This product can only be used indoor.

3 Installation guide

- Connect one end of the HDMI cable into the HDMI port on Migu Box. Connect the other end into the HDMI port on TV.
- (Optional) To use an Ethernet cable (not included), connect into the Ethernet port.
- (Optional) Connect one end of the AV cable (not included) into the AV Port on Migu Box. Connect the other end into AV ports on TV.
- Plug the included power cable into Migu Box and then into a power outlet.

4 Tips and troubleshooting

Wired network

If you are having trouble with your Ethernet connection, verify that the Ethernet cable is properly connected, then restart your Migu Box.

Wi-Fi network

- Using the included remote control, go to the Settings menu in Migu Box, and select your network from the list displayed. If your network is hidden, enter your network name.
- If you see a lock icon, your Wi-Fi network requires a password, so make sure you have it available.

5 FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference.
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ★ Reorient or relocate the receiving antenna.
- ★ Increase the separation between the equipment and receiver.
- ★ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ★ Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body
