Battery information

This produce use Li-ion battery as a power supply. It is light, environmental. All following use tips will help you to make best use of Axiom chargeable battery.

1. Make sure use the Axiom matchable battery.
2. Power off before charging without separating the battery.
3. New battery can be kept for long time in cool and dry environment and it should be charged every 3 months or it will be damaged.
4. After long time storage, recharge the battery pack before using.
5. Charge the battery with the provided charger.
6. Extreme temperature will influence the battery and it had better be charged in the cool and dry environment.
7. Don't put the battery under extreme temperature, that will reducing the capacity or life time. Extreme Cold battery may can't power the radio even it is charged fully since it can be affected under 0°C
8. No battery short-circuit is permitted.
9. The battery must be disposed of correctly according to the local regulation or law.
10. Don't throw the battery into the fire for fear of explosion, or any other damage.

Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type.

Battery use notes

1. Don't use the damaged charger or battery.
2. Don't use the battery for other purpose.
3. The charging time should be calculated by the power left inside, battery type and charger. Our battery can be recharged for more than 300 times and you had better change new one if the time is much shorter than normal.
4. The battery will run out of energy if not be used for long time.
