Install SIM cards

This product only applies to Nano-SIM and Nano-SIM (Micro SD). Insert non-standard card may cause damage to the SIM card slot.

Please turn off your phone before you insert the card. When you insert the card, please pay attention to the gap direction and keep the card balanced.

If the Nano card and the Micro SD card share the same card slot, the slot is compatible with two cards, but the two cards cannot be placed at the same time.

Please use the PIN needle carefully to prevent injury to the fingers or damage the phone. Please put the PIN needle on somewhere children can't reach so as to prevent the children from accidentally swallowing or stabbing themselves.

Charge the battery

Please charge at the first time using this product.

Notice:
When charging, the charger should remain close to the power outlet.

Navigation key

Use the navigation key at the bottom of the screen to operate the device.

Safety Precautions:

Do not place the phone and battery near or inside the heating device, cooking equipment or high pressure vessel (such as microwave oven, induction cooker, electric oven, electric heater, pressure cooker, water heater, gas stove and etc.), to prevent the battery overheating explosion.

Please use original chargers, cables and batteries. Using non-original chargers, cables or batteries without manufacturer's certification may cause electric shock, fire, explosion, or other hazards.

To avoid squeezing the device

Do not place heavy objects on the device or squeeze the device vigorously to avoid damage to the device or cause distortion of the touch screen. At the same time, please do not put the device in the pocket for a long time.

The thermal phenomenon of device after long use

The device may become hot when it is used for a long time, such as a long call, battery charging or browse the web. This is a normal phenomenon, not the failure of the device, please do not worry.

Notice:

Access to the Internet, send and receive messages, upload and download, automate synchronization, use certain applications or location-based services may incur additional costs. To avoid additional costs, please contact the service provider and select the appropriate service.

Product Specification

Product Model	Wings Mobile W3	
Size	145*70.7*8.8mm	
Supported network	GSM	82/B3/B5/B8
	WCDMA	81/B2/B4/B5/B8
	LTE	81/B3/B4/B5/B7/B8/B20 838/B40/B41
	Battery	Typ:3000 mAh
CPU	Quad-Core	
Camera	Front:16MP; Rear:16MP+2.0MP	
Display	5.71"HD+

Quick Start Guide

Please read the instructions before installing or using the product, and kindly keep it

15.19 Labeling requirements.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

15.21 Information to the user.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

15.105 Information for the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connecting the equipment to a socket on a circuit different from that to which the receiver is connected.
- Contact with the provider or a radio / TV technician for help.

Specific absorption rate (SAR):

This mobile phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a margin of safety designed to ensure the safety of all people regardless of their age or health.

The FCC Statement of Exposure to RF and the SAR limit for the United States (FCC) is 1.6 W / kg average for each gram of tissue. This device was tested for typical operations of use on the body, with the back of the phone at 1.0cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a distance of 1.0 cm between the user's body and the back of the phone. The use of belt clips, covers and similar accessories must not contain metallic components in their assembly. The use of accessories that do not meet these requirements may not meet FCC RF exposure requirements and should be avoided.

Functioning in the body

This device was tested for typical operations of use in the body. To comply with RF exposure requirements, a minimum separation distance of 1.0 cm must be maintained between the user's body and the telephone, including the antenna. Third-party accessories such as belt clips, covers and similar accessories used with this device should not contain metallic components, accessories that do not meet these RF exposure requirements and should be avoided from use on the body. Use only the supplied antenna or an approved antenna.
