Please use the original power adapter of this product to provide power for the wire-free charger. 2.Make sure there are no metal objects between the wireless charger and the mobile phone while phone is charging, to prevent metal objects from being heated by mistake. 3. Please do not place magnetic cards such as bank cards and corporate cards in the charging area to avoid damaging. 4. In order to get a better wire-free charging, please do not exceed the maximum charging distance of the product. 5.Please do not use this product on the table board of metal. <p>Performance features:</p> <ol style="list-style-type: none"> 1.Installation method include adhesive and drilling, easy and quick. 2.This product owns unique installation alignment design, which is accurate and fast to provide better user experience. 3.It support all Qi wireless charging mobile phones, and is compatible with Apple 7.5 W, Samsung 10 W and other mainstream wireless fast charging protocols. <p>Instructions:</p> <ol style="list-style-type: none"> 1. Make sure that your phone supports wireless charging, because the wireless charging requires the support of the wireless induction coil built into the phone(hardware); 2. When you power on the wireless charger, please make sure there is no magnetic object (metal, magnet, etc.) in the charging area, then switch on the power, and place the mobile phone in the charging area; 3. The wireless coil of different phones is located in different locations. The sensor area is generally located in the center of the phone. You need to make sure that the wireless coil of the phone is aligned with the center of the wireless charging area. When charging starts, the screen will light up to show the charging prompt; 4. You need to pay attention to the limitation of charging distance for wireless charging. The distance between the phone and the wireless charger should not exceed the maximum charging distance of the product. 	<p>FCC Warning</p> <p>This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.</p> <p>Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.</p> <p>NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.</p> <p>However, there is no guarantee that interference will not occur in a particular installation.</p> <p>If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:</p> <ul style="list-style-type: none"> -- Reorient or relocate the receiving antenna. -- Increase the separation between the equipment and receiver. -- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -- Consult the dealer or an experienced radio/TV technician for help. <p>To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body. Use only the supplied antenna.</p>																																																			
Name	Wireless charger																																																																								
Model	GF06L Lite																																																																								
Input power	DC 24V 1A																																																																								
Output Power	10W Max downward compatibility 5W																																																																								
Protection	Over current, over voltage, over temperature, short circuit, FOD detection																																																																								
Dimension	Φ110mm×22mm																																																																								
State	Standby mode	Charging	Abnormal																																																																						
LED display	No lights	Green and breathing	Red and blinking																																																																						

材质工艺要求: 材质: 70g普通书写纸
 工艺: 单色双面印刷、风琴折
 印刷要求: 色相正确、印迹牢固、套印准确、各色套印不漏杂色、套印误差≤0.1mm
 说明书边角为直角、不做R角
