location.
- Check the power On/Off switch is located at On position.
- Make sure the light is screwed in the socket completely.
- Confirm device is paired with LEXI Hub
- Just in case, you can un-pair the lights by 6 times power cycle the light, afterwards, you'll see a cool white flashing. ( A warm white will be flashing at the 5th power cycle which is a warning signal for you. If you don't want to un-pair it, stop the power cycle. The light will go back to the last state). Then, re-pair this light as the user guide.
