4 Installation

The camera can be placed on the desktop or installed on the wall. Please make sure the wall is strong enough to withstand 3 times the weight of the camera. The steps of wall mounting are as follows.

- ① Attach the drill template to the place where you want to fix the camera. Then drill the screw holes on the wall according to the drill template.
- ② Peel off the drill template and then insert the plastic plugs and screws into the screw holes. Please leave a little clearance between the wall and the screws.

- ③ Route and connect the cables.
- ④ Hook the mounting base to the screws and ensure that the camera is fixed firmly. Then adjust the angle of the bracket.

- ⑤ Remove the protection films of the lens and the IR LED cover.

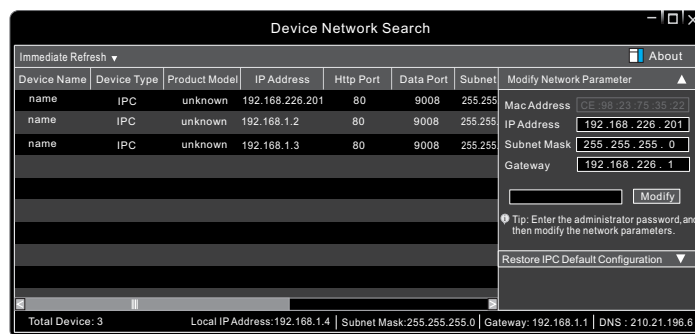

5 Network Connection

● Access the Camera Through the Wired Network

- ① Make sure that the camera and the PC are connected via LAN.
- ② Find the IP-Tool from the CD and then install it in the computer. After that, run the IP-Tool as shown below.

- ③ Modify the IP address. The default IP address of this camera is 192.168.226.201. Click the information of the camera listed in the above table to show the network information on the right hand. Modify the IP address and gateway of the camera and make sure its network address is in the same local network segment as the computer's. Please modify the IP address of your device according to the practical situation. After modification, please enter the password of the administrator and click "Modify" button to modify the setting.

⚠ The default password of the administrator is "123456".

- ④ Double-click the IP address listed in the IP-Tool or manually enter the IP address in the address bar of the web browser to connect the camera. Then follow directions to download and install the applicable plug-in. After that, enter the user name and password in the login interface.

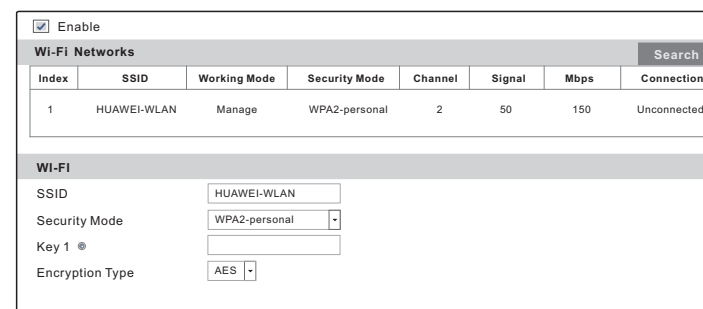

⚠ The default username is *admin*; the default password is *123456*.

● Access the Camera Through Wi-Fi

A: You can quickly connect Wi-Fi through WPS function (See 3 Overview--WPS for more details).

B: You can also follow the steps below to connect Wi-Fi.

- ① Connect the camera to the LAN through the network cable.
- ② Run the IP-Tool and then find the IP address of the camera. The default IP address of this camera is 192.168.226.201. Double click it. This will bring you to the login interface of the camera. Enter the default username and password to log in.
- ③ Click "Config" → "Network" → "WIFI" to go to the following interface.

- ④ Enable WIFI and click "Search" to search wireless routers. Select the desired router, enter the key number and select encryption type. After that, select "Obtain an IP address automatically" or manually enter the IP address by clicking "Use the following IP address".
- ⑤ Pull the network cable out of the camera.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
