ATTN.: Reviewing Engineer

FCC ID: 2ATWB-DTA7KV3L1202
Models: 774-1147/02 774-1167/02

Model 774-1167/02 is identical to the archetype model 774-1147/02 (conformance tested) apart from the removal of the "DMR option board". This board is a baseband digital processing board, which performs DMR voice coding and decoding functionalities: in transmission, it takes as an input digitised PCM voice and applies DMR voice coding; in reception, it takes as an input DMR voice coded frames and outputs digitised PCM voice. The "DMR option board" also hosts an auxiliary GPS receiver and is piggy-back mounted on the Radio Transceiver Base Band (RTBB) board by means of two 30-pole connectors. Its removal does not compromise the conformity of the product.

| | Max RF Tx Power (Watt) | DMR option board | Model | Part Number | Differences from archetype |
|---|---------------------------------|---------------------|-------------|-------------|----------------------------|
| 1 | 50 | Yes | 774-1147/02 | 774-1147/02 | archetype |
| 2 | 50 | No | 774-1167/02 | 774-1167/02 | without DMR option board |
